The Ridiculously Simple Guide to Google Apps (G Suite) Scott La Counte,2019-09-11 Chances are you grew up a Word and Office user. Maybe you were a rebel and committed your herd to OpenOffice, or, dare I say, WordPerfect—but for the majority of people, our lives were loyal to Microsoft. In 2005, a small little startup named Upstartle developed something unheard of at the time: a web-based word processor called Writely. It pioneered the idea of writing on the "cloud" and changed the way people thought about word processing. Google noticed the little upstart, and in 2006, they acquired the company. The software was abandoned and turned into what everyone knows today as Google Docs. It disrupted the industry—namely, Microsoft's industry. Today, Google has a whole suite of productivity apps; from documents to spreadsheets, you can do just about anything from the cloud. Microsoft and Apple have each made big attempts to create cloud-based environments of their own for office productivity, but Google pioneered the idea and its collaborative, online environment make it hard to beat. It's become so feature-rich that many businesses are finding it to be the preferred way to

conduct business. If you are thinking about making the switch to Google, or have already made the switch but want to make sure you are using it correctly, then this guide will walk you through it. It will show you all the basic features to make sure you can get up and running as quickly as possible. It covers Google Drive, Google Docs, Google Slides, Google Sheets, and Google Forms. Let's get started!

Google Apps for Seniors Scott La Counte,2019-08-29 Remember when you used to pay for things?! When computer software was almost as much as your new computer. Times have certainly changed! Today many companies are giving you all that stuff you used to pay hundreds of dollars for—for free! What's the catch? There has to be a catch! Sometimes there definitely is a catch…it's free, but you have to watch a 30 second commercial every five minutes. Or it's free but you have to pay a subscription once you start to really like it. In the case of Google Apps, it truly is free. No annoying ads. No money grabs. Nothing. For the price of nothing you are getting online software that is on par with the Office suite you grew to

love—and pay hundreds of dollars for. That means you get writing software, spreadsheet software, presentation software, and more...and you don't pay a dime! Now you see why so many people are making the switch to Google Apps? Who wouldn't want to pay nothing for good software? If you are interested in learning more about it, or you are ready to make the leap and become a free user, then this guide will show you the ropes and get you started as quickly as possible.
