A Century of Scouting Badges Wan Meng Hao, At the first Boy Scout camp held by founder Robert Baden-Powell on Brownsea Island in 1907, the pioneer Boy Scouts were organised into four patrols and presented with a brass fleur-de-lis badge. They were then taught practical outdoor activities, such as knotting, tracking and camping, and tested on these skills. Upon passing the tests, each boy received a bronze badge in the shape of a scroll, featuring the words "Be Prepared". The fleur-de-lis badge would later become the Scout's membership badge, also known as Tenderfoot, while the scroll badge became the Second Class Scout badge. This book compiles various collections of badges over the past century, from Boy Scouts and Wolf Cubs to Rover/Venture Scouts and adult Scouters. It also contains the collections of related accessories such as hat plumes and medals, as well as information about the history of Scouting. Informative and extensive, *A Century of Scouting Badges* is required reading for anyone with an interest in the Scouting movement and its story. Reader Reviews: "I spent many happy years of my childhood and youth in the scout movement. Scouting taught me good values and how to be a good leader. I thank Meng Hao for this wonderful book on 100 years of scout badges." — Professor Tommy Koh, Ambassador-At-Large, Ministry of Foreign Affairs "Wan Meng Hao is to be congratulated on achieving a Scouting first for his country that has yet to equalled in our own. He has produced a systematic and comprehensive encyclopaedia of the badges and artefacts relating to Scouting in Singapore over a 100-year period, since its inception in 1907. (He starts with an illustration of a supposed replica of B-P's brass Brownsea badge). The book is a wonderful compendium of badges and other artefacts beautifully laid out and illustrated in full colour over 200 A4 pages with interesting and relevant text to tell the story. What makes this book of exceptional interest to our UK members is that up to the 1970s the Scout Association of Singapore relied on the UK Association for its badges and medals etc. The book covers all aspects and sections including WW2 and illustrates over 1,000 items, though it makes no claims to be a 'tick list'. Mr Wan uses his own collection and those of others to depict some very rare items, some of which I have never seen before, to lovingly tell the story of Scouting in his homeland. A wonderful example of what Scout Badge Collecting is all about!" — UK Scout Historian Colin Walker "After reading the first sample of this book, I was very moved! This book introduces Scouting badges, from the beginning of the movement more than one hundred years ago to today. The author introduces almost all the various identification badges carried on the uniforms of the Scout movement. When I look through the book, I can't help but marvel at the Scout

movement. There have been so many creators who have contributed rich treasures to the movement. I have also written books on the history and origins of Scouting, and deeply feel the difficulty of writing such books. I believe the author must have incomparable enthusiasm and loyalty to scouts. He would have needed to verify the many details—such as the year, location, and origins—information that cannot tolerate errors. A lot of data collection and interview work is required. Every time you see such a high-quality Scout information book, you can feel the hardships that the author has gone through. For all Scouting people and even those who just agree with the concept of Scouting, this book is a treasure trove of information that should not be missed.” — Ho Chung Keung, Hong Kong Scout Leader and writer “Scouting historian Wan Meng Hao’s impressive *A Century of Scouting Badges* is a labour of love, almost two decades in the making. Meng Hao’s encyclopaedic knowledge of and passion for Scouting has resulted in this excellent and invaluable contribution to the very limited literature on the Scouting Movement in Singapore and British Malaya. *A Century of Scouting Badges* weaves in the overarching story of how Scouting has evolved through the years and how the progressive and proficiency badge curriculum enables many scouts to challenge themselves in their Scouting pursuits, to learn useful skills, crafts, and hobbies, to grow in knowledge and understanding of the world around them, to imbibe values and perseverance, and to contribute to their communities in relevant and meaningful ways. The Scouting Movement’s badges and awards, so thoughtfully recorded in this work, reminds us of the importance of striving not for its own sake but as a means of learning by doing and giving for the greater good.” — Associate Professor Eugene Tan, Singapore Management University “This book is the result of Meng Hao’s journey in documenting scout badges. He explains succinctly the historical evolution of badges, and the book is replete with photo-illustration of badges and how some of these badges were worn. It will undoubtedly serve as a handy compendium for scout badges in Singapore.” — Associate Professor Yeo Kang Shua, Singapore University of Technology and Design

Foundation of Digital Badges and Micro-Credentials Dirk Ifenthaler, Nicole Bellin-Mularski, Dana-Kristin Mah, 2016-06-29 This edited volume provides insight into how digital badges may enhance formal, non-formal and informal education by focusing on technical design issues including organizational requirements, learning and instructional design, as well as deployment. It features current research exploring the theoretical foundation and empirical evidence of the utilization of digital badges as well as case studies that describe current practices and experiences in the use of digital badges for motivation, learning, and instruction in K-12, higher education, workplace learning, and further education settings.

Teaching with Digital Badges Kelsey O'Brien, Trudi E. Jacobson, 2018-09-15 Digital Badges are gaining traction in the education landscape, and librarians have been some of the leading pioneers at the forefront of this exciting new frontier. This book provides examples of how badges are being used to enhance and invigorate the teaching and assessment of information

literacy. Chapters provide inspiration for teaching librarians interested in: Providing an engaging experience for their students Gaining insight into this growing innovative technology trend Discovering how librarians are using badges to enhance their teaching Forming meaningful collaborations with faculty and teachers Developing knowledge about badge system design and badging platforms Learning how badges can motivate, support, and celebrate learning achievements Launching a badging project The book is divided into two sections. The first section explores the environment in which badges are being developed, in particular situating them within the current educational setting, and provides guidelines on how best to create a badging program. The second section details contributing authors' firsthand experiences creating, implementing, and refining digital badges and digital badging systems, in some cases collaborating with teachers and faculty. These chapters provide a wealth of ideas about using digital badges in academic and school libraries to engage and motivate students.

Transforming our World Through Design, Diversity and Education G. Craddock,C. Doran,L. McNutt,2018-10-18 Good design is enabling, and each and every one of us is a designer. Universal Design is widely recognized an important concept that should be incorporated in all person-centred policies. The United Nations Convention on the Rights of Persons with Disabilities (UNCRPD) clearly stipulates that the most effective way of delivering on the promise of an inclusive society is through a Universal Design approach. Sitting at the intersection of the fields of Higher Education and Universal Design, this

book presents papers delivered at the Universal Design and Higher Education in Transformation Congress (UDHEIT2018), held in Dublin, Ireland, from 30 October to 2 November 2018. This event brings together key experts from industry, education, and government and non-government organization sectors to share experiences and knowledge with all participants. The 86 papers included here are grouped under 17 headings, or themes, ranging from education and digital learning through healthcare to engagement with industry and urban design. Celebrating and integrating all that is good in design, diversity and education, this book will be a valuable resource for all those interested in the inspiring and empowering developments in both Universal Design and higher education.

Event Information Systems Markus Heuchert ,2021-04-15 Events are an essential element of society. Advancing digital technologies and the ongoing globalization has put forward a variety of different business, leisure, or scientific events that need to be managed in order to take place. As a result of the proliferation of digital technology, IT systems are an indispensable part of this management process. Amid this pandemic crisis, these systems have become increasingly important due to the relocation of events into the virtual sphere. Since every event entails different requirements, event management systems need to be very flexible. In contrast to other application systems, this flexibility is needed during use as the requirements of future events are not known during the initial selection and roll-out of the software. This calls for an intensified dialogue between the business and IT to match technical possibilities with practical requirements. Currently, adequate means to support this dialogue are lacking. To this end, this dissertation presents a reference model that encompasses the essential processes and data structures in the domain. In 36 application cases, the reference model is instantiated and evaluated. Practitioners and researchers are the intended audiences of this work. Researchers may use it as a foundation to design novel IT artifacts in the domain. Practitioners benefit from the first comprehensive tool to support the design and use of digital technology in event management.

Handbook of Research on Credential Innovations for Inclusive Pathways to Professions Huang, Yi,2021-09-24 With increasingly interconnected educational and employment ecosystems, credential innovations are trailblazing multiple pathways to professions at a pivotal moment of rapid change. In the current state of credential proliferation, the quest for simultaneous improvement of quality and value reflects heightened cross-sector interests, while at the same time the quest for concurrent enhancement of access and success remains. With the evolving educational models, technologies, and organizations, credential innovations will continue to serve as powerful catalysts in realizing the great promise for inclusive pathways to professions. The Handbook of Research on Credential Innovations for Inclusive Pathways to Professions surveys the state of credential innovations, examines trends and issues, and explores models and strategies with case studies across sectors and disciplines. The 21 chapters are organized in three sections. Section I, Credential Innovations Amid Evolving Ecosystems, features a powerful array of change theories-in-action with topics ranging from conceptual re-visioning to

organizational restructuring and programmatic reengineering within evolving ecosystems. Section II, Credential Innovations and Propositions Across Sectors, spotlights diverse approaches to and propositions of credentials within complex socio-economic landscapes across education, business, and technology industries. Section III, Credential Innovation Models and Strategies, showcases institutional innovations ranging from model developments, pedagogical approaches, and personalized engagements to outcome measurements and strategies for sustainable implementation. Lessons learned and implications are explored to share promising practices, inform current development, and influence future policies toward inclusive excellence in education and the workplace.

Digital Badges in Education Lin Y. Muilenburg, Zane L. Berge, 2016-03-22 In recent years, digital badging systems have become a credible means through which learners can establish portfolios and articulate knowledge and skills for both academic and professional settings. *Digital Badges in Education* provides the first comprehensive overview of this emerging tool. A digital badge is an online-based visual representation that uses detailed metadata to signify learners' specific achievements and credentials in a variety of subjects across K-12 classrooms, higher education, and workplace learning. Focusing on learning design, assessment, and concrete cases in various contexts, this book explores the necessary components of badging systems, their functions and value, and the possible problems they face. These twenty-five chapters illustrate a range of successful applications of digital badges to address a broad spectrum of learning challenges and to help readers formulate solutions during the development of their digital badges learning projects.

Beginning Dreamweaver MX Charles E. Brown,Imar Spaanjaars,Todd Marks,2004-08-18 What is this book about? With this book you'll quickly be creating powerful, dynamic web sites with Dreamweaver MX - the latest version of Macromedia's powerful, integrated web development and editing tool. You'll learn how to use the tools and features of Dreamweaver to construct three complete sites using HTML, JavaScript, Active Server Pages (ASP), and databases. We start by creating a hobbyist site - The Cooking Place - that you can use to list your favorite recipes, ingredients, and dishes. What does this book cover? As you build this site you'll learn how to use Dreamweaver MX to Plan, create, and set up a web site Add web pages to the site and edit their content Use Stylesheets and templates to create a consistent style across the site Use tables, frames, and layers to lay out web pages Add dynamic effects - like drop down menus - to web pages using JavaScript and DHTML Interact with users via forms on web pages Create dynamic ASP web pages to respond to user actions and input As you progress through the book, the sites you create become ever more ambitious. The second site you build is a fan site for soccer that provides information on upcoming events for fans around the world. As you build the second site you'll learn how to use Dreamweaver MX to: Add logic to your ASP pages, so that you can display different information to different users,

based on their location, or even the time of day Keep track of users as they move around the site, so that you can learn what parts of your site are the most popular Secure parts of the web site so that only authorized users are allowed to see sensitive information Personalize the web site for individual users - so that the site appears in the colors of the user's favorite team or so that the user only sees events in their home country Store and extract information about users and upcoming events in a database - and use this information to dynamically create web pages The final site in the book shows off many of the advanced features of Dreamweaver MX, as you walk through how to design a modular, extensible, and scalable site, and create a set of dynamic building blocks that can be quickly modified and reused in different sites. As you build this site - which is used to display a set of images that users can view and purchase - you'll learn how to use Dreamweaver MX to: Create a set of building blocks whose look and content is determined dynamically by the settings in a database Create a content management page that you can use to manage the database that stores information about the images on the site, including their title, price, and how they should be laid out Put the building blocks you created earlier to a variety of uses, including a news blogger, a media display, and a product display Use Dreamweaver Extensions to make our building blocks easy to reuse and to add e-commerce functionality to the site At the end of some of the chapters you'll find a series of suggested exercises from the author that are designed to test your understanding of what's been covered in the chapter as well as to encourage you to experiment with the features of Dreamweaver MX and to modify and extend the example applications. Who is this book for? This book is primarily for complete beginners to web site programming who have access to Dreamweaver MX and want to learn how to create dynamic web sites with it. But the book doubles as a comprehensive reference to the features of Dreamweaver MX, so it will also be a useful resource to more experienced web developers who want to learn how to use the latest version of Dreamweaver. As you work through the book, you'll learn how to program using Active Server Pages (ASP), but this will prove useful even if you eventually want to use Dreamweaver MX to create web sites with JavaServer Pages (JSP), ASP.NET, PHP, or ColdFusion MX. Programming in any of these languages is very similar in Dreamweaver MX, and the core concepts you learn in building web sites with ASP are applicable and easily transferred to other languages. To help, the book includes four appendices that provide fast paced guides on how to get started using JSP, ASP.NET, PHP, and ColdFusion MX with Dreamweaver MX. What do you need to use this book? To run the examples in this book on your computer you'll need: Dreamweaver MX Microsoft Windows 98, 98SE, 2000 or XP Professional If you don't have a copy of Dreamweaver MX you can download a 30-day evaluation edition from Macromedia at http://www.macromedia.com/software/trial_download/. The evaluation edition is fully-featured, and you'll be able to use it to work through all the examples in the book. If you have Microsoft Windows Me, Windows XP Home Edition, or a Macintosh you'll still be able to create all the examples in the book but to see them in action you'll need to use a remote server, as your operating system doesn't, by default, include a web server that can process ASP pages. Fortunately, getting access to an ASP

web host is easy -- there are dozens available. And to make things even easier, the book includes detailed information on how to set up a web application to use a remote server or web host.
