*The Assessment Playbook for Distance and Blended Learning* Douglas Fisher, Nancy Frey, Vince Bustamante, John Hattie, 2020-11-17 Design assessments that measure and target student learning in both face-to-face and distance learning environments Assessments are the essential link between teaching and learning, yet the assessments used in face-to-face classrooms are not always practical or impactful in remote learning environments. Now that teachers are teaching from a distance, how will you assess what your students have learned? Tapping the expertise of teachers who are successfully engaged in distance learning, *The Assessment Playbook for Distance and Blended Learning* answers that question. Rich with a wide range of examples, strategies, and assessments that can be leveraged with rigor and fidelity regardless of learning environment, this practical playbook empowers teachers with the decision-making tools needed to gauge the impact of instructional strategies in today's rapidly evolving educational landscape. It features • Assessment cookies, or insights that endure in any distance or hybrid learning environment and can be used to inform assessment decisions, including the

understanding that everything is searchable. • A robust playlist of distance learning assessment tools—including universal response, teach-back opportunities, composing, taking action, self-assessment, and peer assessment—that teachers can mix and deploy to match every learning intention. • Information on how to evaluate the impact of your teaching on student learning—and how assessment can guide your teaching moves • Characteristics of formal tools of evaluation, such as tests, longer essays, and performance tasks that teachers can use in distance learning environments to document learning for reporting purposes. Designed properly, assessments implemented through the lens of distance and hybrid learning can yield significant impact for student achievement, both in the pandemic teaching of today, and in the educational contexts of the future.

Using Focus Groups to Listen, Learn, and Lead in Higher Education Mona J.E. Danner, J. Worth Pickering, Tisha M. Paredes, 2023-07-03 *Using Focus Groups to Listen, Learn, and Lead in Higher Education* presents an easy-to-use 6-step guide to help leaders in higher education listen to and learn from their stakeholders in order to enhance decision making. The big questions facing institutions today--especially those surrounding access, affordability, and accountability--require more than dashboards. Metrics and quantitative data alone do not offer lasting solutions and improvements. Using qualitative methods to listen to the voices of those involved, especially students and staff, is critical. Focus groups constitute the most appropriate, rigorous, and relevant qualitative research tool for this purpose, and one that is cost-effective and builds community when conducted using the ODU Method described in this book. *Using Focus Groups* is a single, comprehensive, and practical resource that describes why, when, and how to use focus groups. The authors provide detailed guidance for using focus groups, from developing the research questions with stakeholders, through training and recruiting moderators,

and identifying and recruiting participants, to the logistics of conducting focus groups, and ultimately analyzing data and developing final reports. Conversational vignettes illustrate the discussions that regularly occur in each step and help the reader better understand the process. Fifteen appendices provide templates and examples of every part of the process. Written particularly for institutional research and assessment staff and upper-level administrators, this book will also appeal to deans, department and program chairs and directors, faculty leaders, and administrative unit directors, including those in auxiliary and student services, alumni associations, and university foundations. It also serves as an excellent resource for higher education research methods courses. The authors are uniquely positioned to guide readers in this process. The team developed and refined this technique over two decades at Old Dominion University. They have conducted over 100 focus groups with campus, nonprofit, local, and international community organizations to assist them in assessing student learning, transition, and preparedness for the workforce, as well as evaluating organizations work and planning future projects.
