*Winning the Contractor Fight* Tom Reber, 2021-09-14 The Contractor Fight is what HGTV host and best-selling author Tom Reber calls the battle between your ears. We all have stories and experiences that have formed us into who we are. We are what we think, and the battleground is our mind. The Fight is not with the people you think are cheap customers. It's not with the unlicensed competitors or the illegals, as many contractors think. The Fight is with yourself. Sadly, most of the struggles contractors have are self-imposed. It's friendly fire. The negative ways we think about ourselves and our worth... friendly fire. The growing debt, working too much, small bank account... friendly fire. Winning the Fight is a choice. You're noble and full of integrity. You bend over backward to serve your family and clients. You have taken it on the chin more times than you can count. Now, it's time to get yours. Earn what you're worth. Create a business that serves you and energizes you, instead of one that beats you down. Choose to own your crap and get better today.

**Construction Forms for Contractors** Karen Mitchell, Craig Savage, 2010 A CD-ROM with the forms in RTF, PDF and Excel formats to customize for your own use.

**Teacher Learning and Leadership** Ann Lieberman, Carol Campbell, Anna Yashkina, 2016-08-25 Teacher Learning and Leadership asserts that teachers should be put at the center of creating, developing, organizing, implementing, and sharing their own ideas for school change rather than being passive recipients of knowledge from the outside. It argues that there is tremendous potential for the good of students and the professionalization of teaching, when teachers work collaboratively to develop their own and their colleagues' professional knowledge and practices and are supported by school and system leaders, unions and government. The book draws on the groundbreaking work of the Teacher Learning and Leadership Program in Ontario and uses an in-depth case study to illustrate its points. It demonstrates how professional development built around collaboration, teacher leadership, curriculum development, technology and pedagogy can be organized in a way that redistributes control and responsibility to teachers, thereby instilling a genuine sense of pride and accomplishment in their work. This book is a sincere outreach from the authors who advocate for the professional development of, by and for teachers as individuals and, importantly, as a collective profession. The authors argue that projects like the TLLP (a joint initiative between the Ontario Ministry of Education and the Ontario Teachers' Federation) can radically, and positively, transform teachers' knowledge, skills and practices. The book provides an important model for school change led by

teachers, rather than experts, in partnership with school and system leaders and is a fascinating read for all those concerned with teaching, teacher development and educational change.

**Markup & Profit** Michael Stone,1999-01-01 In order to succeed in a construction business you have to be able to mark up the price of your jobs to cover overhead expenses and make a decent profit. The problem is how much to mark it up. You don't want to lose jobs because you charge too much, and you don't want to work for free because you've charged too little. If you know how much to mark up you can apply it to your job costs and arrive at the right sales price for your work. This book gives you the background and the calculations necessary to easily figure the markup that is right for your business. Includes a CD-ROM with forms and checklists for your use.

*Definitions of Art* Stephen Davies,2018-08-06 In the last thirty years, work in analytic philosophy of art has flourished, and it has given rise to considerably controversy. Stephen Davies describes and analyzes the definition of art as it has been discussed in Anglo-American philosophy during this period and, in the process, introduces his own perspective on ways in which we should reorient our thinking. Davies conceives of the debate as revealing two basic, conflicting approaches—the functional and the procedural—to the questions of whether art can be defined, and if so, how. As the author sees it, the functionalist believes that an object is a work of art only if it performs a particular function (usually, that of providing a rewarding aesthetic experience). By contrast the proceduralist believes that something is an artwork only if it has been created according to certain rules and procedures. Davies attempts to demonstrate the fruitfulness of viewing the debate in terms of this framework, and he develops new arguments against both points of view—although he is more critical of functional than of procedural definitions. Because it has generated so much of the recent literature, Davies starts his analysis with a discussion of Morris Weitz's germinal paper, *The Role of Theory in Aesthetics*. He goes on to examine other important works by Arthur Danto, George Dickie, and Ben Tilghman and develops in his critiques original arguments on such matters of the artificiality of artworks and the relevance of artists' intentions.

**English Arts & Crafts Furniture** Nancy R. Hiller,2018-06-26 Arts & Crafts has come to be a name for a style of decorative arts, but just try to pin it down. It's a huge challenge, because it encompasses such a broad variety of work. Early pieces, such as some of those by William Morris, draw from more ornate Victorian artifacts. Contrast these with the simpler, medieval-inspired work of Morris, the austere elegance of chairs and built-in cabinetry by Voysey, or furniture produced by

the Barnsleys--never mind the clear Art Nouveau influences in much of Mackintosh's work. It quickly becomes clear just how broad this period in design history really is. English Arts & Crafts Furniture explores the Arts & Crafts movement with a unique perspective on furniture designs inspired by English Arts & Crafts designers. Through examination of details and techniques as well as projects, you'll learn what sets English Arts & Crafts apart and gain a deeper understanding of the overall Arts & Crafts movement and its influences. In this book you'll find:

- Insight into the history and culture surrounding the Arts & Crafts movement
- An examination of influences that set English Arts & Crafts designers including William Morris, Charles Francis Annesley Voysey, Ernest Gimson, Ernest and Sidney Barnsley, and Charles Robert Ashbee apart from their American counterparts
- 3 complete furniture projects that illustrate traits representative of English Arts & Crafts: a Voysey chair, a hayrake table designed by Ernest Gimson and a sideboard design from the Harris Lebus company, England's largest furniture maker at the time

Equal parts design survey and project book, English Arts & Crafts Furniture is a must-read for any serious fan of Arts & Crafts furniture.

**Models of Proposal Planning & Writing** Jeremy T. Miner, Kelly C. Ball-Stahl, 2016-05-09 This book is an essential weapon for anyone looking for funding in the extremely competitive grantseeking world. It explains how and why to approach both public and private sponsors with not just information, but persuasion, for the best chance for success. How do you present the right balance of logic, emotion, and relationship-awareness to make a persuasive proposal? What is THE most important thing to do before submitting a proposal to increase your odds for funding success? What portion of the proposal must be stressed even when it has a low point value assigned to it in the reviewer's evaluation form? How can a site visit make or break the fate of a meticulously prepared application? Models of Proposal Planning & Writing: Second Edition answers all these critical questions and more for grantseekers, documenting how to write a proposal that will persuade a sponsor to invest in your projects and organization—and just as importantly, explaining why a properly persuasive application puts forth a seamless argument that stands the test of reason, addresses psychological concerns, and connects your project to the values of the sponsor. The book's comprehensive annotations provide practical information that walks readers step-by-step through a logical, integrated process of planning and writing persuasive proposals.

**A Guide for Leaders in Higher Education** Brent D. Ruben,Richard De Lisi,Ralph A. Gigliotti,2023-07-03 FIRST EDITION SPECIAL RECOGNITION:Winner of the 2018 Sue DeWine Distinguished Scholarly Book Award, National Communication Association, Applied Communication Division REVIEWS OF THE FIRST EDITION“The book provides frameworks and resources that would be highly relevant for new and aspiring department chairs. In fact, this text is ideally designed to serve as a selection for a book discussion group.”—The Department Chair“Succeeds in providing accessible and useful resources to individuals across different leadership roles... As a midpoint between textbook and reference work, it is successful at both and provides a clear and unbiased background to issues facing current leaders.”—Reflective TeachingDuring a time of unprecedented challenges facing higher education, the need for effective leadership - for informal and formal leaders across the organization - has never been more imperative.Since publication of the first edition, the environment for higher education has become more critical and complex. Whether facing falling enrollments, questions of economic sustainability, the changing composition of the faculty and student bodies, differential retention and graduation rates, declining public confidence in the enterprise, or the rise in the use of virtual technologies - not to mention how COVID-19 and an intensified focus on long standing issues of racial and gender representation and equity have impacted institutions and challenged many long-standing assumptions - it is clear that learning on the job no longer suffices. Leadership development in higher education has become essential for advancing institutional effectiveness, which is the focus of this book.Taking into account the imperative issues of diversity, inclusion, and belonging, and the context of institutional mission and culture, this book centers on developing capacities for designing and implementing plans, strategies, and structures; connecting and engaging with colleagues and students; and communicating and collaborating with external constituencies in order to shape decisions and policies. It highlights the need to think broadly about the purposes of higher education and the dynamics of organizational excellence, and to apply these insights effectively in goal setting, planning and change leadership, outcomes assessment, addressing crises, and continuous improvement at both the level of the individual and organization.The concepts and tools in this book are equally valuable for faculty and staff leaders, whether in formal leadership roles, such as deans, chairs, or directors of institutes, committees, or task forces, or those who perform informal leadership functions within their departments, disciplines, or institutions. It can be used as a professional guide, a textbook in graduate courses, or as a resource in leadership training and development programs. Each chapter concludes with a series of case studies and guiding questions.

Designing Architecture Andrew Pressman,2012-05-04 Designing Architecture is an indispensable tool to assist both

students and young architects in formulating an idea, transforming it into a building, and making effective design decisions. This book promotes integrative and critical thinking in the preliminary design of buildings to inspire creativity, innovation, and design excellence. This compendium of individual wisdom and collective experience offers explicit guidance to students and young professionals on how to approach, analyze, and execute specific tasks; develop and refine a process to facilitate the best possible design projects; and create meaningful architectural form. Here the design process – from orchestrating client participation to finalizing schematic design – is explored and illuminated. The following material is presented to make the book a useful didactic tool for professional development: explicit strategies for doing design rather than simply reviewing principles and precedents creative ideas in approaching and framing problems in design terms specific methods to translate ideas to culturally significant, socially responsive, and environmentally sensitive buildings techniques to integrate all levels of cognition from analysis to epiphany counsel on developing a personalized process for engaging design projects case studies augment the text and chronicle fascinating applications of the design process. The essence of this book lies in an integrated and holistic approach to each unique project as well as fostering curiosity and exploration – a departure from algorithms, easy generalities, or a formula for design. *Designing Architecture* will inspire readers to elevate the quality of preliminary designs and unravel some of the mystery of creating the most beautiful, responsive, and responsible architectural design possible.

**The Management of Construction: A Project Lifecycle Approach** F.
