How to Thrive as a Solo Librarian Carol Smallwood, Melissa J. Clapp, 2011-09-16 How to Thrive as a Solo Librarian is a compilation of chapters by librarians offering advice to colleagues who must work alone or with very limited help. The contributors come from schools and colleges, special and corporate archives, public libraries, and seasoned LIS faculty across the United States and abroad who are familiar with the vigor, dedication, and creativity necessary for solo librarians. As noted in the Foreword, In many ways, solo librarianship demands more communication and collaboration than librarians might experience in larger multi-employee libraries. Despite the fact that most of the authors are currently working alone in their library or archives, they do not work in a vacuum. These chapters aim to help librarians thrive in the demanding environment that exists for the solo librarian. Topics covered include time management, community involvement, public relations and marketing, professional development, internet-based ideas, administrative tasks, assessing and moving collections, and general overviews. How to Thrive as a Solo Librarian will be useful for all professionals and students in the field of librarianship.

**School Library Infographics** Peggy Milam Creighton Ph.D., 2015-05-18 Find out how you can increase the impact of your school library instruction, promotion, and organization with the utilization of infographics created with do-it-yourself tips found within this guidebook. Infographics have become increasingly popular educational tools for visually conveying ideas and information—in class projects, in daily lessons, and for promoting school and library programs. This book—the only one of its kind—helps you create your own computer-generated visuals for your class and library using common software platforms and free web-based applications. A perfect primer for educators with little or no technological savvy, this resource features charts, tables, screenshots, bars, and graphs for making infographics easy to reproduce and create. Author Peggy Milam Creighton discusses the benefits of utilizing visuals with students and provides tips and strategies for creating your

own graphics for various educational settings. The reference is organized into three topics: how to create infographics with Microsoft software such as Word, Excel, and PowerPoint; how to use graphics to support school library programs; and why using these visual-based learning tools is important. The work features easy-to-use tutorials, lesson plans, and project ideas for students.

**Creating an Undergraduate Literary Journal** Audrey Colombe, 2021-12-16 University literary journals allow students to create their own venue for learning, have a hands-on part of their development in real-world skills, and strive towards professional achievement. But producing an undergraduate literary magazine requires commitment, funding, and knowledge of the industry. This practical guide assists students and faculty in choosing a workable structure for setting up, and then successfully running, their own literary publication. Whether the journal is print or online, in-house or international, *Creating an Undergraduate Literary Journal* is a step-by-step handbook, walking the reader through the process of literary journal production. Chapters focus on: defining the journal; the financial logistics; editing the journal; distribution; and what could come next for a student writer-editor after graduation. The first book of its kind to offer instruction directly to those running university-based literary magazines, this book includes insights from former editors, advisers, students and features an extensive list of active student-run literary magazines key literary organizations for writers/editors who serve literary publications. From Audrey Colombe, faculty adviser on the award-winning Glass Mountain magazine from the University of Houston, this is a text for both newcomers and those more informed on the production process to help them navigate through a successful publishing experience.

*Fall Prevention Through Design in Construction* Imriyas Kamardeen, 2015-06-05 The role of designers has traditionally been to design a building so that it conforms to accepted local building codes. The safety of workers is left up to the contractor building the designs. Research shows, however, that designers can have an especially strong influence on construction safety during the concept, preliminary and detailed design phases. This book establishes the new knowledge and conceptual frameworks necessary to develop a mobile computing-enabled knowledge management system that can help reduce the high rate of construction falls. There are three main objectives of this book: 1. To create a new Prevention through Design (PtD) knowledge base to model the relationships between fall risks and design decisions; 2. To develop a PtD mobile App to assist building designers in fall prevention through design; 3. To evaluate the practical implications of the PtD mobile App for the construction industry, especially for building designers and workers. The cutting edge technologies explored in this book have the potential to significantly reduce the rate of serious injuries that occur in the global construction industry. This is essential reading for researchers and advanced students of construction management with an interest in safety or mobile technologies.

**Open Learning as a Means of Advancing Social Justice** Tabisa Mayisela,Shanali Govender,2024-01-23 This volume investigates the uptake of 'open learning' in South African Technical Vocational Education and Training (TVET) colleges and higher education institutions. Comprised of 16 studies focused on activities at a range of colleges and universities across the country, these chapters aim to promote a better understanding of open learning practices across the Post- School Education and Training (PSET) sector, including issues such as: recognition of prior learning, access for students with disabilities, work integrated learning, professional development, novel student funding mechanisms, leadership for open educational practices, institutional culture, student support, blended and online learning, flexible learning, online assessment, open educational resource development models and funding, and micro- credentials. This collection of peer-reviewed chapters contributes to understanding the ways in which South African PSET institutions and educators are interpreting 'open learning' as a means of advancing social justice. It includes a historical and contemporary understanding of the economic, cultural and political obstacles facing PSET, drawing on Nancy Fraser's theory of social justice as 'participatory parity' to better understand the ways in which 'open learning' may address systemic social injustices in order to allow South African students and educators to thrive. This volume emerges from research conducted by the Cases on Open Learning (COOL) project, an initiative by the Department of Higher Education and Training in partnership with the Centre for Innovation in Learning and Teaching (CILT) at the University of Cape Town (UCT) in South Africa.
