New Lines Matthew W. Wilson,2017-11-15 *New Lines* takes the pulse of a society increasingly drawn to the power of the digital map, examining the conceptual and technical developments of the field of geographic information science as this work is refracted through a pervasive digital culture. Matthew W. Wilson draws together archival research on the birth of the digital map with a reconsideration of the critical turn in mapping and cartographic thought. Seeking to bridge a foundational divide within the discipline of geography—between cultural and human geographers and practitioners of Geographic Information Systems (GIS)—Wilson suggests that GIS practitioners may operate within a critical vacuum and may not fully contend with their placement within broader networks, the politics of mapping, the rise of the digital humanities, the activist possibilities of appropriating GIS technologies, and more. Employing the concept of the drawn and traced line, Wilson treads the theoretical terrain of Deleuze, Guattari, and Gunnar Olsson while grounding their thoughts with the hybrid impulse of the more-than-human thought of Donna Haraway. What results is a series of interventions—fractures in the lines directing everyday life—that provide the reader with an opportunity to consider the renewed urgency of forceful geographic representation. These five fractures are criticality, digitality, movement, attention, and quantification. *New Lines* examines their traces to find their potential and their necessity in the face of our frenetic digital life.

Hispanic Marketing Felipe Korzenny,Betty Ann Korzenny,2012-06-25 This book is about strategic thinking in Hispanic marketing. The size and economic importance of the Hispanic market in the US are attracting enormous attention. The buying power of the US Hispanic market is now larger than the GDP of the entire country of Mexico, and it is the second largest Hispanic market in the world. Businesses and institutions have launched major initiatives to reach this important segment. Yet, the number of qualified individuals who understand the market is small; and many of those already catering to the market still struggle to learn about its intricacies. This book is a cultural approach to Hispanic marketing. Each of the chapters describes and explains the cultural principles of Latino marketing. Recent case studies help marketers relate to the material pragmatically. The book integrates concepts and practical examples and provides critical guidance to discern between alternative courses of action. This book is not about repeating well-known statistics, but about the Hispanic market as a cultural target. It takes a profound look at the values, beliefs, and emotions of US Hispanics, which impact consumer behaviour. Each of the chapters has been the subject of public presentations and lectures to marketing professionals. It is their positive reactions as well as the authors' dedication to Hispanic consumers which motivated this book. Chapter 1: The Role of Culture in Cross-Cultural Marketing Chapter 2: Characteristics of the Hispanic Market Chapter 3: What Makes Hispanics "Hispanic" Chapter 4: The Role of Language in Hispanic Marketing Chapter 5: The Processes of Enculturation, Acculturation, and Assimilation Chapter 6 Cultural Dimensions and Archetypes Chapter 7: Culturally Informed Strategy Based on Grounded Research Chapter 8: US.
