Slides for Students Gary D. Fisk, 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that. Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

Please Please the Bees Gerald Kelley, 2019-08-01 Benedict has a pretty sweet life for a bear. But all that changes when the bees go on strike.

Quicklet on Geoffrey A. Moore's Crossing the Chasm: Marketing and Selling High Tech Products to Mainstream Customers Richard Childers, 2012-04-04 ABOUT THE BOOK Since its first publication in 1991, Geoffrey Moore's Crossing the Chasm: Marketing and Selling High Tech Products to Mainstream Customers has set the standard for tech business moguls. In fact, it has become the standard for all of us trying to make our way in the confusing world of technology business. Moore argues that there is a chasm that exists between early adopters of a potentially disruptive technology product and what he calls the early majority, or the market segment that takes such a product to the upper ranges of success. Moore believes that early adopters and visionaries have very different expectations than the pragmatists that follow. In this book, he explores those differences and suggests specific techniques to successfully cross the chasm. These include choosing a target market, understanding the whole product concept, positioning the product, building a successful marketing strategy, and choosing

the most appropriate distribution channel and pricing. MEET THE AUTHOR Richard Childers is an experienced writer and a member of the Hyperink Team, which works hard to bring you high-quality, engaging, fun content. Happy reading! EXCERPT FROM THE BOOK Moores major thesis is that there is something wrong with the High Tech Marketing Model. There are gaps separating the major groups described in the Technology Adoption Life Cycle. These gaps represent the fact that any group will have a hard time accepting a new product if it is marketed to them in the same manner it was marketed to the group that preceded them. Each of these gaps is an opportunity for marketing to lose momentum and miss the transition to the next group. Two of these gaps are relatively small, what Moore calls cracks in the bell curve. The gap between innovators and early adopters occurs when a hot new technology product cannot be transitioned into a major new benefit. The enthusiast loves it for its architecture, but nobody can even figure out how to start using it. There is a second crack of similar size that exists between the early majority and the late majority. It comes at a time in the product life cycle when the market is well developed and the technology product is in the mainstream. While the early majority was quite willing and able to achieve the level of technical competence required to gain benefit from the product, the late majority user is much less so. In order to continue developing their market by moving into the late majority segment, the product marketers must make the product easier to use and implement. If they fail to do so, they may fail in their attempts to transition to this next segment. CHAPTER OUTLINE Quicklet on Geoffrey A.
