HLM50+ Towards a Social Architecture Tony Monk,2017-07-06 Since its sudden and dramatic formation upon winning the competition to design Paisley Civic Centre in 1963, Hutchison, Locke and Monk (HLM Architects) has consistently served and adapted to the changing requirements of Britain's welfare state, and has instinctively dedicated its professional services to community architecture. Conceived from the perspective of founding partner Tony Monk, this book reveals the inside story of how the partnership has grown over 50 years to become a leading UK national practice. It sets out the early influences and progressive design philosophy of HLM Architects and analyses how they developed their design ethos from late-modern through contextual post-modern architectural styles by the early 1980s, and then matured into producing its own contemporary designs, explaining why these changes took place over that period. As well as reflecting the transformations in the social and political landscapes and in aesthetic approaches, it also inevitably records the changing social history of the architectural profession from labour-intensive manual presentations using drafting pens and drawing boards, through to the slick mass-produced computer modelling that accompanied the digital revolution, and the fundamental adjustments needed

to meet the realities of managing an efficient modern commercial business. Working with the HLM Board, the authoritative contributors are Directors who have used their knowledge and experience in responding to government legislation with innovative architectural solutions in their specialist fields. HLM Chairman Christopher Liddle is a leading exponent of defence and custodial procurement, alongside Caroline Buckingham in education and Leslie Welch in healthcare. Their award winning projects now help formulate current policy. The critical Introduction by Dr Edward Denison re-examines the practice's philosophy and contribution to the evolving welfare state during the second half of the twentieth century. The conclusion is a perceptive assessment of the future direction of the architectural profession and a statement of HLM's continuing commitment to improving our society. The complex relationships described shed new light on previous architectural theories and, in doing so, this book adds to the knowledge of post-war British architecture.

Special Edition Using Microsoft Office 2007 Ed Bott, Woody Leonhard, 2006-12-22 Special Edition Using Microsoft® Office 2007 THE ONLY OFFICE BOOK YOU NEED We crafted this book to grow with you, providing the reference material you need as you move toward Office proficiency and use of more advanced features. If you buy only one book on Office 2007, Special Edition Using Microsoft® Office 2007 is the only book you need. If you own a copy of Office 2007, you deserve a copy of this book! Although this book is aimed at the Office veteran, Ed and Woody's engaging style will appeal to beginners, too. Written in clear, plain English, readers will feel as though they are learning from real humans and not Microsoft clones. Sprinkled with a wry sense of humor and an amazing depth of field, this book most certainly isn't your run-of-the-mill computer book. You should expect plenty of hands-on guidance and deep but accessible reference material. This isn't your Dad's Office! For the first time in a decade, Microsoft has rolled out an all-new user interface. Menus? Gone. Toolbars? Gone. For the core programs in the Office family, you now interact with the program using the Ribbon—an oversize strip of icons and commands, organized into multiple tabs, that takes over the top of each program's interface. If your muscles have memorized Office menus, you'll have to unlearn a lot of old habits for this version.

Programming and Problem Solving with Visual Basic .NET Nell B. Dale, 2003 This book continues to reflect our experience that topics once considered too advanced can be taught in the first course. The text addresses metalanguages explicitly as the formal means of specifying programming language syntax.
