Transparent User Authentication Nathan Clarke,2011-08-17 This groundbreaking text examines the problem of user authentication from a completely new viewpoint. Rather than describing the requirements, technologies and implementation issues of designing point-of-entry authentication, the book introduces and investigates the technological requirements of implementing transparent user authentication – where authentication credentials are captured during a user's normal interaction with a system. This approach would transform user authentication from a binary point-of-entry decision to a continuous identity confidence measure. Topics and features: discusses the need for user authentication; reviews existing authentication approaches; introduces novel behavioural biometrics techniques; examines the wider system-specific issues with designing large-scale multimodal authentication systems; concludes with a look to the future of user authentication.

Beyond Photoshop Derek Lea,2013-03-20 In his best-selling book Creative Photoshop, award-winning artist Derek Lea has already shown the digital art world how to create stunning, sophisticated works of art using Photoshop. Now, he goes one step further in this all-new book to demonstrate his unique methods for using Photoshop in conjunction with other software packages. Derek's first-class images will inspire you to think creatively about the ways in which you can use Photoshop alongside other popular programs such as Illustrator and Poser to take your own art to the next level. In addition

to invaluable advice on how to create static works of art, Derek's also included plenty of material on creating motion-oriented art using Photoshop with programs like Flash and After Effects. Whether you are a digital artist, illustrator, cartoonist, graphic artist, designer, or serious hobbyist working for print or the web, this fantastic new book will open your eyes to a whole new world of digital art that's never before been uncovered. Challenge yourself and discover the more artistic aspects of these programs with one of the world's best teachers by your side. Be sure to visit www.beyondphotoshopthebook.com for more information including all of the sample images from the book to work with, a reader forum, and more.

Airbrush Painting: Advanced Techniques JoAnn Bortles,

Innovating Government Simone van der Hof,Marga M. Groothuis,2011-04-20 Governments radically change under the influence of technology. As a result, our lives in interaction with public sector bodies are easier. But the creation of an electronic government also makes us more vulnerable and dependent. Dependent not just on technology itself, but also on the organizations within government that apply technology, collect and use citizen-related information and often demand the citizens submit themselves to technological applications. This book analyzes the legal, ethical, policy and technological dimensions of innovating government. Authors from diverse backgrounds confront the reader with a variety of disciplinary perspectives on persistent themes, like privacy, biometrics, surveillance, e-democracy, electronic government, and identity management. Clearly, the use of technology by governments demands that choices are made. In the search for guiding principles therein, an in-depth understanding of the developments related to electronic government is necessary. This book contributes to this understanding. This book is valuable to academics and practitioners in a wide variety of fields such as public administration and ICT, sociology, political science, communications science, ethics and philosophy. It is also a useful tool for policymakers at the national and international level. Simone van der Hof is Associate Professor at TILT (Tilburg Institute for Law, Technology, and Society), Tilburg University, The Netherlands. Marga Groothuis is Assistant Professor at the Faculty of Law of Leiden University in the Netherlands. Specific to this book: Offers the reader a clear structure Enables the reader to see across disciplinary borders Offers an in-depth insight into new modes of government in various policy domains This is Volume 20 in the Information Technology and Law (IT&Law) Series

Video Analytics for Audience Measurement Cosimo Distante,Sebastiano Battiato,Andrea Cavallaro,2014-10-30 This book constitutes the refereed contest reports of the 1st International Workshop, VAAM 2014, held in Stockholm, Sweden, in August 2014. The 10 revised full papers presented were carefully reviewed and selected from 13 submissions. The aim of this workshop is to provide an overview of state of the art methods for audience measurements in retail and Digital Signage, end-users attraction, and stimulate the creation of appropriate benchmark dataset to be used as reference for the development of novel audience measurement algorithms. Papers are invited under the following topics: demographics and modeling consumer behaviour.

Introduction to AutoCAD 2005 Alfred Yarwood,2005 Taking the reader step by step through the features of AutoCAD 2005, Alf Yarwood provides a practical, structured course of work matched to the latest release of this software. After introducing first principles and the creation of 2D technical drawings, the author goes on to demonstrate construction of 3D solid model drawings and rendering of 3D models. In particular, editing tools, Sheet Sets (an important new feature of the latest AutoCAD software), the increased use of palettes, as well as an outline of the enhancements found in AutoCAD 2005 specifically, are covered in detail. Worked examples and exercises are included throughout the text, to enable the reader to apply theory to real-world engineering practice, along with revision notes and exercises at the end of chapters for the reader to check their understanding of the material they have covered. Introduction to AutoCAD 2005 contains hundreds of drawings and screen-shots to illustrate the stages within the design process. Readers can also visit a companion website and make use of a full colour AutoCAD Gallery, where they can edit drawings from the exercises found within the text, and see solutions to all exercises featured in the book. Further exercises in 3D work are also available to download. Details of enhancements to AutoCAD 2005 over previous releases are given in the text, along with illustration of how AutoCAD fits into the design process as a whole. Appendices with full glossaries of tools and abbreviations, most frequently used set variables, and general computer terms are also included. Suitable to new users of AutoCAD, or anyone wishing to update their knowledge from previous releases of the software, this book is also applicable to introductory level undergraduate courses and vocational courses in engineering and construction. Further Education students in the UK will find this an ideal textbook to cater for the relevant CAD units of BTEC Higher National and BTEC National Engineering schemes from Edexcel, and the City & Guilds 4351 qualification.

Rebel Gold Warren Getler,Bob Brewer,2008-06-18 As a boy growing up in rural Arkansas, Bob Brewer often heard from his uncle and his great-uncle about a particular tree in the woods, the Bible Tree, filled with strange carvings. Years later he would learn that this tree was carved with symbols associated with the Knights of the Golden Circle, a Civil Warera secret society that had buried gold coins and other treasure in various remote locations across the South and Southwest in hopes of someday funding a second War Between the States. These secret caches were guarded by sentinels, men whose responsibility it was to watch and protect these sites. To his astonishment, Bob discovered that both his uncle and his great-uncle had been twentieth-century sentinels, and that he had grown up near an important KGC treasure site. In Shadow of the Sentinel, Bob Brewer and investigative journalist Warren Getler tell the fascinating story of the Knights of the Golden Circle and the hidden caches the KGC established across the country. Brewer reveals how, with agonizing effort, he eventually deciphered the fiendishly complicated KGC codes and ciphers, which drew heavily on images associated with Freemasonry. (Many of the key KGC postCivil War leaders were Scottish Rite Masons, who used the cover of that secret fraternity to conduct their activities.) Using his knowledge of KGC symbolism to crack coded maps, Brewer has located several KGC

caches and has recovered gold coins, guns, and other treasure from some of them. Shadow of the Sentinel is the most comprehensive account yet of the activities of the KGC after the Civil War and, indeed, into the 1900s. Getler and Brewer suggest that the clandestine network of KGC operatives was far wider than previously thought, and that it included Jesse James, the former Confederate guerrilla whose stage and bank robberies helped to fill KGC treasure chests. This is a rousing and provocative adventure that weaves together one man's personal quest with an intriguing, little-known chapter in America's hidden history.
