Curating the Digital David England,Thecla Schiphorst,Nick Bryan-Kinns,2016-06-01 This book combines work from curators, digital artists, human computer interaction researchers and computer scientists to examine the mutual benefits and challenges posed when working together to support digital art works in their many forms. In Curating the Digital we explore how we can work together to make space for art and interaction. We look at the various challenges such as the dynamic nature of our media, the problems posed in preserving digital art works and the thorny problems of how we assess and measure audience's reactions to interactive digital work. Curating the Digital is an outcome of a multi-disciplinary workshop that took place at SICHI2014 in Toronto. The participants from the workshop reflected on the theme of Curating the Digital via a series of presentations and rapid prototyping exercises to develop a catalogue for the future digital art gallery. The results produce a variety of insights both around the theory and philosophy of curating digital works, and also around the practical and technical possibilities and challenges. We present these complimentary chapters so that other researchers and practitioners in related fields will find motivation and imagination for their own work.

THE SYSTEM IS THE SOLUTION Nick Cohenmeyer,2023-08-10 There is a Solution to the Disorder in your Personal and Business Life. One of the reasons for this book is because of my experiences in the military where I learned how applying a systematic approach to a task, commonly through some kind of SOP (standard operating procedure), ensures that a level of consistent deliverable is achieved, maintained, and incrementally improved over years of iterations. I used to wonder whether a systematic approach could be useful in other areas of my life outside of the military. Seven years later, I've found that not only is this answer YES, but it is hard for me to identify any area of my life that has NOT been profoundly improved through a rough initial implementation of a systems approach, followed by an incremental and automatic refinement. Key tenets of this book: I will bet you the price of this book that there is at least one aspect of your life that you want to change. Maybe it's your professional or physical performance, your sleep quality, or your cluttered room, garage, or mind. I am writing this book for no other reason than to share what I believe is the secret to improvement in almost any area of life. The secret can be encapsulated in one word: system. Why do systems work? The answer is simple: The reason systems work is because the opposite of a good system is chaos. Whatever you want to improve can be enhanced by using a baseline system. Here's why: A baseline system is a way to start from somewhere and through incremental refinement, to retain what is working and jettison what is no longer working. Chaos is where haphazard inputs yield unpredictable and inconsistent outcomes. Of course, just because a solution is simple doesn't mean the solution will be easy. Fortunately, this book is the condensation of many costly experiments in what works and what doesn't work, so that you can embrace the former and avoid the latter, and condense years of my time into just a few hours of your time. If you want to start fixing the problems

with your fitness, your relationships, your businesses, and your focus, you will be challenged to find a better use of your time than spending it reading this book or listening to it if you purchased the audiobook format.

Shariah Investment Agreement Syed Adam Alhabshi,Abbas Mirakhor,Haji Mohd. Na'im Haji Mokhtar,Syed Othman Alhabshi,2021-02-08 Risk-sharing investment is currently the buzz word in Islamic finance. However, there is an incongruence in applying multilayered and opaque Tijarah contracts for investment purposes. This has contributed to the divergence between Shariah and Common Law and caused tremendous problems and systemic legal risks to Islamic finance. The authors of Shariah Investment Agreement introduce a legal tool in the form of a Shariah Investment Agreement carefully drafted to ensure that it is Shariah-compliant and can be applied in Common Law jurisdictions as well, so as to allow for the execution of risk-sharing investment in Islamic finance. It details the building blocks and key considerations that must be noted when drafting such agreements so the investor and investee will know what to expect when entering into such a contract. Proper implementation of the Shariah Investment Agreement will pave a clear route to a harmonious convergence between Shariah and Common Law and lead to Islamic finance developing further to become a stronger, unstoppable force in the finance industry.

Mini Grid Solutions for Underserved Customers Bernard Tenenbaum,Chris Greacen,Ashish Shrestha,2024-03-06 TRaditionally, mini grids have been viewed as "off-grid†? systems that are built and operated solely for communities without

electricity. The reality, however, is that millions of people in Sub-Saharan Africa and India who are connected to the main grid suffer from poor grid reliability ("weak grid†?), sometimes with a power supply of less than 4 to 8 hours daily and with frequent disputes over the accuracy of billing. As a backstop, these poorly served customers often find themselves forced to rely on small fossil fuel†"powered generators that are noisy, polluting, and expensive to operate. Mini Grid Solutions for Underserved Customers: New Insights from Nigeria and India explores another option: undergrid mini grids. These are mostly solar hybrid†"powered mini grids built and operated by private companies in areas already connected with the main electricity grid but facing poor technical and commercial service. This comprehensive book examines how undergrid mini grids can create win-win-win outcomes for retail customers, distribution enterprises, and mini grid developers. Drawing on extensive discussions with pioneering developers, the book showcases detailed case studies from Nigeria and India, shedding light on the challenges and opportunities of interconnected and non-interconnected undergrid mini grids. The authors address technical issues of grid interconnection and delve into the policy and regulatory considerations crucial for the financial sustainability and success of undergrid mini grids. The book is an invaluable resource for policy makers, energy practitioners, and researchers seeking practical insights to bridge the electricity access gap, empower communities with reliable and affordable electricity, and drive environmentally and commercially sustainable development. • "The report is rich with insight, not least because the authors have been able to contrast the Nigeria and India approaches taken by the respective private sectors in each country. The five case studies are very valuable. The authors have powerfully illustrated the importance of the policy and regulatory framework and how that translates into investor behavior.†? — Mohua Mukherjee, Senior Research Fellow, Oxford Institute of Energy Studies • "This great report represents a pivotal turning point in the history of energy and has global implications for the role of mini grids for communities that have been poorly served by main grid utilities.†? — Peter Lilienthal, Founder HOMER Energy • "This is a tremendous addition to the literature on mini grids and an important guide for all of us practitioners working in this area.†? — James Sherwood, Director of Research & Innovation, RMI | Global South Program • "This refreshingly honest and open report provides an excellent overview of interconnected and isolated mini grids, as well as a thorough analysis of key ground-level implementation issues in regulation, business, and engineering.†? — Joanis Holzigel, Chief Operating Officer, INENSUS

Tyson,2023-07-03 There has been enormous growth in faculty-led short-term study abroad programs because they offer flexibility and expand opportunities for students and faculty members who wish to study and work abroad but do not have the resources or time to spend a semester or year away. These experiential programs offer unique opportunities for university faculty to teach their disciplines abroad while engaging students in direct, authentic cultural encounters for transformative change.This volume provides a detailed framework and guidance on how to plan and implement a faculty-led study abroad program. Seasoned faculty leaders and administrators describe an overall program development process, comprehensively identify the elements for designing the curriculum, and offer advice and solutions to unique challenges inherent in various types of programs. The contributors cover the logistics for managing program details at home and abroad provide advice on writing a university proposal, creating a budget, the marketing and recruitment of students, handling abroad logistics, and preparing students for the abroad experience – all illustrated by examples drawn from their experiences. Most importantly, readers will come to understand the difference between experiences that are more touristic than scholarly and gain guidance on designing or redesigning their own programs to ensure academically sound, culturally-relevant curricula that complements the international field site.The opening section sets the scene by describing the overall process of designing and delivering faculty-led abroad programs, from conception to implementation. The core of the book is grounded in evidence-based research for designing international curricula and syllabi, and includes five case studies illustrating short term programs focused on interdisciplinary subject matter, field study, global service learning, internship immersion, and language and cultural study. This practical guide concludes with faculty activities critical to a program's success: marketing and recruiting students; preparing teaching events for before, during, and after the abroad experience; and formulating a plan to leave a small footprint abroad. This book constitutes a handbook for college and university professors who plan to or already conduct short-term study abroad

The IT4ITTM Standard, Version 3.0 The Open Group,2022-12-14 This publication is the specification of The Open Group IT4IT Standard, Version 3.0, a standard of The Open Group. It describes a reference architecture that can be used to manage the business of Information Technology (IT) and the associated end-to-end lifecycle management of Digital Products. It is intended to provide a prescriptive Target Architecture and clear guidance for the transformation of existing technology management practices for a faster, scalable, automated, and practical approach to deploying product-based investment models and providing an unprecedented level of operational control and measurable value. This foundational IT4IT Reference Architecture is independent of specific technologies, vendors, organization structures, process models, and methodologies. It can be mapped to any existing technology landscape. It is flexible enough to accommodate the continuing evolution of operational and management paradigms for technology. It addresses every Digital Product lifecycle phase from investment decision-making to end-of-life. The IT4IT Standard addresses a critical gap in the Digital Transformation toolkit: the need for a unifying architectural model that describes and connects the capabilities, value streams, functions, and operational data needed to manage a Digital Product Portfolio at scale. The IT4IT Standard provides an approach to making digital investment decisions and managing digital outcomes that is particularly useful for: • C-level executives responsible for Digital Transformation, as a top-down view of digital value creation • Product Managers and Product Marketing Managers whose portfolios include significant digital content, as a way to integrate marketing priorities with product delivery practices • Governance, risk, and compliance practitioners, as a guide to controlling a modern digital landscape • Enterprise and IT Architects, as a template for IT tool rationalization and for governing end-to-end technology management architectures • Technology buyers, as the basis for Requests for Information (RFIs) and Requests for Proposals (RFPs) and as a template for evaluating product completeness • Consultants and assessors, as a guide for evaluating current practice against a well-defined standard • Technology vendors, as a guide for product design and customer integrations • Technical support staff, as a guide for automating and scaling up support services to deal with modern technology deployment velocity
