*FIDIC - A Guide for Practitioners* Axel-Volkmar Jaeger, Götz-Sebastian Hök, 2009-11-11 In 1999, a suite of three new conditions of contract was published by FIDIC, following the basic structure and wording harmonised and updated around the previous FIDIC Design-Build and Turnkey Contract (the 1992 "Orange Book"). These conditions, known as the "FIDIC rainbow, were the Conditions of Contract for: 1 Construction, the so-called Red Book, for works designed by the Employer 1 Plant and Design-Build, the so-called Yellow Book, for works designed by the Contractor 1 EPC/Turnkey Projects, the so-called Silver Book, for works designed by the Contractor The first is intended for construction works where the Employer is responsible for the design, as for per the previous so-called Red Book 4th Edition (1987), with an important role for the Engineer. The other two conditions of contract are intended for situations when the Contractor is responsible for the design. The Plant and Design-Build Contract has the traditional Engineer while the EPC/Turnkey Contract has a two-party arrangement, generally with an Employer's Representative as one of the parties.

*Building Contract Claims* David Chappell, Vincent Powell-Smith, John H. M. Sims, 2008-04-15 Many building contract claims are ill-founded, often because the basic principles are misunderstood. This highly regarded book examines the legal basis of claims for additional payment, and what can and cannot be claimed under the main forms of contract. It includes chapters dealing with direct loss and expense, liquidated damages, extension of time, concurrency, acceleration, time at large, common law and contractual claims, global claims, heads of claim and their substantiation. The new fourth edition has been

substantially restructured and updated. Nearly 100 additional cases have been added as well as four new contracts: the JCT Construction Management and Major Project contracts, the JCT Standard Form of Domestic Subcontract, and the Engineering and Construction Contract (the NEC Form). The book continues to use the JCT Standard Form (JCT 98) as the basis of the text, with important differences highlighted in the other forms. Seventeen forms are dealt with and they have all been updated since the last edition of this book. Getting to Grips with BIM James Harty, Tahar Kouider, Graham Paterson, 2015-12-14

With the UK government's 2016 BIM threshold approaching, support for small organisations on interpreting, filtering and applying BIM protocols and standards is urgently required. Many small UK construction industry supply chain firms are uncertain about what Level 2 BIM involves and are unsure about taking first steps towards having BIM capability. As digitisation, increasingly impacts on work practices, Getting to Grips with BIM offers an insight into an industry in change supplemented by practical guidance on

managing the transition towards more widespread and integrated use of digital tools to manage the design, construction and whole life use of buildings.

*Building Lean, Building BIM* Rafael Sacks, Samuel Korb, Ronen Barak, 2017-12-06 Building Lean, Building BIM is the essential guide for any construction company that wants to implement Lean Construction and Building Information Modelling (BIM) to gain a strategic edge over their competition. The first of its kind, the book outlines the principles of Lean, the functionality of BIM, and the interactions between the two, illustrating them through the story of how Tidhar Construction has implemented Lean Construction and BIM in a concerted effort over four years. Tidhar is a small-to-medium-sized construction company that pioneered a way of working that gave it a profit margin unheard of in its market. The company's story serves as a case study for explanation of the various facets of Lean Construction and BIM. Each chapter defines a principle of Lean and/or BIM, describes the achievements and failures in Tidhar's implementation based on the experiences of the key people involved, and reviews the relevant background and theory. The implementation at Tidhar has not been a pure success, but by examining their motives alongside their achievements and failures, readers will learn about what pitfalls and pinnacles to expect. A number of chapters also compare the experience of Tidhar with those of other companies who are leaders in their fields, such as Skanska and DPR. This book is highly relevant and useful to a wide range of readers from the construction industry, especially those who are frustrated with the inefficiencies in their companies and construction projects. It is also essential reading for Lean and BIM enthusiasts, researchers and students from a variety of industries and backgrounds.

*Purchasing and Supply Chain Management* W. C. Benton, 2010 This text outlines the most current methods in purchasing and supply chain management. Real case studies and exercises help students transform purchasing theory into purchasing practice and implementation. Topics include purchasing business processes, price cost analysis, professional services, and healthcare purchasing.

Alternative Clauses to Standard Construction Contracts Nick Jones, S. Gregory Joy, Eugene J. Heady, 2009-01-01 In recent years, there have been many changes to the construction industry's standard form contracts, including the American Institute of Architects (AIA) and Engineer Joint Contract Documents Committee (EJCDC) documents. Additionally, a new family of contract documents, known as Consensus DOCS was created by agreement among various construction contractor, subcontractor, owner, and surety trade associations Alternative Clauses to Standard Construction Contracts, Third Edition provides instant access to amendments to AIA, AGC, EJCDC and Consensus DOCS for owners, architects and contractors. This unique resource covers all major documents in use throughout the construction industry and enables you to compare

between the different documents. It delivers practice-proven amendments clause-by-clause. It tells you specifically what to insert and delete in order to reach the ends your client desires. And it goes so deep, it even covers contractors amendments for agreements with subcontractors. While it is absolutely essential to stay current with these standard agreements, it is imperative that everyone involved in negotiating and drafting construction contracts also have access to practice-proven modifications that strengthen the language on behalf of clients. If the other parties to your agreement have access to this book--and you don't--you're placed at a significant disadvantage every step of the way. Let the experts from Smith, Currie & Hancock provide you with invaluable support when negotiating or drafting construction contracts.
