Old School Simple Krish Sailam,2013-07-04 Krish Sailam takes a macro-level view of how technology is potentially slowing down small business. There are too many game changers and too much noise from experts, and there is not enough time in the day to keep up with every new technology that comes out. You have a business to run, and it is my job to save you time and more importantly money with your technology decisions. Old School Simple helps you find a starting point. Old School Simple explores three main themes: • How to decide if a technology is relevant to your business and will increase revenue or decrease costs. • How to create goals around implementing technology. • How to create actionable metrics to measure your success. The point of the book is that if you had a choice to spend \$1000 a month on technology that you didn't fully understand or didn't have time for, versus \$1000 a month making your core product better, the decision to invest in your product is always a better bet. But if you have to implement a new technology, I want you as a business owner to define

a goal, and a metric. The book provides guides on finding technology help, defining tangible goals, and measuring your success. Talk to any expert in SEO, social media, paid search, or app development and they will all agree it is nearly a full-time job to stay on top of new technology every day. As a small business owner, your core job is to create amazing products and services. Not to know every new technology that comes out. If you do find a technology that is relevant to your business and your customers are asking for it, Old School Simple gives you guidance to find technology and creative help. Old School Simple is not a book to learn about Facebook, Twitter, or the latest social network. It is a book about finding connections between your revenue model and these new technologies. The chapters are rich with examples, diagrams, sample guides, and quick summaries. Hopefully, it becomes a book you love to share with and recommend to other small business owners. I would love to ask you, my customer, for feedback on how I can make this book better and what other formats you would like to see it in. Please let me know how you implemented or tested these techniques within your own business. Email me at krish@absolutevariety.com. Most people are too afraid to ask for feedback, but I have to stay true to my book. Things can always improve, I just need to know what my customer wants. Does the book come up short in any areas? Do the examples need more or less fleshing out? Would you like to submit your small business experience as an example? Any and all feedback is much appreciated. I see this as a living project that will continue to evolve over time, though the basic principles will stay the same. Technology must support the core revenue stream, not just take up time. Thanks for purchasing and recommending my book.

Contracting for Services in State and Local Government Agencies William Sims Curry,2008-11-05 The First Complete Contracting Reference/ Textbook for State and Local Agencies Federal contracting officials have a comprehensive resource in the Federal Acquisition Regulations (FAR) to guide them through the arduous contracting process; however, until now there has been no such counterpart for state and local government agencies. Contracting for Services in State and Local Government Agencies is the first reference book of its kind specifically designed to provide state and local administrators with a concise authoritative resource on contracting for services. Draws from the best features of existing RFPs and contracts nationwide In preparation for writing this book, author William Sims Curry contacted all 50 state governments, as well a large selection of city and county governments, and asked them to participate in the development of templates for Requests for Proposals (RFPs) and service contracts. These agencies were asked to complete a questionnaire and provide copies of their RFP and service contract templates. Out of their contributions, the best features from each were incorporated into the Best Practices RFP and Service Contract, which are presented here in this volume. The templates can be readily downloaded from an included CD-ROM. These can be fully adapted to meet any specific need. In the text, both of these documents are examined, line by line, with the author explaining specific language choices. Guides you through the contracting process, step-by-step In addition to these model documents, additional techniques and tools are introduced to assist agencies in improving their services contracting programs. The book is presented in the sequence of the contracting cycle, beginning with advance contract planning and proceeding to pre-solicitation, solicitation, proposal evaluation,

negotiation, and award through contract administration and closeout. By adopting the techniques in this book, state and local agencies will be able to effectively contract for services, get the best price available, and get important jobs done on time.

Government Contracting William Sims Curry,2010-04-27 A guidebook through the minefield of government contracting and procurement, *Government Contracting: Promises and Perils* describes the dangerous practices commonly applied in the

development and management of government contracts and provides advice for avoiding the sort of errors that might compromise their ability to protect the public interest. It includes strategies for increasing profits for government contractors, rather than incurring burdensome costs, through compliance with government mandated subcontracting and financial management systems. Drawing from his indepth investigation of government agencies across the country, the author examines present-day scenarios that regularly lead public servants and government committees to manage contracts with tools that are less than optimal and to select contractors that may not be the best qualified. He then delineates practical processes, contracting documents, and contract management tools to mitigate detrimental outcomes and alternative approaches to supplant the imperfect methodologies. The author includes a CD-ROM with the book that provides a number of practical tools that you can apply as well as examples of contracts and templates that are the best he discovered during his research. The book also outlines an approach for performing advance contract planning, conducting contract negotiations, and administering contracts useful when planning for the management of the contracting process throughout the contracting cycle, negotiating a contract that protects the interest of all contracting parties, and ensuring successful contractor performance. The book includes a Government Procurement Corruption Wall of Shame that illustrates the myriad perils and stumbling blocks such as conflicts of interest, duplicity, favoritism, incompetence, kickbacks, and protests that government workers fall prey to.. Filled with best practices that protect you from nefarious, amateurish, and criminal mistakes that frequently lead to difficulties with harsh consequences, the book does not end its coverage with discussions of corruption, mismanagement, and ineptitude, but provides practical processes and strategies to diminish the negative impacts from these government contracting perils.

Department of Energy and Climate Change: Electricity market Reform: Consultation on Proposals for Implementation - Cm. 8706 Great Britain: Department of Energy and Climate Change,2013-10-10 This consultation document seeks views on proposals for implementing the key mechanisms under electricity market reform (EMR) - the Contracts for Difference (CfDs), the Capacity Market, and associated institutional and delivery arrangements. A package of draft secondary legislation is included to help illustrate the proposals. EMR is the Government's response to the challenges facing the electricity sector: a fifth of 2011 capacity has to close over the next ten years; the need to transform the generation mix to respond to climate change and to meet legally-binding carbon and renewable targets; the expectation that electricity demand will continue to increase over the coming decades. An estimated £110 billion investment is required over the next 10 years. CfDs will provide long-term revenue stabilisation to low-carbon plant, allowing investment to come forward at a lower cost of capital. The Capacity Market will provide a regular retainer payment to reliable forms of capacity (both demand and supply side), in return for such capacity being available when electricity supply is being squeezed. The National Grid will be the delivery body for EMR. The key mechanisms will be supported by: carbon price floor, a tax underpinning the price of carbon emissions in the UK; emissions performance standard, a regulatory backstop to the amount of CO2 emissions from new fossil-fuel power stations; action to promote electricity demand reduction; Ofgem's measures to improve wholesale market liquidity. The Energy Bill currently progressing through Parliament will introduce the powers to implement EMR.
