**The Terrorist Image** Charlie Winter, 2022-04-22 The summer of 2014—when the Islamic State seized Mosul, Iraq's second city; captured vast swathes of eastern Syria; and declared itself a latter-day Caliphate—marked a turning point in the history of photography, one that pushed its already contested relationship with reality to its very limits. Uniquely obsessed with narrative, image management and branding, the Islamic State used cameras as weapons in its formative years as a Caliphate. The tens of thousands of propaganda photographs captured during this time were used to denote policy, to navigate through defeat and, perhaps most importantly, to construct an impossible reality: a totalising image-world of Salafi-Jihadist symbols and myths. Based on a deep examination of the 20,000 photographs Charlie Winter collected from the Islamic State's covert networks online in 2017, this book explores the process by which the Caliphate shook the foundations of modern war photography. Focusing on the period in which it was at its strongest, Winter identifies the implicit value systems that underpinned the Caliphate's ideological appeal, and evaluates its uniquely malign contribution to the history of the photographic image. *The Terrorist Image* travels to the heart of what made the Islamic State tick during its prime, providing unique insights into its global appeal and mobilisation successes.

**About to Die** Barbie Zelizer,2010-12-01 Due to its ability to freeze a moment in time, the photo is a uniquely powerful

device for ordering and understanding the world. But when an image depicts complex, ambiguous, or controversial events--terrorist attacks, wars, political assassinations--its ability to influence perception can prove deeply unsettling. Are we really seeing the world as it is or is the image a fabrication or projection? How do a photo's content and form shape a viewer's impressions? What do such images contribute to historical memory? *About to Die* focuses on one emotionally charged category of news photograph--depictions of individuals who are facing imminent death--as a prism for addressing such vital questions. Tracking events as wide-ranging as the 1906 San Francisco Earthquake, the Holocaust, the Vietnam War, and 9/11, Barbie Zelizer demonstrates that modes of journalistic depiction and the power of the image are immense cultural forces that are still far from understood. Through a survey of a century of photojournalism, including close analysis of over sixty photos, *About to Die* provides a framework and vocabulary for understanding the news imagery that so profoundly shapes our view of the world.

This volume is distinctive for addressing the complicated relations between the interdisciplinary narrative turn in the academy and the contemporary boom of instrumental storytelling in the public sphere. The scholars collected here explore new theories of causality, experientiality, and fictionality; challenge normative modes of storytelling; and offer polemical accounts of narrative fiction, nonfiction, and video games. Drawing upon the latest research in areas from cognitive sciences to complexity theory, the volume provides an accessible entry point for those new to the myriad applications of narrative theory and a point of departure for new scholarship.
