Slides for Students Gary D. Fisk,2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that.Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

Sweating Bullets Robert Gaskins,2012-04-20 PowerPoint was the first presentation software designed for Macintosh and Windows, received the first venture capital investment ever made by Apple, then became the first significant acquisition ever made by Microsoft, who set up a new Graphics Business Unit in Silicon Valley to develop it further. Now, twenty-five years later, PowerPoint is installed on more than one billion computers, worldwide. In this book, Robert Gaskins (who invented the idea, managed its design and development, and then headed the new Microsoft group) tells the story of its first years, recounting the perils and disasters narrowly evaded as a startup, dissecting the complexities of being the first distant development group in Microsoft, and explaining decisions and insights that enabled PowerPoint to become a lasting success well beyond its original business uses.

The Breakaways Cathy G. Johnson,2019-03-05 Quiet, sensitive Faith starts middle school already worrying about how she will fit in. To her surprise, Amanda, a popular eighth grader, convinces her to join the school soccer team, the Bloodhounds. Having never played soccer in her life, Faith ends up on the C team, a ragtag group that's way better at drama than at teamwork. Although they are awful at soccer, Faith and her teammates soon form a bond both on and off the soccer field that challenges their notions of loyalty, identity, friendship, and unity. The Breakaways from Cathy G. Johnson is a raw, and beautifully honest graphic novel that looks into the lives of a diverse and defiantly independent group of kids learning to make room for themselves in the world.

He empowers them to evolve and improve on old, standard, teaching methods. Disclosing Church Clare Watkins, 2020-03-05 From 2006 to 2011 researchers at Heythrop College and the Oxford Centre for ecclesiology and Practical Theology (OxCEPT, Ripon College Cuddesdon) worked on a theological and action research project: Action Research - Church and Society (ARCS). 2010 saw the publication of Talking About God in Practice: Theological Action research and Practical Theology (SCM), which presented in an accessible way the work of ARCS and its developing methodology. This turned out to be a landmark study in the praxis of Anglican and Catholic ecclesiology in the

UK, showing how theology in these differing contexts interacted with the way in which clergy and congregations lived out their religious convictions. This book is a direct follow up to that significant work, authored by one of the original researchers, providing a systematic analysis of the impact of the theological action research methodology and its implications for a contemporary ecclesiology. The book presents an ecclesiology generated from church practice, drawing on scholarship in the field as well as the results of the theological action research undertaken. It achieves this by including real scenarios alongside the academic discourse. This combination allows the author to tease out the complex relationship between the theory and the reality of church. Addressing the need for a more developed theological and methodological account of the ARCS project, this is a book that will be of interest to scholars interested not only Western lived religion, but ecclesiology and theology more generally too.
