The Ridiculously Simple Guide to Google Apps (G Suite) Scott La Counte,2019-09-11 Chances are you grew up a Word and Office user. Maybe you were a rebel and committed your herd to OpenOffice, or, dare I say, WordPerfect—but for the majority of people, our lives were loyal to Microsoft. In 2005, a small little startup named Upstartle developed something unheard of at the time: a web-based word processor called Writely. It pioneered the idea of writing on the “cloud” and changed the way people thought about word processing. Google noticed the little upstart, and in 2006, they acquired the company. The software was abandoned and turned into what everyone knows today as Google Docs. It disrupted the industry—namely, Microsoft's industry. Today, Google has a whole suite of productivity apps; from documents to spreadsheets, you can do just about anything from the cloud. Microsoft and Apple have each made big attempts to create cloud-based environments of their own for office productivity, but Google pioneered the idea and its collaborative, online environment make it hard to beat. It's become so feature-rich that many businesses are finding it to be the preferred way to conduct business. If you are thinking about making the switch to Google, or have already made the switch but want to make sure you are using it correctly, then this guide will walk you through it. It will show you all the basic features to make sure you can get up and running as quickly as possible. It covers Google Drive, Google Docs, Google Slides, Google Sheets, and

Google Forms. Let's get started!

Google Apps for Seniors Scott La Counte, 2019-08-29 Remember when you used to pay for things?! When computer software was almost as much as your new computer. Times have certainly changed! Today many companies are giving you all that stuff you used to pay hundreds of dollars for—for free! What's the catch? There has to be a catch! Sometimes there definitely is a catch...it's free, but you have to watch a 30 second commercial every five minutes. Or it's free but you have to pay a subscription once you start to really like it. In the case of Google Apps, it truly is free. No annoying ads. No money grabs. Nothing. For the price of nothing you are getting online software that is on par with the Office suite you grew to love—and pay hundreds of dollars for. That means you get writing software, spreadsheet software, presentation software, and more...and you don't pay a dime! Now you see why so many people are making the switch to Google Apps? Who wouldn't want to pay nothing for good software? If you are interested in learning more about it, or you are ready to make the leap and become a free user, then this guide will show you the ropes and get you started as quickly as possible. Let's get started! This book is not endorsed by Alphabet, Inc.

Engaging Virtual Environments Joanne Ricevuto, Laura McLaughlin, 2023-07-03 In a classroom setting interaction among students is the norm. How do you replicate that informality, spontaneity, and focus online? This book provides you with a framework to think about the different kinds of engagement you want to foster -- whether participation, collaboration, or quick feedback -- and then introduces you to available online tools, some of which may be in your LMS, offers practical tips, and guides you to how make the most of commonly available technologies to achieve your goals. Within the context and progression of a course -- from developing a welcome page, presenting yourself and the purpose of your course, to icebreakers, assignments, and alternative forms of assessment -- the authors introduce you to a range of easy-to-use online tools that they have introduced to the faculty and teachers in their classes, and that foster active learning and student engagement. In doing so they provide a checklist that you can also access and print from the Web, to help you review additional tools from the wide and ever-growing range of tools that are available online and determine whether they are appropriate for what you want to accomplish. This book will help you connect with students, whether you're teaching synchronously or asynchronously, regardless of the devices students may be using; develop community; and introduce you to gamification to add enjoyment and variety to your students' experience of your class. Recognizing that using new tools with confidence requires practice, the authors offer ideas for implementing them in private online spaces. Each chapter concludes with reflection questions that can be addressed individually by the reader or within a learning community to encourage faculty to work together and support each other in virtual teaching and learning. This book addresses the challenge of embracing new models of course offerings to students in the evolving landscape of virtual learning.
