Marketing High Technology William H. Davidow, 1986-06-02 Marketing is civilized warfare. And as high-tech products become increasingly standardized—practically identical, from the customer's point of view—it is marketing that spells life or death for new devices or entire firms. In a book that is as fascinating as it is pragmatic, William H. Davidow, a legend in Silicon Valley, where he was described as the driving force behind the micro processor explosion, tells how to fight the marketing battle in the intensely competitive world of high-tech companies—and win. Blunt, pithy, and knowledgeable, Davidow draws on his successful marketing experience at Intel Corporation to create a complete program for marketing victory. He drives home the basics, such as how to go head-on against the competition; how to plan products, not devices; how to give products a soul; and how to engineer promotions, market internationally, motivate salespeople, and rally distributors. Above all, he demonstrates the critical importance of servicing and supporting customers. Total customer satisfaction, Davidow makes clear, must be every high-tech marketer's ultimate goal. The only comprehensive marketing strategy book by an insider, Marketing High Technology looks behind the scenes at industry-shaking clashes involving Apple and IBM, Visicorp and Lotus, Texas Instruments and National Semiconductor. He recounts his own involvement in Crush, Intel's innovative marketing offensive against Motorola, to demonstrate, step-by-step, how it became an industry prototype for a winning high-tech campaign. Davidow clearly spells out sixteen principles which increase the effectiveness of marketing programs. From examples as diverse as a Rolling Stones concert and a microprocessor chip, he defines a true product. He analyzes and explains in new ways the strategic importance of distribution as it relates to market sector, pricing, and the

pitfalls it entails. He challenges some traditional marketing theory and provides unique and important insights developed from over twenty years in the high-tech field. From an all-encompassing philosophy that great marketing is a crusade requiring total commitment, to a careful study of the cost of attacking a competitor, this book is an essential tool for survival in today's high-risk, fast- changing, and very lucrative high-tech arena.

Turn Ideas Into Products Steve Johnson,2017-04-02 We've all heard stories of amazing product successes: the brilliant college kid who started a business in his dorm room; the team who built a business from the back of a napkin with just a few friends and sold it for millions. Yet for every amazing success story, there are thousands of stories of products that went nowhere. Most of us aren't looking at billion-dollar valuations; we're not looking for an exit. Instead we have a few ideas -- some innovative, some not -- and we're trying to determine which to pursue. Likely, you're working for a company today and you need a step-by-step approach to turn ideas, regardless of their source, into businesses. In *Turn Ideas into Products*, author Steve Johnson introduces a nimble idea-to-market process with strong emphasis on personal experience with customers. From business planning to product launch, this approach for managing products empowers your product team to work smarter and collaborate better with colleagues and customers.

The Seven Secrets of the Prolific Hillary Rettig,2011 Procrastination, perfectionism and writer's block are not moral flaws; nor are they caused by laziness, lack of discipline or lack of commitment. They are habits rooted in fear and scarcity - and the great news is that once we start alleviating our fears and resourcing ourselves abundantly, our procrastination and related problems are often remarkably easily solved. My new book *The Seven Secrets of the Prolific*, tells you how! In it, I characterize, in great detail and depth, the major categories of constraining forces that cause underproductivity, including perfectionism; resource constraints; time constraints; ineffective writing processes; bias, ambivalence and internalized oppression; toxic rejection; and exploitative career paths. Then, I tell you how to overcome each.
