The BCG Genealogical Standards Manual ,2000 Family historians depend upon thousands of people unknown to them. They exchange research with others; copy information from books and databases; and write libraries, societies, and government offices. At times they even hire professionals to do legwork in distant areas and trust strangers to solve important problems. But how can a researcher be assured that he or she is producing or receiving reliable results? This official manual from the Board of Certification for Genealogists provides a standard by which all genealogists can pattern their work.

Marriage Law for Genealogists: The Definitive Guide ...What Everyone Tracing Their Family History Needs to Know about Where, When, Who and How Their Rebecca Probert,2016-03-25 How should we interpret our ancestors' decisions to marry in a particular form or place, or at a particular time? Did their choices make them exceptional or normal for their day? Might their marriages have been bigamous, clandestine, or void? Or might they have conscientiously followed the rules set down by Church and State? Since its publication in 2012, Marriage Law for Genealogists has become the indispensable guide for everyone tracing the marriages of their English and Welsh ancestors between 1600 and the twentieth century. Based upon years of painstaking primary research and studies of thousands of couples, it explains clearly and concisely why, how, when and where people in past centuries married. Family historians just starting out will find advice on where 'missing' marriages are most likely to be found, while those who are already well advanced in tracing their family tree will be able to interpret their discoveries to better understand their ancestors' motivations. Rebecca Probert is Professor of Law at Warwick University and the leading authority on the history of the marriage laws of England and Wales, a subject on which she has written extensively.

The Story Grid Shawn Coyne,2015-05-02 WHAT IS THE STORY GRID? The Story Grid is a tool developed by editor Shawn Coyne to analyze stories and provide helpful editorial comments. It's like a CT Scan that takes a photo of the global story and tells the editor or writer what is working, what is not, and what must be done to make what works better and fix

what's not. The Story Grid breaks down the component parts of stories to identify the problems. And finding the problems in a story is almost as difficult as the writing of the story itself (maybe even more difficult). The Story Grid is a tool with many applications: 1. It will tell a writer if a Story ?works? or ?doesn't work. 2. It pinpoints story problems but does not emotionally abuse the writer, revealing exactly where a Story (not the person creating the Story'the Story) has failed. 3. It will tell the writer the specific work necessary to fix that Story's problems. 4. It is a tool to re-envision and resuscitate a seemingly irredeemable pile of paper stuck in an attic drawer. 5. It is a tool that can inspire an original creation.

My Family Tree Workbook Rosemary A. Chorzempa,1982-01-01 Explains how to create a family tree, discussing getting started and conducting genealogical research

Find Names for the Temple Nicole Dyer,2018-07-06 Whether your family tree is partially filled out, mostly complete, or full with many LDS relatives, this step-by-step method will help you discover new relatives and reserve their temple ordinances. You will review the accuracy of your tree, analyze your pedigree, and make a list of ancestors to research. Those with many LDS relatives will locate research opportunities by diving deeper into tree analysis and listing ancestors who were not members of the LDS Church. Using descendancy research to find cousins will open doors for those will full family trees. Instead of selecting random ancestors, you will systematically view descendancy trees for each of the ancestors in your list. By evaluating each descendancy tree, you can determine which branches are most likely to contain candidates for further research likely to be found in available records. Once you have chosen a relative to focus on, you'll begin a research project. Research begins by choosing a research question. Next you will create a simple research plan and research log. When you have completed your searches, you will then record what you found in FamilySearch, including adding sources and new relatives to the tree, and then write a summary of your research. After merging duplicates you will be ready to reserve temple ordinances. After you've successfully found names for the temple, you can repeat the process by going back to your list of candidates for further research and begin again with a new research question. Now you won't run out of research opportunities! As you research each relative one by one, you will grow to love them and think of them as friends. As President Eyring said, your heart will be bound to theirs forever.
