Lean UX Jeff Gothelf, Josh Seiden, 2016-09-12 UX design has traditionally been deliverables-based. Wireframes, site maps, flow diagrams, content inventories, taxonomies, mockups helped define the practice in its infancy. Over time, however, this deliverables-heavy process has put UX designers in the deliverables business. Many are now measured and compensated for the depth and breadth of their deliverables instead of the quality and success of the experiences they design. Designers have become documentation subject matter experts, known for the quality of the documents they create instead of the end-state experiences being designed and developed. So what's to be done? This practical book provides a roadmap and set of practices and principles that will help you keep your focus on the the experience back, rather than the deliverables. Get a tactical understanding of how to successfully integrate Lean and UX/Design; Find new material on business modeling and outcomes to help teams work more strategically; Delve into the new chapter on experiment design and Take advantage of updated examples and case studies.

The Geomantic Year Richard Leviton, 2006-11 The spiritual world blesses the Earth at least 58 times a year-here's how you can join the party. Do you think folklore customs about solstices and equinoxes and other regular celebration days are quaint holdovers from the past? Not so. Do you sometimes wish there were a way to include the entire planet in a meditation practice? There is, and it's called the geomantic year. At least 58 times a year the spiritual world-angels, archangels, Ascended Masters, Star-Angels, even the Supreme Being-tunes in to the Earth, blesses, and even heals it in real-time day-long events. Our planet is constantly receiving input from the cosmos and heavenly realms. It's all part of a rhythmic maintenance calendar in which the Earth is enlivened, and all of humanity is invited to participate. This book shows you how. What kinds of events? On Epiphany, January 6, the Christ focuses on the planet to birth his Light. On Bifrost Paints the Planet, April 10, the Great Bear constellation envelopes the Earth in 14 rays of light. On Michaelmas, September 29, the Archangel Michael cleanses the Earth's sacred sites and all their plumbing. Other events in the geomantic year involve stars, Nature Spirits, holy mountains, River-gods, Pleiadians, Hollow Earth dwellers, Grail Kings, volcano spirits, the Great Mother, and much more. The Geomantic Year documents 58 festival dates that focus on the Earth through its sacred sites, and it provides 58 simple meditations to help you participate. And it offers 12 informative essays linking Earth energies with hot

topics such as the Illuminati and world control, parallel universes, the world's gold supply, the Ghost Dance, the Fall of Man, Earth and climate changes, and the apocalyptic year 2012. Why not get out your appointment book and pencil in a few dates: the Earth's expecting you!

Cyclopean Richard Leviton, 2020-12-20 A TEAM OF GEOMANCERS PROBE MEGALITHIC SITES FOR THE TRUE STORY OF THE GIANTS AND CYCLOPES OF MYTH AND THEIR RELEVANCE FOR TODAY Seasoned Boston book editor Edward Burbage vividly records the adventures of himself and two colleagues as they participate in the final dissolution of an old enemy of humanity, the healing of an antique wound, and the restoration of an equally old mythic but real figure. The pursuit of these goals takes them all over the planet, starting off in England but traveling to France, Spain, Ireland, Sicily, Greece, Turkey, Peru, the United States, and finishing in the South Island of New Zealand on the top of a formidable snow-capped peak. The story is a myth-living evocation of many of the key themes of Western mythology, such as the Wounded Fisher King, the Dolorous Stroke, the grim Wasteland, the bright Avalon of the Summer Country, the numinous Castle of the Holy

Grail, the Grail Knights who dedicate their lives to questing for the holy object, and the lingering, intriguing tales of Cyclopes, the one-eyed giants of humanity's deep past, credited with building the world's megalithic features. The story takes place in the ultra-modern setting of 2090 as they chase the possible reality and significance of Cyclopes for current times. Burbage and his companions couldn't have better helpers. They're tutored by an angelic order called the Elohim, humanity's godparents, prime benefactors, and, it turns out, the fabled Cyclopes. They've preserved a heavenly sword for humanity, and that's the centerpiece of the whole affair. The ending of the reign of domination by humanity's perpetual enemy—Ahriman, also known as the Antichrist, all-time liar, destroyer, and champion “bad guy” of the world. Burbage's team needs this sword because the outcome of these encounters affects the next phase of Earth's scripted destiny—the rehabilitation of humanity's alignment with the intended design of reality.

Your Technology Outreach Adventure Erin Berman, 2018-12-20 From straightforward internet access to elaborate makerspaces, libraries have taken center stage when it comes to providing free access to technology to those who visit their physical spaces. But how about people who don't walk into a library? How do we ensure those members of the community are also being reached by technology programming? It's time to launch an adventure! Berman, named an ALA Emerging Leader and Library Journal Mover & Shaker, provides readers with a comprehensive plan for creating and implementing successful technology-based outreach. She also teaches readers design thinking skills that can enable library staff to become creative problem solvers. Sharing the methods and experiences of her team at San José Public Library, Berman's guide presents numerous real-world case studies, including videomaking in a skate park, e-readers for seniors, popup mobile makerspaces, and simple circuits in middle school, that will inspire readers to move technology beyond the walls of the library; offers dozens of design thinking exercises, such as rapid prototyping, empathy mapping, and logic models, as part of a start-to-finish model for developing a new program concept; discusses the origins of and reasons behind the digital divide, then shares outreach fundamentals and best practices that will help ensure success; and provides information about ways to connect with the community, perform evaluation, offer STEM programming, and additional resources. This guide will empower libraries to design and prototype technology-based outreach ideas safely, quickly, and with confidence, leading to better service for all members of the community.

The Power of the 2 x 2 Matrix Alex Lowy, Phil Hood, 2011-03-23 By studying the work of hundreds of the most original and effective business minds, the authors present a common architecture that illuminates exceptional analysis and creative performance. 2 x 2 Thinking is characterized by a fundamental appreciation for the dynamic and complex nature of business. The best strategists go out of their way to tackle dilemmas rather than merely solve problems. They use opposition, creative tension, iteration and transcendence to get to the heart of issues and involve critical others in finding the best solutions. The authors demonstrate how to apply the 2 x 2 approach to a wide range of important business challenges.
