Dear Data Giorgia Lupi,Stefanie Posavec,2016-09-13 *Equal parts mail art, data visualization, and affectionate correspondence, Dear Data celebrates the infinitesimal, incomplete, imperfect, yet exquisitely human details of life, in the words of Maria Popova (Brain Pickings), who introduces this charming and graphically powerful book. For one year, Giorgia Lupi, an Italian living in New York, and Stefanie Posavec, an American in London, mapped the particulars of their daily lives as a series of hand-drawn postcards they exchanged via mail weekly—small portraits as full of emotion as they are data, both mundane and magical. Dear Data reproduces in pinpoint detail the full year's set of cards, front and back, providing a remarkable portrait of two artists connected by their attention to the details of their lives—including complaints, distractions, phone addictions, physical contact, and desires. These details illuminate the lives of two remarkable young women and also inspire us to map our own lives, including specific suggestions on what data to draw and how. A captivating and unique book for designers, artists, correspondents, friends, and lovers everywhere.*

Grant, Bocconi University, author of Contemporary Strategy Analysis In a complex, fast changing world, where we are bombarded by words, numbers and reports, the visual-first approach to strategy provided by Strategy Builder is immensely helpful for inspiring and communicating a clearer vision of how to move forward. -- Rachna

Bhasin, VP Strategy, SiriusXM At last someone has grasped this idea and come up with a way to help us demonstrate strategic plans and ambitions in a creative new way. --Vikki Heywood CBE, Chair of The Royal Society for the Arts This wonderful book is the first to solve a near-universal problem: communicating strategic ideas is just as hard and just as important as coming up with them in the first place, and both are visual activities. The question is not "Do you understand?" but "Do you see?" --William Duggan, Professor, Columbia University, author Strategic Intuition This book shows how to draw an organization's strategy so you see what's been considered, what's not been considered, and how things are related,. Strategy building is presented as a fun and involving learning process. The approach is revolutionary in that it enables not only the development but also the easy sharing of strategic understanding. --Roger L.M. Dunbar, Emeritus Professor, Stern School of Business, New York University What a great idea! They layout is also really thoughtful; it makes you immediately want to get out a pencil and start doodling. --Adam Martin, Customer Solutions Director, The Brakes Group As a time pressed executive it was a delight to find a book that I can dip into to find the best strategic frameworks - those that have proved the test of time and academic scrutiny as being truly useful in the workplace. Even better for an inveterate scribbler: endorsement that a picture and 'permission to play' with ideas visually really does say a thousand words and more! --Sarah Mitson, Global Business Director, TNSGlobal This is an invaluable resource for any executive wanting to improve engagement in strategy development and communication. The accessible layout means that the book itself can play an active and inspiring role in strategy discussions. --Matt Thomas, Director, Braxton Associates, Strategy Consultants At last a book that grasps the implications of recent psychology: people think visually as well as verbally. The authors provide powerful visual devices that will both help managers conceive better strategies and enable their people to execute them more effectively. --Richard Whittington, Professor at Saïd Business School, Oxford University A powerful approach to make strategy more engaging again! Strategy Builder is landmark book is destined to make an important impact to the field of strategy, strategizing and strategic management. Executives across the board (and students of strategy) will find the core message of this book counterintuitive and compelling. The idea of drawing strategy may seem like child's play, yet all great strategists and philosophers know that it is through such serious play that allows us to see things differently so that we can see different things. --Robert Wright, Professor of Strategy, Hong Kong Polytechnic University
