How to Architect Doug Patt,2012-02-17 The basics of the profession and practice of architecture, presented in illustrated A-Z form. The word architect is a noun, but Doug Patt uses it as a verb—coining a term and making a point about using parts of speech and parts of buildings in new ways. Changing the function of a word, or a room, can produce surprise and meaning. In *How to Architect*, Patt—an architect and the creator of a series of wildly popular online videos about architecture—presents the basics of architecture in A-Z form, starting with A is for Asymmetry (as seen in Chartres Cathedral and Frank Gehry), detouring through N is for Narrative, and ending with Z is for Zeal (a quality that successful architects tend to have, even in fiction—see *The Fountainhead's* architect-hero Howard Roark.) *How to Architect* is a book to guide you on the road to architecture. If you are just starting on that journey or thinking about becoming an architect, it is a place to begin. If you are already an architect and want to remind yourself of what drew you to the profession, it is a book of affirmation. And if you are just curious about what goes into the design and construction of buildings, this book tells you how architects think. Patt introduces each entry with a hand-drawn letter, and accompanies the text with illustrations that illuminate the concept discussed: a fallen Humpty Dumpty illustrates the perils of fragile egos; photographs of an X-Acto knife and other hand tools remind us of architecture's nondigital origins. *How to Architect* offers encouragement to aspiring architects but also mounts a defense of architecture as a profession—by calling out a defiant verb: architect!

Architect + Entrepreneur Eric W. Reinholdt,2015 Part narrative, part business book; Architect + Entrepreneur is filled with contemporary, relevant, fresh tips and advice, from a seasoned professional architect building a new business. The guide advocates novel strategies and tools that merge entrepreneurship with the practice of architecture and interior design. The Problem:Embarking on a new business venture is intimidating; you have questions. But many of the resources available to help entrepreneur architects and interior designers start their design business lack timeliness and relevance. Most are geared toward building colossal firms like SOM and Gensler using outdated methods and old business models. If you're an individual or small team contemplating starting a design business, this is your field guide; crafted to inspire action. The Solution:Using the lean startup methodology to create a minimum viable product, the handbook encourages successive small wins that support a broader vision enabling one to, think big, start small, and learn fast. It's a unique take on design practice viewed through the lens of entrepreneurship and is designed to answer the questions all new business owners face, from the rote to the existential. Questions about: - Startup costs - Business models (old and new) - Marriage of business and design - Mindset - Branding & naming (exercises and ideas) - Internet marketing strategies - Passive income ideas - Setting your fee - Taxes - Standard Operating Procedures (SOPs) - Securing the work - Client relations - Software - Billing rates - Contracts Building a business isn't a singular act; it's a series of small steps. Using the outline found in Architect + Entrepreneur you can start today. The chapters are organized to guide you from idea to action. Rather than write a business plan you'll be challenged to craft a brand and you'll sell it using new technologies. Follow the guide sequentially and you'll have both the tools and a profitable small business.
