**Bills of Lading** Sir Richard Aikens, Richard Lord QC, Michael Bools QC, 2015-12-22 Bills of Lading form an essential part of the carriage of goods by sea and international trade. Their multi-functional nature, together with the large volume of case law and regulation, make the law in this field as complex as it is commercially vital. This bestselling book provides a detailed analysis of the law and practice applicable to bills of lading before, during and after shipment, helping today's busy practitioner to quickly and easily find the information they need. This book has been fully revised and updated with all of the major developments since its first edition, including: Reference to increasingly important Singapore and Far-Eastern decisions An analysis of modern developments in seaworthiness, from vetting and approval clauses to the topical issues of vulnerability and piracy attacks Detailed examination of misdelivery, fraudulent or forged bills of lading, and delivery without production of a bill of lading Revised coverage of conflicts and procedural matters, including anti-suit injunctions, jurisdiction battles and the scope of arbitration Reference to relevant European law relating to issues of jurisdiction and procedure Comprehensive treatment of Switched bills, transshipment, house bills, deck carriage and container cargo New material on the practical implications of electronic bills of lading This text continues to provide an indispensable reference for maritime practitioners and institutions worldwide.

*E-bills of Lading Contracts in Global Transportation* Georgios I. Zekos, 2018 Transportation facilities are a necessary part of a country's infrastructure. Efficient traveling and transportation of production and consumption goods are necessary requirements for competent trading within and across states. Transport networks are at the heart of the supply chain and are the foundation of any country's economy by permitting goods to be distributed effectively and people to travel. Transport is a foundation of the European integration procedure and is firmly correlated to the formation and completion of the internal market, sponsoring jobs and economic growth. Conventionally, the document comprising the contract of carriage is either a charter party or a bill of lading, depending on the way in which the vessel has been employed. Other documents in the form of a multimodal/combined bill of lading may be issued as well. These two forms of contracts are discernible. A bill of lading is a contract with regard to the cargo, whereas a charter party is a contract concerning the vessel. Ocean bills of lading have an

inherent value as security to banks that finance the sale of the underlying cargo or the documents themselves, and they enable their lawful holders to sell the cargo while in transit by transfer of the document. The key obstacles in the employment of paperless bills of lading and other transportation documents take account of the laws insistence on paper-based documentation, written signatures, and out of date transport and secured transaction laws. The bill of lading is the used document by shippers, carriers, and banks, and so is an indispensable part of the set of documents needed in documenting the operation. Customarily the transaction documents consist of, inter alia, the bill of lading, the marine insurance policy, and the commercial invoice, each of which epitomizes components of the contracts of carriage, insurance, and sale. The significance of maritime documents is confirmed by the fact that some eighty percent of total commodities are transported globally by sea. A bill of lading has commonly been said to have three characteristics: 1) A contract for the carriage of the goods; 2) an acknowledgement of their receipt; and 3) documentary evidence of the title. The bill of lading is a commercial document. Nevertheless, there is an uncertainty and dispute about its contractual nature.

*Bills of Lading in Export Trade* Charles Debattista, 2009 concise, well-argued answers...extremely useful addition to the armoury of practitioner and academic alike... Cambridge Law Journal The new third edition of Professor Charles Debattista's well-respected book takes a unique look at the sale of goods carried by sea under bills of lading It looks at the document as an instrument of international trade, concentrating on the different things that sellers, buyers and banks want out of bills of lading. It also looks at the practical and legal problems which arise when the sale, carriage and letter of credit contracts do not agree on what the bill of lading should look like Fundamental developments covered Since the last edition several cases

have come to the English courts re-examining fundamental practical problems with bills of lading- \* Must a straight bill of lading be presented for delivery of goods> \* When can a carrier clause a bill Does the letter of credit help in identifying the carrier under a bill of lading? **Ocean Bills of Lading** A. Athanassios N. Yiannopoulos,1995-01-01 The main thrust of this volume is the use of electronic bills of lading in lieu of the traditional documents. The advantages of electronic bills of lading are many, including

lower cost, higher efficiency, improved security, and speedier delivery of goods at the end of the voyage (the collection of reports focus upon bills of lading for the international carriage of goods by sea). According to the contributors, the use of electronic bills of lading is, essentially, a business rather than a legal decision. The law may provide the legal framework for the function of electronic bills of lading in the same way and with the same effects as the traditional bills of lading. However, business interests will eventually determine whether the availability of, and the economic incentives for, the use of the electronic bills of lading outweigh concerns for privacy and the safeguarding of trade secrets, for accuracy of information, and for security transactions and acquisition. Such concerns call for technological rather than legal solutions. This book should appeal primarily to practitioners who are interested in economics and commerce.
