Sunderland, Industrial Giant Marie Gardiner,2017-11-24 Sunderland was once one of Britain's industrial giants. Famous for its shipyards, mines and glass-making, it thrived at a time when its country needed it most. After the Second World War the town saw incredible change, as the heavy industry that seemed so permanent, faded and died. How do you cope with the loss of centuries of working tradition? These are the stories of the people who worked through this evolution, watched their town change around them and become a city - the people who saw the end of one era and the beginning of a challenging new one.

A Northern Lad Graham Sutcliffe, 2014-09-03 This is the story of a child of the post war baby boom growing up in those far off non-PC days of the fifties and early sixties. The scene is a northern textile town, a town thrown up by the industrial revolution. A town whose seemingly permanent way of life was about to vanish for ever, as the post imperial world arrived. The book ends as the author leaves, tantalisingly close to that threatened day of reckoning that would see the place change forever. He would never return as anything more than a casual visitor. The tale is told tongue in cheek. It pokes fun at much and embroiders much, rather than keeping to the strict facts and figures. In this way school teachers and the like are often

described rather unkindly and their pupils are mostly shown as awkward and uncouth. This is definitely not a story of the swinging sixties; this is about a northern town where the mini-skirt wouldn't appear until long after Londoners abandoned it.

The Story of the Selma Voting Rights Marches in Photographs David Aretha, 2014-01-01 The Civil Rights Act of 1964 was a momentous victory for civil rights activists, but one major obstacle remained in the path toward equal rights for African Americans: the right to vote. In the South, segregationists prevented African Americans from voting. Civil rights leaders believed it was time for strong action and chose Selma, Alabama, as the rallying point. There, the marches and protests captured the nation's attention. Through gripping primary source photographs, author David Aretha explores this important time in American history.

Working at Writing Robert L. Root, 1991 A survey of the composing processes of seven working writers--columnist/essayists Jim Fitzgerald and Kathleen Stocking, political columnists Tom Wicker and Richard Reeves, drama critic Walter Kerr, and film critics David Denby and Neal Gabler--Working at Writing offers rich and unique insights into how writing is actually done. The book has three interlocking elements: edited transcripts of interviews with the writers about their composing processes and the composition of specific works, copies of the works discussed in the transcripts, and a series of chapters that analyze the interviews and articles in the context of current research into composing. Through this unusual structure, Root investigates both the ways in which the working practices of the seven writers relate to one another and to current models of composing and the ways in which such a discussion will be of value to others, particularly to student writers and their teachers. By considering the comments of practicing writers and the examples of their compositions and by comparing the evidence of research findings with those examples of practical experience, Root gives student writers--and their teachers as well--the opportunity to better understand the paradigms that govern their own composing and to confirm, modify, abandon, or replace them. The final chapter discusses the implications of these professionals' experience for those who hope to become working writers. Stressing the importance of assiduous string-saving, immersion in context, regular composition, the rhetorical situation, and the writer's understanding of his or her own process, Root suggests both what separates the novice from the expert and how novices can apply the insights of this book as they work at their own writing.
