Indigenous-Industry Agreements, Natural Resources and the Law Ibranke T. Odumosu-Ayanu, Dwight Newman, 2020-12-27 This edited collection is an interdisciplinary and international collaborative book that critically investigates the growing phenomenon of Indigenous-industry agreements - agreements that are formed between Indigenous peoples and companies involved in the extractive natural resource industry. These agreements are growing in number and relevance, but there has yet to be a systematic study of their formation and implementation. This groundbreaking collection is situated within frameworks that critically analyze and navigate relationships between Indigenous peoples and the extraction of natural resources. These relationships generate important questions in the context of Indigenous-industry agreements in diverse resource-rich countries including Australia and Canada, and regions such as Africa and Latin America. Beyond domestic legal and political contexts, the collection also interprets, navigates, and deploys international instruments such as the United Nations Declaration on the Rights of Indigenous Peoples in order to fully comprehend the diverse expressions of Indigenous-industry agreements. Indigenous-Industry Agreements, Natural Resources and the Law presents chapters that comprehensively review agreements between Indigenous peoples and extractive companies. It situates these agreements within the broader framework of domestic and international law and politics, which define and are defined by the relationships between Indigenous peoples, extractive companies, governments, and other actors. The book presents the latest state of knowledge and insights on the subject and will be of value to researchers, academics, practitioners, Indigenous communities, policymakers, and students interested in extractive industries, public international law, Indigenous rights, contracts, natural resources law, and environmental law.

How to Write and Get Published Tammy Ivins, Anne Pemberton, 2019-04-22 Written by two librarians with extensive publication experience, this book provides practical techniques and tools to prepare librarians to publish successfully. This book is neither a research methodology nor a 'craft of writing' book. Instead, its sole goal is to help librarians (and other information science professionals) start writing, identify an outlet for publication, and publish successfully. It dispels the mythos surrounding "scholarly writing" by providing practical tools and advice to help soon-to-be authors get started on the publication journey now. This book will guide aspiring authors step-by-step through the writing and publication process, from nurturing an idea to fruition all the way to enjoying a successful publication. Along the way, readers will learn how to identify the best publication type and venue, gather the needed information to make a convincing argument, and skillfully manage even the most complex project. Topics range from cerebral (such as how to maintain motivation through a project) to technical (such as common grammar and vocabulary errors), but all are designed to be practical and of immediate use to a writer. Whether a graduate student at the beginning of your career in the field of information sciences, a newly minted librarian fresh out of graduate school, a library administrator at the peak of your career, or somewhere in between, publishing can keep you engaged in the issues facing the profession and enhance your career and professional success.

Readers will be inspired and ready to contribute to library scholarship and start building their own successful scholarly habit.
