Contracting for Services in State and Local Government Agencies William Sims Curry, 2016-04-28 This second edition of *Contracting for Services in State and Local Government Agencies* provides state-of-the-art tools for best practice in the procurement of services at state and local levels, from initial stages through to completion. Including lively case studies and research conducted with state and local agencies across the United States, this book provides management advice and tips on compliance to reduce costs, select the best-qualified contractors, manage contractors' performance, and prevent corruption and waste. Utilizing the results of new research in all fifty states, author William Sims Curry offers updated best-practice documents, methodologies, and templates including: a Request for Proposal (RFP), a scorecard for proposals to select the best-qualified contractor, a toolkit for meeting socioeconomic contracting goals without compromising price, quality, or on-time delivery, and a Model Services Contract (MSC). Special consideration is given to obtaining services and products in states of emergency. Several additional resources for practitioners are available online, including sample contracts and a straightforward, inexpensive tool for tracking contractors' progress and cost management. The roadmap and templates contained in this book and available online to readers will prove essential to state and local government agency contracting professionals and other officials and employees called upon to participate in the drafting of solicitations, writing sole source justifications, writing scopes of work, serving on advance contract planning and source selection teams, recommending award of contracts, or assisting in the management of those contracts.

Government Contracting William Sims Curry, 2016-08-05 The second edition of *Government Contracting: Promises and Perils* picks up where the first edition's mission left off: exposing fraud, incompetence, waste, and abuse (FIWA) and analyzing corruption, mismanagement, and ineptitude that defile government contracting. The first edition thoroughly outlined procurement throughout the contracting cycle including initial planning, contractor selection, contract administration, contract closeout, and auditing. This significantly revised new edition provides additional much-needed guidance on contracting documents, management tools, and processes for addressing negative influences on government contracting, including an improved approach to evaluating proposals. Specific guidance for avoiding FIWA is provided for government officials and employees, government agencies, and government contractors, and practical solutions to problems faced by individuals and organizations involved in government contracting are intended for both practitioner and pedagogical

applications. The Government Procurement Corruption Wall of Shame that was introduced in the first edition to illustrate contracting perils such as conflicts of interest, duplicity, favoritism, incompetence, kickbacks, and protests is continued in the second edition, and cases illustrating the existence of FIWA in government contracting have been thoroughly updated. Contracting documents and contract management tools are provided on a website designed to accompany the book. Written at the graduate level and specifically intended for state, local, federal, and international government procurement activities, this textbook is required reading for public procurement, contract management, business, and public administrations courses.

Teaching Public Health Lisa M. Sullivan,Sandro Galea,2019-08-20 A comprehensive collection of best practices in public health education. As more students are drawn to public health as a field of study and a profession, bringing varied backgrounds and experiences with them, the number of public health programs and schools of public health has grown substantially. How can teachers meet the changing needs of incoming students—and ensure that graduates have the knowledge, skills, and attributes to pursue further education and forge successful careers in public health? Aimed at experienced and new teachers alike, this timely volume is a cutting-edge primer on teaching public health around the globe. Bringing together leaders in the field with expertise across the educational continuum, the book combines the conceptual underpinnings needed to advance curricula with the resources to train and support faculty in innovative teaching methods. This thorough book • discusses challenges faced by public health teachers • examines the principles and practices for teaching at each level of study • describes technological and pedagogical innovations in public health education • stresses the importance of life-long learning and interprofessional education • offers concrete tips for engaging students through active and collaborative learning • focuses on teaching cultural competency and reaching diverse student populations • looks

to the future, building on emerging trends and anticipating where the field is headed A field-defining volume, Teaching Public Health offers a concrete plan to ensure that both individual courses and overall curricula are responsive to the needs of a rapidly changing student body and the world beyond the school. Agency Mania Bruno Galpois,2019-02-26 Why do some client/agency relationships thrive while others fail? At a time of unprecedented change and complexity in marketing and advertising, Agency Mania will transform the way you look at client/agency relationships and invite you to build sustained partnerships that deliver unmatched work and results. The world of marketing is a trillion-dollar industry and is changing at a drastic pace. The advertiser/agency relationship is under incredible pressure. Some may argue it's even broken. The future of the advertising industry is uncertain. The entire marketing ecosystem is being tested. What will the agency of tomorrow look like? What competencies will agencies need to build? How will they deliver greater value to their clients? Similarly, how will advertisers reap the benefits agencies bring to their table? How will they become better clients? How will they set their partnerships up for success? In Agency Mania, partnership guru Bruno Galpois demonstrates that these partnerships, once managed professionally, have remarkable transformational value and measurable business impact. The author shines a bright light on the insanity of advertisers and agencies failing to work optimally together or hold each other truly accountable. Building a successful long-term advertiser/agency partnership requires a robust set of competencies and operating principles. Agency Mania shows you step-by-step how it is done.

International Labour Standards and Platform Work Mathias Wouters,2021-11-25 Platform work - the matching of the supply of and demand for paid labour through an online platform - often depends on workers who operate in a "grey area" between the archetype of an employee and a self-employed worker. This important book explores the utility of the International Labour Organization's existing standards in governing this phenomenon. It indicates that despite their relevance, many standards have little or no impact. The standards apply to the issue but they fail to connect with it. The author shows how three ILO conventions - the Home Work Convention, 1996 (No. 177), the Private Employment Agencies Convention, 1997 (No. 181), and the Domestic Workers Convention, 2011 (No. 189) - can be revitalised to have an impact on

the platform work debate. In the course of the analysis he responds in depth to such questions as the following: What are digital labour platforms? What does decent work mean? Did the ILO centenary fundamentally change anything? What is the link between private employment services and platform work? How do crowdworkers relate to homeworkers and teleworkers? Are platform workers engaged in domestic work? What form could a future ILO standard on platform work take? Given that the ILO plans to start discussions on a potential future standard for platform work in 2022, this book will prove very useful in highlighting the issues and standards that such discussions should consider. Research has shown that the techniques and tools of the platform economy have spread far beyond gig work, resulting in widespread “gigification” and restructuring of workplace behaviours and relationships, jobs, and communities across the world. For this and other reasons, including the book’s detailed analysis of issues not addressed elsewhere, labour lawyers, in-house counsel, researchers, and policymakers will gain valuable insight into what decent work in the platform economy would require, thus greatly broadening the discussion on this difficult-to-regulate phenomenon.

Guide for Consultant Contracting American Association of State Highway and Transportation Officials. Preconstruction Engineering Management Technical Committee, American Association of State Highway and Transportation Officials, 2008 The use of engineering consultants by state transportation agencies continues to be important in providing the appropriate solutions to transportation needs. This publication replaces the *Guide for Contracting, Selecting and Managing Consultants in Preconstruction Engineering*, published by AASHTO in 1996. In order to assess current practices, questionnaires were developed for both state and consultant practitioners. The responses showed significant growth in the volume of work done by consultants and in the range of services provided by consultants. The results of these surveys, along with the collective experience and expertise of the technical committee membership, were used to restructure much of the guide and to update and expand the discussion of current practices for the effective use of consultants.

Preparing NEPA Environmental Assessments Charles Eccleston, J. Peyton Doub, 2012-05-08 Although upwards of 50,000 environmental assessments (EAs) are prepared annually—compared to some 500 environmental impact statements (EISs)—the focus of U.S. National Environmental Policy Act (NEPA) regulations is on defining requirements for preparing EISs. Written by Charles Eccleston and J. Peyton Doub, who have established themselves among the top environmental experts in the world, *Preparing NEPA Environmental Assessments: A User’s Guide to Best Professional Practices* fills the need for an authoritative and comprehensive guide on how to prepare EAs. Bridging the regulatory gap, this book identifies relevant EIS regulatory requirements that can be logically interpreted to also apply to EAs. It compiles and synthesizes

information scattered throughout NEPA's regulations, executive orders, and guidance documents, and incorporates case law to provide additional clarification. The authors also draw on the professional experiences and best professional practices (BPP) of NEPA practitioners. From the fundamentals to more advanced topics, the book presents a consistent methodology to help beginners, students, and professionals manage, analyze, and write legally sufficient EAs. It addresses dilemmas that have traditionally plagued preparation of EAs, provides BPPs, tools, and approaches for resolving problems, and introduces methods for streamlining the EA process. Building on Eccleston's previous guide to EAs, *Effective Environmental Assessments: How to Manage and Prepare NEPA Assessments* (2001), this book reflects the rapid changes in government policy over the past ten years. An indispensable source of practical information, it provides readers with step-by-step direction and best practices for preparing defensible EAs.

Temporary Work, Agencies and Unfree Labour Judy Fudge, Kendra Strauss, 2013-08-29 Unfree labor has not disappeared from advanced capitalist economies. In this sense the debates among and between Marxist and orthodox economic historians about the incompatibility of capitalism and unfree labor are moot: the International Labour Organisation has identified forced, coerced, and unfree labor as a contemporary issue of global concern. Previously hidden forms of unfree labor have emerged in parallel with several other well-documented trends affecting labor conditions, rights, and modes of regulation. These evolving types of unfree labor include the increasing normalization of contingent work (and, by extension, the undermining of the standard contract of employment), and an increase in labor intermediation. The normative, political, and numerical rise of temporary employment agencies in many countries in the last three decades is indicative of these trends. It is in the context of this rapidly changing landscape that this book consolidates and expands on research designed to understand new institutions for work in the global era. This edited collection provides a theoretical and empirical exploration of the links between unfree labor, intermediation, and modes of regulation, with particular focus on the evolving institutional forms and political-economic contexts that have been implicated in, and shaped by, the ascendancy of temp agencies. What is distinctive about this collection is this bi-focal lens: it makes a substantial theoretical contribution by linking disparate literatures on, and debates about, the co-evolution of contingent work and unfree labor, new forms of labor intermediation, and different regulatory approaches; but it further lays the foundation for this theory in a series of empirically rich and geographically diverse case studies. This integrative approach is grounded in a cross-national comparative framework, using this approach as the basis for assessing how, and to what extent, temporary agency work can be considered unfree wage labor

Theory and Practice of Lesson Study in Mathematics Rongjin Huang,Akihiko Takahashi,João Pedro da Ponte,2019-05-28 This book brings together and builds on the current research efforts on adaptation, conceptualization, and theorization of Lesson Study (LS). It synthesizes and illustrates major perspectives for theorizing LS and enriches the conceptualization of LS by interpreting the activity as it is used in Japan and China from historical and cultural perspectives. Presenting the practices and theories of LS with practicing teachers and prospective teachers in more than 10 countries, it enables the reader to take a comparative perspective. Finally, the book presents and discusses studies on key aspects of LS such as lesson planning, post-lesson discussion, guiding theories, connection between research and practice, and upscaling. Lesson Study, which has originated in Asia as a powerful effective professional development model, has spread globally. Although the positive effects of lesson study on teacher learning, student learning, and curriculum reforms have been widely documented, conceptualization of and research on LS have just begun to emerge. This book, including 38 chapters contributed by 90 scholars from 21 countries, presents a truly international collaboration on research on and adaptation of LS, and significantly advances the development of knowledge about this process. Chapter 15: How Variance and Invariance Can Inform Teachers' Enactment of Mathematics Lessons of this book is available open access under a CC BY 4.0 license at link.springer.com Theory and Practice of Lesson Study in Mathematics: An International Perspective shows that the power of Lesson Study to transform the role of teachers in classroom research cannot be explained by a simple replication model. Here we see Lesson Study being successful internationally when its key principles and practices are taken seriously and are adapted to meet local issues and challenges. (Max Stephens, Senior research fellow at The University of Melbourne) It works. Instruction improves, learning improves. Wide scale? Enduring? Deep impact? Lesson study has it. When something works as well as lesson study does, while alternative systems for improving instruction fail, or only succeed on small scale or evaporate as quickly as they show promise, it is time to understand how and why lesson study works. This volume brings the research on lesson study together from around the world. Here is what we already know and here is the way forward for research and practice informed by research. It is time to wake up and pay attention to what has worked so well, on wide scale for so long. (Phil Dara, A leading author of the Common Core State Standards of Mathematics in the U.S.)
