Genders, Cultures, and Literacies Barbara J. Guzzetti,2021-11-29 This volume brings together leading scholars in their fields who offer much needed and wide-ranging perspectives on the intersections of genders, cultures, and literacies. As incidents of racial and gender aggression grow in number and in global attention, it is essential to understand how racial and gender identities and their expressions interplay and influence literacy development and practice. Contributors examine how social identities intersect and are expressed in literacy practices across an array of school and out-of-school settings and discuss how gender and race are represented in individuals' multimodal practices. Chapters address such topics as the literacy practices of incarcerated fathers of color, Black girls' literacies, Indigenous students' cultural literacies, the writing practices of Latinx women for identity representation, and more. Ideal for scholars in literacy studies, gender studies, and cultural studies, this volume is a necessary and original update to the ways cultural, racial, and gender identities are viewed in current educational and sociocultural climates.

Getting the Message Across Stéphane Faroult,2016-11-21 Create memorable presentations on technical and complex topics in slideware such as Microsoft PowerPoint and Apple's Keynote for Mac. Learn good pacing and rhythm as well as judicious use of special effects. Whether the goal is to help a sale or to educate, and whether the final delivery is a live presentation, a webinar, or a short video presentation, this book focuses on the particular difficulties linked to technical presentations. You will learn to create a story when there is none, gain the interest of an audience who may not feel as strongly for the topic as the speaker does, turn abstract concepts into visual models, overcome the limitations of the medium (limited space, two dimensions), maintain interest through rhythm, and use effects, not to look cool or get that WOW moment, but to serve the message. Getting The Message Across presents a number of field-tested ideas for raising interest. The use of various techniques and careful scripting will help you, even if you aren't a natural-born show-person, to communicate effectively, and to make your audience remember your message, and not necessarily your slides. This book will teach you: Rhythm and animations, and the use of transitions To hold audience interest even with dry topics To create memorable presentations Techniques useful for PowerPoint, Keynote for Mac, and any similar presentation medium or environment What You Will Learn Turn austere topics into interesting stories. Give rhythm and pacing to your presentations. Build a narrative during transitions and animations. Hold audience interest and make listeners feel clever. Make people

remember your presentation rather than your cool use of slideware. Who This Book Is For People who have to communicate effectively on strongly technical topics. This book targets educators and trainers as well as technical consultants who need to present complex solutions to customers or leads, as well as would-be speakers at scientific or technical conferences. Getting The Message Across is a book for people who want to make their presentations not only more attractive, but really memorable. It is for people who aren't looking for a standing ovation, but who are willing to do what they can to be understood and to make their messages remembered. Getting The Message Across focuses on using slideware such as PowerPoint and Keynote. Such slideware, for all its flaws, is still one of the best ways to communicate, not only live, but also in dematerialized communications (webinars, video tutorials) for reaching an ever-growing audience.
