**The Art & Science of Learning Design** Marcelo Maina,Brock Craft,Yishay Mor,2015-07-21 We live in an era defined by a wealth of open and readily available information, and the accelerated evolution of social, mobile and creative technologies. The provision of knowledge, once a primary role of educators, is now devolved to an immense web of free and readily accessible sources. Consequently, educators need to redefine their role not just “from sage on the stage to guide on the side” but, as more and more voices insist, as “designers for learning”. The call for such a repositioning of educators is heard from leaders in the field of technology-enhanced learning (TEL) and resonates well with the growing culture of design-based research in Education. However, it is still struggling to find a foothold in educational practice. We contend that the root causes of this discrepancy are the lack of articulation of design practices and methods, along with a shortage of tools and representations to support such practices, a lack of a culture of teacher-as-designer among practitioners, and insufficient theoretical development. The Art and Science of Learning Design (ASLD) explores the frameworks, methods, and tools available for teachers, technologists and researchers interested in designing for learning Learning Design theories arising from findings of research are explored, drawing upon research and practitioner experiences. It then surveys current trends in the practices, methods, and methodologies of Learning Design. Highlighting the translation of theory into practice, this book showcases some of the latest tools that support the learning design process itself.

Machine Learning Applications in Electronic Design Automation Haoxing Ren,Jiang Hu,2023-01-01 This book serves as a single-source reference to key machine learning (ML) applications and methods in digital and analog design and verification. Experts from academia and industry cover a wide range of the latest research on ML applications in electronic design automation (EDA), including analysis and optimization of digital design, analysis and optimization of analog design, as well as functional verification, FPGA and system level designs, design for manufacturing (DFM), and design space exploration. The authors also cover key ML methods such as classical ML, deep learning models such as convolutional neural networks (CNNs), graph neural networks (GNNs), generative adversarial networks (GANs) and optimization methods such as reinforcement learning (RL) and Bayesian optimization (BO). All of these topics are valuable to chip designers and EDA developers and researchers working in digital and analog designs and verification.

*Electronic Design Automation Frameworks* Tom Rhyne,1992 Many of the advances achieved in framework technology during the last five years are reported in this volume. However, despite acknowledged developments and an enormous investment by the Computer-Aided Design (CAD) vendor industry and others, commercial framework products have been slow to appear on the market. Further, those which have appeared, have largely failed to meet original targets, whether in terms of scope or performance or both. Reaching a consensus on new international standards has been a painfully slow process, with rapid advances in technology often rendering new standards out of date even before their eventual appearance. A motivation for agreement on technical issues, not yet fully understood or researched, will be vital if a commercial basis to underpin future development is to be achieved. It is hoped this book will stimulate interchange between researchers, developers and users so that practical progress can be made, backed by the strong support of interested industries.

**Mobile Marketing** Daniel Rowles,2017-02-03 Mobile Marketing is a clear, practical guide to harnessing the mobile consumer and tackling the rising challenges of divided user attention across multiple screens at the same time. It demystifies the vast spectrum of tools and techniques now available and explains how to optimize these dynamics into an innovative and effective mobile marketing strategy. Now that website search rankings take into account mobile optimization, no serious marketer can do without a thorough understanding of mobile. The first edition of Mobile Marketing won the Judge's Choice Award in Social Media at the Small Business Trend's 2014 Book Awards. This fully revised 2nd edition includes straightforward explanations on mobile optimized content, app development, social media and proximity based marketing. It has also expanded to include two brand new chapters on mobile and email and on location-based devices, plus cutting-edge updates on advances in wearable technology, mobile payments, virtual reality and strategies for the changing user journey. Integrated with tactical checklists, easy application frameworks and powerful case study insights such as Heineken, WordPress, MailChimp, Nike Training Club (NTC), Google Play and Moz, it provides a full overview from service provision and technology integration to content strategy, ready to capture fast-moving consumers on the go. Online resources include a digital marketing instructors manual, supporting lecture slides, example exam and self-test questions, and a content calendar template.

*Rapid Instructional Design* George M. Piskurich,2015-01-20 The classic guide to instructional design, fully updated for the new ways we learn Rapid Instructional Design is the industry standard guide to creating effective instructional materials, providing no-nonsense practicality rather than theory-driven text. Beginning with a look at what instructional design really

means, readers are guided step-by-step through the ADDIE model to explore techniques for analysis, design, development, intervention, and evaluation. This new third edition has been updated to cover new applications, technologies, and concepts, and includes many new templates, real-life examples, and additional instructor materials. Instruction delivery has expanded rapidly in the nine years since the second edition's publication, and this update covers all the major advances in the field. The major instructional models are expanded to apply to e-learning, MOOCs, mobile learning, and social network-based learning. Informal learning and communities of practice are examined, as well. Instructional design is the systematic process by which instructional materials are designed, developed, and delivered. Designers must determine the learner's current state and needs, define the end goals of the instruction, and create an intervention to assist in the transition. This book is a complete guide to the process, helping readers design efficient, effective materials. Learn the ins and outs of the ADDIE model Discover shortcuts for rapid design Design for e-learning, Millennials, and MOOCs Investigate methods for emerging avenues of instruction This book does exactly what a well-designed course should do, providing relevant guidance for anyone who wants to know how to apply good instructional design. Eminently practical and fully up-to-date, Rapid Instructional Design is the one-stop guide to more effective instruction.

**Event Structures in Linguistic Form and Interpretation** Johannes Dölling, Tatjana Heyde-Zybatow, Martin Schäfer, 2013-12-06 This volume addresses the problem of how language expresses conceptual information on event structures and how such information can be reconstructed in the interpretation process. The papers present important new insights into recent semantic and syntactic research on the topic. The volume deals with the following problems in detail: event structure and syntactic construction, event structure and modification, event structure and plurality, event structure and temporal relation, event structure and situation aspect, and event structure and language ontology. Importantly, the topic is discussed not only on the basis of English and German but on the basis of other languages including Mandarin, Japanese, Korean, Indonesian, and Igbo as well. This volume thus provides solid evidence towards clarifying the empirical use of event based analyses.
