Teachers Speak Up! Sonia Nieto, Alicia López Nieto, 2024-04-26 In the past several years, we have witnessed unprecedented political, racial, economic, and health-related ruptures in society. The resulting turmoil has had an inevitable and negative impact on students, teachers, the profession of education, and especially marginalized and vulnerable populations. Academics and policymakers have had their say in how to address today's volatile issues, but teachers and other practitioners closest to students have not had the same visibility or access. This volume is an attempt to remedy that absence resulting in a compelling picture of education today. Chapters highlight essays written by a diverse group of K-12 classroom teachers who share their vision for education and describe their empowering classroom practices. At times hopeful and full of joy, at other times angry and full of frustration, these essays speak to what classrooms and schools based on social justice might mean for our nation. **Teachers Speak Up!** presents a bold vision of what education could be if teachers were to have a more direct influence on the purpose and aims of learning and teaching. **Book Features:** Offers grounded accounts about creating classrooms filled with hope and promise amid the many challenges to everyday practice. Addresses the harm done by universal school closures due to the pandemic, growing political divisions, the ugly specter of racism, book bans, and more. Gives voice to classroom teachers who describe their vision for education, as well as their successful practice teaching diverse students. Includes chapter authors who are diverse in their identities, the subject matter they teach, and their time in the profession.

Engaging Virtual Environments Joanne Ricevuto, Laura McLaughlin, 2023-07-03 In a classroom setting interaction among students is the norm. How do you replicate that informality, spontaneity, and focus online? This book provides you

with a framework to think about the different kinds of engagement you want to foster -- whether participation, collaboration, or quick feedback -- and then introduces you to available online tools, some of which may be in your LMS, offers practical tips, and guides you to how make the most of commonly available technologies to achieve your goals. Within the context and progression of a course -- from developing a welcome page, presenting yourself and the purpose of your course, to icebreakers, assignments, and alternative forms of assessment -- the authors introduce you to a range of easy-to-use online tools that they have introduced to the faculty and teachers in their classes, and that foster active learning and student engagement. In doing so they provide a checklist that you can also access and print from the Web, to help you review additional tools from the wide and ever-growing range of tools that are available online and determine whether they are appropriate for what you want to accomplish. This book will help you connect with students, whether you're teaching synchronously or asynchronously, regardless of the devices students may be using; develop community; and introduce you to gamification to add enjoyment and variety to your students' experience of your class. Recognizing that using new tools with confidence requires practice, the authors offer ideas for implementing them in private online spaces. Each chapter concludes with reflection questions that can be addressed individually by the reader or within a learning community to encourage faculty to work together and support each other in virtual teaching and learning. This book addresses the challenge of embracing new models of course offerings to students in the evolving landscape of virtual learning.
