Strategies for Writing in the Science Classroom Kathleen Kopp,2011 Writing is a valuable learning tool that can quite effectively--and easily--help students learn and understand science content. Teaching it, however, can be challenging for content-area teachers now under pressure from the Common Core Standards' refocused attention on reading and writing. With step-by-step directions, rubrics, student examples, templates, technology tips, and ideas for differentiation, Kopp goes beyond journals or reports to show how science teachers can use writing to develop critical-thinking skills, improve understanding of scientific concepts, assess students' progress, and hone skills in content-area writing. Her writing strategies support the Common Core Standards and, because the focus is on applying writing skills--and not teaching writing as an end in itself--science teachers can easily incorporate these strategies in any unit of study. This comprehensive resource makes it easy to incorporate writing in your science class today--and every day!
