Organizational Models for Industry 4.0 Mantas Vilkas, Jurga Duobienė, Rimantas Rauleckas, Aušra Rūtelionė, Beata Šeinauskienė, 2022-10-19 This book draws on a neo-institutional theory to characterize service-oriented manufacturing firms in relation to more familiar organizational forms, such as lean and agile. It sheds light on whether being lean is a prerequisite for agile organizations and whether agile organizations are precursors of service-oriented organizations. The book empirically examines the prevalence of such organizations using representative samples of manufacturing firms in an industrialized country. This approach makes it possible to “zoom in” and determine whether the extent of adoption of digital manufacturing innovations, digital services, and service-oriented business models varies with organizations’ size, industry, product complexity, lot size, type of design process, and type of manufacturing process. In turn, it shows which digital manufacturing innovations, lean practices, and services contribute to leanness-related performance capabilities like quality and costs; agility-related capabilities like fast delivery, flexibility and innovation; and service-oriented capabilities like high service performance and digitalization. In addition, it explores the question of whether lean, agile, and service-oriented performance capabilities contribute to financial performance separately or jointly.

Data at Work Jorge Camões,2016-04-08 Information visualization is a language. Like any language, it can be used for multiple purposes. A poem, a novel, and an essay all share the same language, but each one has its own set of rules. The same is true with information visualization: a product manager, statistician, and graphic designer each approach visualization from different perspectives. Data at Work was written with you, the spreadsheet user, in mind. This book will teach you how to think about and organize data in ways that directly relate to your work, using the skills you already have. In other words, you don't need to be a graphic designer to create functional, elegant charts: this book will show you how. Although all of the examples in this book were created in Microsoft Excel, this is not a book about how to use Excel. Data at

Work will help you to know which type of chart to use and how to format it, regardless of which spreadsheet application you use and whether or not you have any design experience. In this book, you'll learn how to extract, clean, and transform data; sort data points to identify patterns and detect outliers; and understand how and when to use a variety of data visualizations including bar charts, slope charts, strip charts, scatter plots, bubble charts, boxplots, and more. Because this book is not a manual, it never specifies the steps required to make a chart, but the relevant charts will be available online for you to download, with brief explanations of how they were created.

Vietnam International Monetary Fund. Institute for Capacity Development, 2023-09-29 This technical assistance (TA) report presents the outcomes of the scoping mission of a new TA project aimed at building capacity in macroeconomic analysis and forecasting in the Ministry of Planning and Investment (MPI). The MPI is establishing a Core Working Group (CWG) under MPI's coordination that will carry out macroeconomic analysis using Macroeconomic Projection Tool (MPT) and integrate the results in the policy making process. Based on the mission's finding and assessment, the mission team and the authorities agreed on a three-year TA action plan that includes training components during the early stage of the project. During Phase 1 (2023-24), the activities would focus on developing and operating the Macro-Framework Foundation Tool (MFT) and the Public Debt Dynamics Tool (DDT) to produce macroeconomic analysis and forecasting. Depending on progress, the MPT could be enhanced during Phase 2 (2025-26) and the tentative plan is to develop Comprehensive Adaptive Expectation Model (CAEM). The CWG will take the lead in implementing the activities and targets identified in the TA action plan and will be supported by the IMF TA team.
