Free and Easy Website Design for Museums and Historic Sites Kelsey J. S. Ransick, 2015-12-16 Museums and

historic sites faced with small budgets and staff can find it intimidating to redesign or create a website from scratch. Concerns over resources make coding and designing (or hiring someone to do so) daunting and expensive. It does not have to be so. Content creation is inescapable when making a website, but designing and constructing a unique website can be as simple as taking an afternoon to use a color chart to pick a color scheme and paste in text from a Word document. All of the tools discussed in the book are free at the base level, and some offer upgrade packages with even more features. The advice and techniques are all created with an eye to making websites work for smaller institutions with limited budgets and timeframes. Every museum professional has come across issues when adapting general software for an institution's specific needs, and the information in this book will anticipate some of these needs by offering easy-to-implement workarounds and information on related software or services that integrate with each website. Features include: Howto guides for Wix, Weebly, WordPress, and Google Sites Detailed comparisons of WYSIWYG (What You See Is What You Get) editors by cost, features, and ease of use so that you can easily identify which platforms meet your needs Mythbusting of common website and computer assumptions Step-by-step content and design planning guide Basic HTML coding tricks and tips for the slightly more advanced users (or those who want to become so) • A free companion Web site includes links to online resources, ongoing updates to this book to keep it current, and links to other free online tools and software. Scaling Up Verne Harnish,2014 In this guide, Harnish and his co-authors share practical tools and techniques to help entrepreneurs grow an industry -- dominating business without it killing them -- and actually have fun. Many growth company leaders reach a point where they actually dread adding another customer, employee, or location. It feels like they are just adding more weight to an ever-heavier anchor they are dragging through the sand. To make matters worse, the increased revenues have not turned into more profitability, so at some point they wonder if the journey is worth the effort. This book focuses on the four major decisions every company must get right: People, Strategy, Execution and Cash. The book includes a series of One-Page tools including the One-Page Strategic Plan and the Rockefeller Habits Execution Checklist, which more than 40,000 firms around the globe have used to scale their companies successfully.

Living Forward Michael Hyatt,Daniel Harkavy,2016-03-01 Each of us has but one life to live on this earth. What we do with it is our choice. Are we drifting through it as spectators, reacting to our circumstances when necessary and wondering just how we got to this point anyway? Or are we directing it, maximizing the joy and potential of every day, living with a purpose or mission in mind? Too many of us are doing the former--and our lives are slipping away one day at a time. But what if we treated life like the gift that it is? What if we lived each day as though it were part of a bigger picture, a plan? That's what New York Times bestselling author Michael Hyatt and executive coach Daniel Harkavy show us how to do: to design a life with the end in mind, determining in advance the outcomes we desire and path to get there. In this step-by-step guide, they share proven principles that help readers create a simple but effective life plan so that they can get from where they are now to where they really want to be--in every area of life.

He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.
