The Complete Guide to Using Google in Libraries Carol Smallwood, 2015-03-06 From the Forward by Michael Lesk: Google has now developed services far beyond text search. Google software will translate languages and support collaborative writing. The chapters in this book look at many Google services, from music to finance, and describe how they can be used by students and other library users. Going beyond information resources, there are now successful collaboration services available from Google and others. You can make conference calls with video and shared screens using Google Hangouts, Writing documents with small numbers of colleagues often involved delays while each author in sequence took over the writing and made edits. Today Google Docs enables multiple people to edit the same document at once. An ingenious use of color lets each participant watch in real time as the other participants edit, and keeps track of who is doing what. If the goal is to create a website rather than to write a report, Google Sites is now one of the most popular platforms. Google is also involved in social networking, with services such as Google+ Other tools view social developments over time and space. The Google Trends service, for example, will show you when and where people are searching for topics. Not surprisingly, searches for “swimwear” peak in June and searches for “snowmobile” peak in January. The Complete Guide to Using Google in Libraries, Volume 2: Research, User Applications, and Networking has 30 chapters divided into four parts: Research, User Applications, Networking, Searching. The contributors are practitioners who use the services they write about and they provide how-to advice that will help public, school, academic, and special librarians; library consultants, LIS

faculty and students, and technology professionals.

Libraries Supporting Online Learning Christina D. Mune,2020-10-07 Using practical examples from librarians in the field, this book lays out current issues in online learning and teaches librarians how to adapt a variety of library services—including instruction, reference, and collection development—to online education. Recent studies highlighting the challenges faced by online learners show that skills librarians are uniquely qualified to teach, such as information and digital literacy and source evaluation, can improve academic performance in online courses and enhance the online learning experience. Just as embedded librarianship was developed to answer the needs of online courses when they emerged in the early 2000s, online learning librarian Christina Mune now teaches online librarianship as a set of realistic strategies for serving a variety of online education models. Each chapter of *Libraries Supporting Online Learning* addresses a different strategy for supporting online students and/or faculty, with all strategies derived from real-world practices. Librarians will find information on best practices for creating digital literacy tutorials and dynamic content, providing patrons with open access and open educational resources, helping patrons to avoid copyright issues, promoting peer-to-peer learning and resource sharing, posting to social media, and developing scalable reference services. The tools and practical examples in this book will be useful for all educators interested in increasing the efficacy of online learning.

sites faced with small budgets and staff can find it intimidating to redesign or create a website from scratch. Concerns over resources make coding and designing (or hiring someone to do so) daunting and expensive. It does not have to be so. Content creation is inescapable when making a website, but designing and constructing a unique website can be as simple as taking an afternoon to use a color chart to pick a color scheme and paste in text from a Word document. All of the tools discussed in the book are free at the base level, and some offer upgrade packages with even more features. The advice and techniques are all created with an eye to making websites work for smaller institutions with limited budgets and timeframes. Every museum professional has come across issues when adapting general software for an institution's specific needs, and the information in this book will anticipate some of these needs by offering easy-to-implement workarounds and information on related software or services that integrate with each website. Using Digital Portfolios to Develop Students' Writing Ricky Lam, Benjamin Luke Moorhouse, 2022-11-07 This book equips pre-service teachers, research postgraduate students, teacher educators, and language specialists with specific knowledge and skills about the principles, research, and applications of digital portfolios within the EFL writing contexts. While most digital portfolio scholarship focuses on higher education, this book targets primary-level and secondary-level school audiences, namely pre-service teachers, teacher educators, and Ministry of Education staff members with a focus on EFL writing. The rationale behind this design is that the published literature on digital portfolios tends to be generic and one-size-fits-all; there has been scant published scholarship about the development of digital portfolio literacy among teachers and pupils, which could enable them to upgrade the teaching and learning of writing in a larger EFL environment. This volume fills this gap by illustrating the why, what, and how aspects of digital portfolios in ten reader-friendly chapters. Guiding educators to enrich their pedagogical repertoire via the portfolio approach, this book emphasises a healthy balance between principles, research, and practice. It is an easy-to-follow guide to setting up digital portfolio systems and coaching pupils to improve writing, ensuring the dissemination of digital portfolios with high fidelity.

Creating a Web site can be a great way to market a new product, promote your business plan, promote yourself, or simply share a few details about your life with the world. You will learn why information is the most valuable asset on the market and how you can become an expert in a niche of your choosing, making money to cover any fees associated with your Web site.
