Move Patty Azzarello,2017-02-28 Move past the obstacles and implement your new strategy Move is your guide to mobilizing your whole organization to take your business forward. Whatever your needed transformation may be: a new initiative, a new market, a new product, your fresh strategy is up against a powerful foe: an organization's tendency to stay very busy and completely engaged what it's already doing. This book shows you how to cut through resistance and get your team engaged and proactively doing the new thing! Author Patty Azzarello draws on over twenty-five years of international business management experience to identify the chronic challenges that keep organizations from decisively executing strategy, and to give you a practical game plan for breaking through. Leaders tend to assume that stalls in execution are inevitable, unchanging parts of the workplace—but things can change. At the heart of every execution problem is the fact that there simply are not enough people doing what the business needs. This guide shows you how to get your entire organization on board—remove the fear, excuses, and hurdles—and uphold the new pursuit against distractions and dissent. No transformation can succeed without suitable engagement from the whole organization, but building engagement can be difficult, uncomfortable, and tentative. This book shows you how to get it done. Get your organization to embrace and personally commit to the new work Remove obstacles and passive aggressive attacks that block progress Defend new strategic initiatives against short term pressures to revert to business as usual Sustain momentum and the desire to move forward Make sure no one is ever asking, 'Are we still doing this?' Inertia isn't just a law of the universe, it's a law in the workplace that can be a major obstacle to making things happen. The great thing about inertia is that it cuts two ways: a body at rest remains at rest, but a body in motion remains in motion. People love to finish things. Move shows you how to make successful execution the new norm—starting today.

Slides for Students Gary D. Fisk, 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that. Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

Super Founders Ali Tamaseb, 2021 Every VC is chasing a unicorn—those billion dollar companies that fundamentally change their industries, and every entrepreneur certainly wants to become one. For Super Founders, author Ali Tamaseb gathered and analyzed 40,000 data points about the 200+ unicorns founded since 2005 and found out what these billion dollar companies and their founders actually looked like. And you'll be surprised by what he discovered. Half of unicorn founders are over 35. Most founders don't have any directly relevant work experience in the industry they're disrupting. There's no disadvantage to being a solo founder. Sixty percent of billion dollar companies are started by repeat entrepreneurs, many of whom already have at least one \$50M+ exit under their belt. And over half of unicorns were competing with multiple incumbents at the time of their founding. What we thought we knew about these companies doesn't turn out to be true, which has serious implications for both the kinds of startups that get funding and the for the kinds of people who decide to start companies in the first place. Super Founders gives readers an unprecedented look not just at what the data tells us about the world's most successful startups and the people who create them, but also at those companies and founders themselves, many of which are not well-known among the general public. A blend of data, analysis, stories and exclusive interviews, the book is a paradigm-shifting guide for entrepreneurs and the investment community. You may look more like a Super Founder than you think!--

The Pyramid Principle Barbara Minto, 2021 This book reveals that the mind automatically sorts information into distinctive pyramidal groupings. However, if any group of ideas are arranged into a pyramid structure in the first place, not

only will it save valuable time and effort to write, it will take even less effort to read and comprehend it

Execution Larry Bossidy, Ram Charan, Charles Burck, 2009-11-10 #1 NEW YORK TIMES BESTSELLER • More than two million copies in print! The premier resource for how to deliver results in an uncertain world, whether you're running an entire company or in your first management job. "A must-read for anyone who cares about business."—The New York Times When Execution was first published, it changed the way we did our jobs by focusing on the critical importance of "the discipline of execution": the ability to make the final leap to success by actually getting things done. Larry Bossidy and Ram Charan now reframe their empowering message for a world in which the old rules have been shattered, radical change is becoming routine, and the ability to execute is more important than ever. Now and for the foreseeable future: • Growth will be slower. But the company that executes well will have the confidence, speed, and resources to move fast as new opportunities emerge. • Competition will be fiercer, with companies searching for any possible advantage in every area from products and technologies to location and management. • Governments will take on new roles in their national economies, some as partners to business, others imposing constraints. Companies that execute well will be more attractive to government entities as partners and suppliers and better prepared to adapt to a new wave of regulation. • Risk management will become a top priority for every leader. Execution gives you an edge in detecting new internal and external threats and in weathering crises that can never be fully predicted. Execution shows how to link together people, strategy, and operations, the three core processes of every business. Leading these processes is the real job of running a business, not formulating a "vision" and leaving the work of carrying it out to others. Bossidy and Charan show the importance of being deeply and passionately engaged in an organization and why robust dialogues about people, strategy, and operations result in a business based on intellectual honesty and realism. With paradigmatic case histories from the real world—including examples like the diverging paths taken by Jamie Dimon at JPMorgan Chase and Charles Prince at Citigroup—Execution provides the realistic and hard-nosed approach to business success that could come only from authors as accomplished and insightful as Bossidy and Charan.

The Infinite Game Simon Sinek,2019-10-15 From the New York Times bestselling author of Start With Why and Leaders Eat Last, a bold framework for leadership in today's ever-changing world. How do we win a game that has no end? Finite games, like football or chess, have known players, fixed rules and a clear endpoint. The winners and losers are easily identified. Infinite games, games with no finish line, like business or politics, or life itself, have players who come and go. The rules of an infinite game are changeable while infinite games have no defined endpoint. There are no winners or losers—only ahead and behind. The question is, how do we play to succeed in the game we're in? In this revelatory book, Simon Sinek offers a framework for leading with an infinite mindset. On one hand, none of us can resist the fleeting thrills of a promotion earned or a tournament won, yet these rewards fade quickly. In pursuit of a Just Cause, we will commit to a vision of a future world so appealing that we will build it week after week, month after month, year after year. Although we do not know the exact form this world will take, working toward it gives our work and our life meaning. Leaders who embrace an infinite mindset build stronger, more innovative, more inspiring organizations. Ultimately, they are the ones who lead us into the future.

Gods of Management Charles B. Handy, 2009 Charles Handy's four gods symbolise the different styles of management to be found in businesses and organisations today. Zeus is a dynamic entrepreneur who makes snap decisions. Apollo is the god of order who defines staff through their job description and not personality. Athena is the goddess who recognises expertise and creates a task culture. Dionysus creates a culture where staff owe little allegiance to a manager. Each god represents different values and creates a differing culture. To be successful a leader, or manager, needs to be aware of the culture within their organisation and to be able to work to its strengths to create a productive and satisfying workplace.--Publisher.

The Lean Startup Eric Ries, 2011-09-13 Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they

have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on “validated learning,” rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs—in companies of all sizes—a way to test their vision continuously, to adapt and adjust before it’s too late. Ries provides a scientific approach to creating and managing successful startups in a age when companies need to innovate more than ever.

The 2-Hour Job Search Steve Dalton,2012-03-06 A job-search manual that gives career seekers a systematic, tech-savvy formula to efficiently and effectively target potential employers and secure the essential first interview. The 2-Hour Job Search shows job-seekers how to work smarter (and faster) to secure first interviews. Through a prescriptive approach, Dalton explains how to wade through the Internet’s sea of information and create a job-search system that relies on mainstream technology such as Excel, Google, LinkedIn, and alumni databases to create a list of target employers, contact them, and then secure an interview—with only two hours of effort. Avoiding vague tips like “leverage your contacts,” Dalton tells job-hunters exactly what to do and how to do it. This empowering book focuses on the critical middle phase of the job search and helps readers bring organization to what is all too often an ineffectual and frustrating process.
