Visualize Complex Processes with Microsoft Visio David J Parker, Senaj Lelic, 2023-05-12 Streamline your business by creating clear, concise process diagrams with Microsoft Visio, and share them securely for viewing, reviewing, and collaboration Purchase of the print or Kindle book includes a free PDF eBook Key Features Learn built-in diagram types or create custom ones to describe flow steps effectively Unlock the skills and techniques needed to efficiently and speedily capture and communicate complex flows Understand how to store securely, integrate with other apps, and import and export flow steps Book Description Every business has process flows, but not all of them are fully described to or verified for accuracy with each stakeholder. This not only presents a risk for business continuity but also removes the ability to make insightful improvements. To make these complex interactions easy to grasp, it's important to describe these processes visually using symbology that everybody understands. Different parts of these flows should be collaboratively developed and stored securely as commercial collateral. Visualize Complex Processes with Microsoft Visio helps you understand why it is crucial to use a common, systematic approach to document the steps needed to meet each business requirement. This book explores the various process flow templates available in each edition of Microsoft Visio, including BPMN. It also shows you how to use them effectively with the help of tips and techniques and examples to reduce the time required for creating them,

as well as how you can improve their integration and presentation. By the end of this book, you'll have mastered the skills needed to create data-integrated business flowcharts with Microsoft Visio, learned how to effectively use these diagrams collaboratively, but securely, and understood how to integrate them with other M365 apps, including Excel, Word, PowerPoint, and Power Automate. What you will learn

- Choose an appropriate flowchart diagram type to describe process steps
- Develop the skills to efficiently use Visio to draw process flowcharts
- Discover how to create process flows diagrams to meet the BPMN standard
- Find out how to synchronize Excel tables with Visio process flowcharts
- Store flowcharts that can also be used for collaboration securely
- Understand how to export flowcharts and data to other M365 apps
- Discover how Visio ShapeSheet functions can increase productivity

Who this book is for If you're a manager, analyst, or designer of business processes, then this book will help you create professional process diagrams effectively and consistently to improve the accuracy of communication and facilitate impactful insights. This book will also be useful for beginners or power users who are seeking tips and techniques to capture process flows from context and customize diagrams to meet academic as well as corporate standards.

The Influencing Formula Elizabeth Larson, Richard Larson, 2012-10-01 Today's global business environment is complex. Organizations find it a challenge to keep pace with rapid advancements. Business analysts, project managers, process analysts and other information workers have to influence various stakeholders, regardless of their position in the organization. What makes this ability to influence without authority seem so easy for some and nearly impossible for others? Successful influencers have learned to be trusted advisors in their organizations. They employ three critical ingredients which the authors call the Influencing Formula. This book reveals how the Influencing Formula works and illustrates how it is the new mandate required to effectively influence without authority in any type of organization, large or small.

Metrics-Based Process Mapping Karen Martin, Mike Osterling, 2012-10-22 Metrics-Based Process Mapping (MBPM) is a tactical-level, visual mapping approach that enables improvement teams to make effective, data-based decisions regarding waste elimination and measure ongoing process performance. The mapping technique, often used to drill down from a value stream map, integrates the functional orientation of traditional swim-lane process maps with time and quality metrics that are essential for designing improved processes. Building on the success of its popular predecessor, *Metrics-Based Process Mapping: An Excel-Based Solution*, this book takes readers to the next level in understanding processes and process improvement. Included with the book is an interactive macro-driven Excel tool, which allows users to electronically capture their current and future state maps. The tool also audits the maps for completeness, summarizes the metrics, and auto-calculates the improvements. Improvements to this version include:

- Foundational content about processes—what they are and how they vary
- A description of the difference between value-stream and process-level maps
- New content about how to bridge the gap between your current state and your desired future state
- Tips for effective team formation and mapping

facilitation An implementation plan for those using the mapping methodology as a standalone tool and not part of a Kaizen Event The Excel-based tool included on the accompanying CD provides readers with a user-friendly way to electronically archive manually created maps in team settings for easier storage and distribution across your entire organization. While current and future state MBPMs are initially created during team-based activities using butcher paper and post-its, the electronic maps serve as standard work documentation for the improved process, enabling training, communication, and process monitoring activities. This flexible, user-friendly tool includes: A custom toolbar that simplifies map creation and editing Automated calculation of key metrics An audit feature to prevent mapping errors The ability to simulate how improvements will impact staffing requirements System Requirements: The tool is intended for use on PCs using Excel 2003 or later—it will NOT function with earlier versions of Excel, or on Macintosh computers. View a demo of the Excel tool at: www.mbpmapping.com
