**Sideways Stories From Wayside School** Louis Sachar, 2021-08-05 Meet the delightfully eccentric and unusually gifted pupils of Wayside School in this instalment of the brilliantly quirky Wayside School series – from Louis Sachar, author of the bestselling novel *Holes* As recommended on Radio 4 Kids Book Club, August 2024 There has been a terrible mistake. Instead of having thirty classrooms side by side, Wayside School is thirty storeys high! (The builder said he was sorry.) Perhaps that's why all sorts of strange and unusual things keep happening – especially in Mrs Jewls's classroom on the very top floor. There's the terrifying Mrs Gorf, who gets an unusually fruity comeuppance; Terrible Todd, who always gets sent home early; and Mauricia, who has a strange ice-cream addiction. Meanwhile, John can only read upside down, and Leslie is determined to sell her own toes. From top to bottom, Wayside is packed with quirky and hilarious characters who are all brought to life in this new edition with delightful illustrations by Aleksei Bitskoff throughout. This is an unmissable, irrepressible story of mixed-up mayhem from Louis Sachar, the bestselling author of *Holes*.

The Craft of Research, 2nd edition Wayne C. Booth, Gregory G. Colomb, Joseph M. Williams, 2008-04-15 Since 1995, more than 150,000 students and researchers have turned to *The Craft of Research* for clear and helpful guidance on how to conduct research and report it effectively. Now, master teachers Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams present a completely revised and updated version of their classic handbook. Like its predecessor, this new edition reflects the way researchers actually work: in a complex circuit of thinking, writing, revising, and rethinking. It shows how each part of this process influences the others and how a successful research report is an orchestrated conversation between a researcher and a reader. Along with many other topics, *The Craft of Research* explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of thoughtful yet critical readers and to respond to them appropriately; and how to create introductions and conclusions that answer that most demanding question, So what? Celebrated by reviewers for its logic and clarity, this popular book retains its five-part structure. Part 1 provides an orientation to the research process and begins the discussion of what motivates researchers and their readers. Part 2 focuses on finding a topic, planning the project, and locating appropriate sources. This section is brought up to date with new information on the role of the Internet in research, including how to find and evaluate sources, avoid their misuse, and test their reliability. Part 3 explains the art of making an argument and supporting it. The authors have extensively revised this section to present the structure of an argument in clearer and more accessible terms than in the first edition. New

distinctions are made among reasons, evidence, and reports of evidence. The concepts of qualifications and rebuttals are recast as acknowledgment and response. Part 4 covers drafting and revising, and offers new information on the visual representation of data. Part 5 concludes the book with an updated discussion of the ethics of research, as well as an expanded bibliography that includes many electronic sources. The new edition retains the accessibility, insights, and directness that have made *The Craft of Research* an indispensable guide for anyone doing research, from students in high school through advanced graduate study to businesspeople and government employees. The authors demonstrate convincingly that researching and reporting skills can be learned and used by all who undertake research projects. New to this edition: Extensive coverage of how to do research on the internet, including how to evaluate and test the reliability of sources  
New information on the visual representation of data  
Expanded bibliography with many electronic sources

Fisk, 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience.
