MEDINFO 2021: One World, One Health — Global Partnership for Digital Innovation P. Otero,P. Scott,S.Z. Martin,2022-08-05 The World Health Organization defines health as “a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity”, and its constitution also asserts that health for all people is “dependent on the fullest co-operation of individuals and States”. The ongoing pandemic has highlighted the power of both healthy and unhealthy information, so while healthcare and public health services have depended upon timely and accurate data and continually updated knowledge, social media has shown how unhealthy misinformation can be spread and amplified, reinforcing existing prejudices, conspiracy theories and political biases. This book presents the proceedings of MedInfo 2021, the 18th World Congress of Medical and Health Informatics, held as a virtual event from 2-4 October 2021, with pre-recorded presentations for all accepted submissions. The theme of the conference was One World, One Health - Global Partnership for Digital Innovation and submissions were requested under 5 themes: information and knowledge management; quality, safety and outcomes; health data science; human, organizational and social aspects; and global health informatics. The Programme Committee received 352 submissions from 41 countries across all IMIA regions, and 147 full papers, 60 student papers and 79 posters were accepted for presentation after review and are included in these proceedings. Providing an overview of current work in the field over a wide range of disciplines, the book will be of interest to all those whose work involves some

aspect of medical or health informatics.

The Innovation Mindset Lorraine Marchand,2022-09-13 Innovation requires more than a eureka moment. The vast majority of new product ideas never make it to market. Typically, this is because of the failure to address a real problem that a customer has experienced and is willing to pay to have solved. What do people and businesses need to know about the realities of innovating in order to develop products successfully? Lorraine Marchand—a seasoned practitioner who has guided Fortune 500 companies and start-ups on developing and launching new ideas—lays out a step-by-step framework for spurring success. She shares her eight laws of innovation, a formula for driving significant and lasting transformation in any organization. Marchand emphasizes the frame of mind needed to spark the innovation process, underscoring the importance of creating a problem-solving culture and supporting personal curiosity, passion, and talent. She pinpoints the strengths shared by the big ideas that break through and debunks the myths that hold back aspiring creators. Drawing on her experience as a woman in a male-dominated field, Marchand discusses how to support entrepreneurship by women and highlights the contributions of underrepresented innovators. Marchand’s how-to program for innovation is clear and easy to follow, featuring a toolkit of strategic templates and planning frameworks that are illustrated by helpful case studies. Written in authoritative but conversational language, *The Innovation Mindset* offers a practical plan for both the veteran with another great idea and the first-timer with a big dream.
