Power Tools Jeanne Dyches, Ashley S. Boyd, Katherine Baker, Alex Kaulfuss, 2023-10-11 Virtually all national standards now require students and teachers to understand the particulars of disciplinary literacy. But recently emerging scholarship suggests that disciplinary literacy is, by itself, an incomplete and potentially problematic approach to secondary literacy instruction. By asking students to “think like” or even “be like” experts, students may receive implicit messaging about whose knowledge is—and isn’t—valued. Critical disciplinary literacy (CDL) creates space for, and highlights connections between, critical literacies and disciplinary literacies. CDL acknowledges disciplines as unique communities with their own specialized (and often exclusionary) skills, norms, practices, and discourses, but deviates from conventional applications of disciplinary literacy by responding to the ways in which power systems and the analytic skills needed to understand them work differently based on the disciplines at hand. A CDL instructional approach acknowledges that applying the critical literacy skills of “reading the word and the world” to understand the power dynamics of vaccine distributions requires a different skill set and strategy approach than looking at textual representations of masculinity in *Romeo and Juliet*. Written by a team of educators with over 70 combined years of classroom experience, *Power Tools: 30 Critical Disciplinary Literacy Strategies for 6–12 Classrooms* offers readers research-based, multidisciplinary, ready-to-implement disciplinary literacy strategies from critical literacy lenses. The book sets itself apart from other strategy textbooks by offering creative strategy implementation that calls attention to power systems. Educators can learn, for example, how they might employ read-alouds to explore the global refugee crisis, or use the exit ticket strategy to help students reflect on the relationship between race and COVID statistics/experiences. *Power Tools: 30 Critical Disciplinary Literacy Strategies for 6–12 Classrooms* provides standards-aligned lessons that both challenge and extend traditional engagement practices to build a more just world. Each chapter includes: An overview of each strategy, situated within the research of best practices; Two disciplinary examples for each CDL strategy (e.g., an example of a CDL think-aloud in seventh grade math and tenth grade ELA classroom). Chapters provide resources such as examples of student work, discussion prompts, dialogue between teacher and students, and reprintables; Ideas for addressing resistance to CDL instruction. Preservice and in-service teachers, as well as teacher educators and researchers, looking to do and support justice-oriented work in disciplinary spaces will find value in the book. *Power Tools* is an ideal text to implement in courses such as Disciplinary Literacy, Secondary Literacy, Content Area

Literacy, Methods/Strategies for Teaching Social Justice, Multicultural Education, ELA methods, Science methods, Social Studies methods, and Mathematics methods.

Inclusive Learning 365 Christopher Bugaj,Karen Janowski,Mike Marotta,Beth Poss,2022-08-03 Designed to be read one day - and page - at a time, this book from four inclusive learning experts offers 365 strategies for implementing technology to design inclusive experiences. Educators across the world are working to design individualized instruction that empowers every student to become experts at learning. Technology and instructional interventions designed to support students with disabilities often eventually become mainstream and used by the masses. These practices provide a pathway for designing inclusive, equitable and accessible educational experiences that meet the needs of every individual learner. This engaging book includes daily strategies accompanied by examples of tools that can be implemented immediately to design meaningful instruction. Topics covered include role-playing games for social-emotional learning, building literacy through captioned video, coding to teach early literacy, text-to-speech for math and reading, and much more! Each daily strategy includes: • Explanation of how to use the strategy to design inclusive educational experiences. • Examples of tools that can be used to implement the strategy. • Alternative ways to use the strategy to extend student learning. • Images illustrating the strategy or tool. • Identification of relevant ISTE Standards for Educators and ISTE Standards for Students. Related resources. The heart of the book is the shift in mindset that occurs by exploring a different practical, inclusive strategy each day and infusing these strategies into everyday practice.

How To Build The Perfect Study Plan Jim Siverts,2020-04-20 Co-written by students with two different stories. One was a horrible student in high school who turned it around in college and law school. The other was an excellent student in high school but struggled as a college athlete at Harvard. Their goal is to help students avoid the anxiety and frustrations of

college study by creating a comprehensive study plan. The authors use 21 questions to help students identify what may be causing them problems. It combines time and workload management with effective study habits and methods to create a systematic approach to staying in complete control of your academic life.

Writing Is Thinking Holly S. Atkins, Lin Carver, 2021-11-30 In the instruction and learning process, the role writing plays has often been overlooked. Writing is thinking! It is a tool for learning in all content areas. The ever-growing body of brain research supports that learning to write transitions into writing to learn as students progress through upper elementary, middle, high school, and college. Writing is much more than the ability to craft an analytical essay. Writing has the potential to engage students in critical thinking and critical reflection as historians, mathematicians, scientists, or experts in any content area. *Writing is Thinking* explores methods and activities to effectively incorporate writing to help learners successfully master, analyze, apply, and express content knowledge.

Understanding and Creating Digital Texts Richard Beach, Chris M. Anson, Lee-Ann Kastman Breuch, Thomas Reynolds, 2014-10-16 Given the increased use of digital reading and writing tools in the classroom, this book provides secondary and college English language arts teachers with activities and classroom examples for using a range of different digital tools—blogs, wikis, websites, annotations, Twitter, mapping, forum discussions, etc.—to engage students in understanding and creating digital texts. It therefore integrates reading and writing instruction through goal-driven activities supported by uses and affordances of digital tools. This book also provides a framework for designing these activities that encourage students to define purpose and audience, make connections between digital texts and people, collaborate with others, employ alternative modes of communication and gain new perspectives, and constructing identities; practices that are linked to addressing the high school English Language Arts Common Core State Standards. The book also describes ways to use digital tools to support these practices—for example, using digital tools to foster students’ collaborative reading and writing. The book also describes use of digital feedback and e-portfolio tools to foster students’ reflection on their uses of these practices.

Practical Steps to Digital Research Deborah B. Stanley, 2018-07-11 This hands-on approach to teaching digital research skills breaks down each research skill into simple, targeted steps that enable students to research more deeply and to accomplish real-world tasks. Today's rapidly diversifying digital world provides easy access to information, making it increasingly important that students know how to conduct research online. In this book, you'll learn how to transition your instruction of the research process from a print context to a digital one, and to expand your own knowledge of how to best assist students at all stages of their research. Using six well-defined steps that she developed in her 26 years of experience as a school librarian, Deb Stanley provides practical strategies for each of the six steps of the research process accompanied by easily used and replicated lessons and handouts that are applicable and adaptable to all grade levels K-12. Step-by-step

instruction, links to Common Core state standards, and ideas to help students succeed at each stage of the research process makes this title a must-have for any school librarian.

Common Core Literacy for Math, Science, and Technical Subjects Katherine S. McKnight, 2014-09-05 Resources and guidance for the journey of Common Core implementation In this age of the Common Core State Standards, all content area teachers must integrate literacy standards into their curriculum. If you're like most content area educators, you're feeling a bit overwhelmed at the thought of addressing all the new standards, or you might just need a little extra help. In this hands-on resource, Common Core literacy expert Katherine McKnight offers secondary teachers a clear understanding of what literacy looks like in math, science, and technical subjects. McKnight gives educators proven teaching techniques that help develop literacy skills in students. She also offers a wealth of practical strategies and ready-to-use activities that content area teachers can integrate seamlessly. Included are Ideas for implementing the literacy requirements of the Common Core across content areas A selection of activities that support literacy skills and build content knowledge in math, science, and technology classrooms An easy-to-use Difficulty Dial that indicates the complexity of each activity Robust student samples that bring the activities to life across a variety of grade levels and subjects Common Core Literacy for Math, Science, and Technical Subjects is designed for practicality. With bonus web downloads, a literacy resource guide, and countless ideas for deepening content knowledge, this book provides excellent support for rigorous Common Core implementation. Praise for Common Core Literacy for Math, Science, and Technical Subjects A realist with an incisive wit, Katie's robust pedagogy and trenchant analysis inspire all of us to incorporate the CCSS meaningfully in specific content areas. For her gifted writing, let alone her substantive and easy-to-implement ideas, this is a godsend for content area teachers. Move it to the top of the priority reading stack. —Rick Wormeli, veteran educator, author, and teacher trainer McKnight eloquently dispels much of the mythology surrounding the new standards, and explains how to help students find success. You'll find this engaging book your 'go-to' resource for implementing the Common Core. —Richard M. Cash, Ed.D., educational consultant; author, *Advancing Differentiation: Thinking and Learning for the 21st Century*

From Curiosity to Deep Learning Julie Coiro, Elizabeth Dobler, Karen Pelekis, 2023-10-10 *From Curiosity to Deep Learning: Personal Digital Inquiry in Grades K-5* reveals the powerful learning that results when you integrate purposeful technology into a classroom culture that values curiosity and deep learning. The centerpiece of this practical guide is Personal Digital Inquiry (PDI), a framework developed by Julie Coiro and implemented in classrooms by her co-authors, Elizabeth Dobler and Karen Pelekis. Clear, detailed examples offer ideas for K-5 teachers and school librarians to support their teaching. Personal emphasizes the significance of the personal relationship between teachers and students, and the role that students have in the learning process. Digital reflects the important role that digital texts and tools have come to play in both learning and teaching with inquiry. Inquiry lies at the core of PDI, because learners grow and change with opportunities to identify problems, generate personal wonderings, and engage in collaborative dialogue, making learning relevant and lasting. *From Curiosity to Deep Learning: Personal Digital Inquiry in Grades K-5* shows you how to integrate inquiry with a range of digital tools and resources that will create a dynamic classroom for both you and your students.

Chain of Title David Dayen,2017-12-19 NOW IN PAPERBACK The gripping (New York Times) and Hitchcockian(Publishers Weekly) story of how a nurse, a car dealership worker, and a forensic expert took on the nation's largest banks A Kirkus Reviews and The Week best book of the year, David Dayen's Chain of Title is a riveting work that recalls A Civil Action, Erin Brockovich, and Flash Boys, recounting how three ordinary Floridians—a car dealership worker, a cancer nurse, and an insurance fraud specialist—helped uncover the largest consumer crime in American history, challenged the most powerful institutions in America, and—for a brief moment—brought the corrupt financial industry to its knees. Lisa Epstein, Michael Redman, and Lynn Szymoniak did not work in government or law enforcement. They had no history of anticorporate activism. Instead they were all foreclosure victims, and while struggling with their shame and isolation they committed a revolutionary act: closely reading their mortgage documents, discovering the deceit behind them, and building a movement to expose it. Harnessing the power of the Internet, they revealed how the financial crisis and subsequent recession were fundamentally based upon a series of frauds that kicked millions out of their homes because of false evidence by mortgage companies that had no legal right to foreclose. As Rolling Stone's Matt Taibbi noted: Chain of Title is a sweeping work of investigative journalism that traces the arc of a criminally underreported story in America, the collapse of the rule of law in the home mortgage industry.

Software Development Techniques for Constructive Information Systems Design Buragga, Khalid A.,Zaman, Noor,2013-03-31 Software development and information systems design have a unique relationship, but are often discussed and studied independently. Placemaking with Children and Youth Victoria Derr,Louise Chawla,Mara Mintzer,2018-09-18 An illustrated, essential guide to engaging children and youth in the process of urban design From a history of children’s rights to case studies discussing international initiatives that aim to create child-friendly cities, Placemaking with Children and Youth offers comprehensive guidance in how to engage children and youth in the planning and design of local environments. It explains the importance of children’s active participation in their societies and presents ways to bring all generations together to plan cities with a high quality of life for people of all ages. Not only does it delineate best practices in establishing programs and partnerships, it also provides principles for working ethically with children, youth, and families, paying particular attention to the inclusion of marginalized populations. Drawing on case studies from around the world—in Australia, New Zealand, Canada, India, Puerto Rico, the Netherlands, South Africa, and the United States—Placemaking with Children and Youth showcases children’s global participation in community design and illustrates how a variety of methods can be combined in initiatives to achieve meaningful change. The book features more than 200 visuals and detailed, thoughtful guidelines for facilitating a multiplicity of participatory processes that include drawing, photography, interviews, surveys, discussion groups, role playing, mapping, murals, model making, city tours, and much more. Whether seeking information on individual methods and project planning, interpreting and analyzing results, or establishing and evaluating a sustained program, readers can find practical ideas and inspiration from six continents to connect learning to the realities of students’ lives and to create better cities for all ages.

Homelands Nadav G. Shelef,2020-07-15 Why are some territorial partitions accepted as the appropriate borders of a nation's homeland, whereas in other places conflict continues despite or even because of division of territory? In Homelands, Nadav G. Shelef develops a theory of what homelands are that acknowledges both their importance in domestic and international politics and their change over time. These changes, he argues, driven by domestic political competition and help explain the variation in whether partitions resolve conflict. Homelands also provides systematic, comparable data about the homeland status of lost territory over time that allow it to bridge the persistent gap between constructivist theories of nationalism and positivist empirical analyses of international relations.
