*The Ridiculously Simple Guide to Google Apps (G Suite)* Scott La Counte, 2019-09-11 Chances are you grew up a Word and Office user. Maybe you were a rebel and committed your herd to OpenOffice, or, dare I say, WordPerfect—but for the majority of people, our lives were loyal to Microsoft. In 2005, a small little startup named Upstartle developed something unheard of at the time: a web-based word processor called Writely. It pioneered the idea of writing on the “cloud” and changed the way people thought about word processing. Google noticed the little upstart, and in 2006, they acquired the company. The software was abandoned and turned into what everyone knows today as Google Docs. It disrupted the industry—namely, Microsoft’s industry. Today, Google has a whole suite of productivity apps; from documents to spreadsheets, you can do just about anything from the cloud. Microsoft and Apple have each made big attempts to create cloud-based environments of their own for office productivity, but Google pioneered the idea and its collaborative, online environment make it hard to beat. It’s become so feature-rich that many businesses are finding it to be the preferred way to conduct business. If you are thinking about making the switch to Google, or have already made the switch but want to make sure you are using it correctly, then this guide will walk you through it. It will show you all the basic features to make sure you can get up and running as quickly as possible. It covers Google Drive, Google Docs, Google Slides, Google Sheets, and Google Forms. Let’s get started!

So what is Google Sheets? It's a cloud-based spreadsheet. Think Excel, but online. But Excel is online, you say. Yes! **Going Chromebook** Brian Schell, 2019-05-03 In the first book, *Going Chromebook: Living in the Cloud*, we looked at Chromebooks and the various software options available for them, and we decided whether or not the cloud lifestyle was for you. If you've gotten this far, then the answer was a confident Yes! Now it's time to look into specific apps and how to use them. First up is Google's own word processing system, Google Docs. It was Google's first and most well-known cloud app. It's also the most mature and, arguably, the most powerful. If you need to do any writing, whether a simple shopping list or a full-length book, Google Docs is the tool to use. This book begins by introducing you to the differences between Google Docs and the competing online office suites. We'll also look into Google's free and paid tiers for Google Docs/G Suite, and which one works out best for your needs. Next, there's a short review chapter on how to manipulate, delete, copy, and do various file operations within the Google Drive file manager. After that, we'll go through every single command and menu, every toolbar, and all the hidden options. This is the bulk of the material, and no stone (or menu) is left unturned. This includes voice transcription, translation, citations and footnotes, embedding Google Sheets and Slides, and all the other special things Docs can do for you. Lastly, for the things that Google Docs still just can't do, we will look at some of the very best third-party add-ons for Docs, allowing you to do all sorts of wild tasks. You already know the benefits of working in the cloud-- Now it's time to learn how to get the most out of it!
