**Massive Open Online Courses and Higher Education** Rebecca Bennett, Mike Kent, 2017-04-21 Since the first MOOC was launched at the University of Manitoba in 2008, this new form of the massification of higher education has been a rollercoaster ride for the university sector. The New York Times famously declared 2012 to be the year of the MOOC. However, by 2014, the number of academic leaders who believed the model was unsustainable doubled to more than 50%. While the MOOC hype has somewhat subsided, the attitudes and anxieties of this peak time can still be seen influencing universities and their administrations. This is the first volume that addresses Massive Open Online Courses from a post-MOOC perspective. We move beyond the initial hype and revolutionary promises of the peak-MOOC period and take a sober look at what endures in an area that is still rapidly growing, albeit without the headlines. This book explores the future of the MOOC in higher education by examining what went right, what went wrong and where to next for the massification of higher education and online learning and teaching. The chapters in this collection address these questions from a wide variety of different backgrounds, methodologies and regional perspectives. They explore learner experiences, the move towards course for credit, innovative design, transformations and implications of the MOOC in turn. This book is valuable reading for students and academics interested in education, eLearning, globalisation and information services.

Hollywood or History? Scott L. Roberts, Charles J. Elfer, 2024-10-01 In response to the limitations associated with teaching through film, we sought to develop practical lesson ideas that might bridge gaps between theory and practice and assist teachers endeavoring to make effective use of film in their classrooms. One of the more interesting sources of visual media many authors in the previous volumes elected to use as the focus of their lesson plans were cartoons. These lesson plans have been some of the more popular in the series and are often easier to adapt for a variety of grade levels. In conducting research for this volume, we learned that cartoons are an often-used media sources in the classroom. They have similar strengths and weaknesses in not only the teaching of history, but other social studies disciplines as well. While in many cases their intended audience is younger children, people of all ages enjoy cartoons. This makes them useful for teaching students at all grade levels, as well as adults, as there will be immediate buy-in if used as a source of analysis for inquiry-based lessons. As with live action film, we believe cartoons can also serve as a powerful tool in the social studies classroom and if appropriately utilized can foster critical thinking and civic mindedness. The College, Career, and Civic Life

(C3) framework, adopted by the National Council for the Social Studies in 2013, represents a renewed and formalized emphasis on the perennial social studies goals of deep thinking, reading and writing. The C3 is comprehensive and ambitious. Moreover, we believe that as teachers endeavor to digest and implement the platform in schools and classrooms across the country, the desire for access to structured strategies that lead to more active and rigorous investigation in the social studies classroom will grow increasingly acute. Our hope is that the present volume might play a small role in the larger Hollywood or History? project of supporting practitioners, specifically teachers of preK-12 social studies disciplines, by offering a collection of 19 classroom-ready lesson designed to foster social studies inquiry through the careful use of selected cartoons.
