Community-In-a-Box Mark Birch,2020-09-30 A practical guide for community builders on building and scaling professional communities that thrive and transform the lives of the people within them through virtual and in-person events. Community is a hot topic in 2020. Enterprises, startups, investors, entrepreneurs, and creators are all jumping on board launching communities or building products for communities. This is especially timely given that a global pandemic has left people longing for human connection. And then there are the people like Mark Birch that just wanted to bring salespeople together. When Mark started the Enterprise Sales Forum, he had no big vision. It was just his way to convince salespeople and startup founders to meet and help each other. What started in a sweaty conference room for 50 people six years ago eventually blossomed into a community of 25,000 members and over 20 cities globally. *Community-in-a-Box* is a how-to guide into building and scaling a community from the ground up or reinvigorating existing communities. From the experiences of the Enterprise Sales Forum and other communities he launched, Mark weaves those stories into a book that leads you past the minefields and mistakes so you can confidently launch and grow a healthy community. Even though we all come to community building with our own motivations, the end result is a labor of love that positively impacts the lives of many. Through this book, you will also feel the impact of the power of community and what it takes to grab the spark and start a movement!

Story Engineering Larry Brooks,2011-01-27 What makes a good story or a screenplay great? The vast majority of writers begin the storytelling process with only a partial understanding where to begin. Some labor their entire lives without ever learning that successful stories are as dependent upon good engineering as they are artistry. But the truth is, unless you are master of the form, function and criteria of successful storytelling, sitting down and pounding out a first draft without planning is an ineffective way to begin. Story Engineering starts with the criteria and the architecture of storytelling, the engineering and design of a story--and uses it as the basis for narrative. The greatest potential of any story is found in the way six specific aspects of storytelling combine and empower each other on the page. When rendered artfully, they become a sum in excess of their parts. You'll learn to wrap your head around the big pictures of storytelling at a professional level

through a new approach that shows how to combine these six core competencies which include: • Four elemental competencies of concept, character, theme, and story structure (plot) • Two executional competencies of scene construction and writing voice The true magic of storytelling happens when these six core competencies work together in perfect harmony. And the best part? Anyone can do it!
