**Self-Service Data Analytics and Governance for Managers** Nathan E. Myers, Gregory Kogan, 2021-04-28 Project governance, investment governance, and risk governance precepts are woven together in *Self-Service Data Analytics and Governance for Managers*, equipping managers to structure the inevitable chaos that can result as end-users take matters into their own hands. Motivated by the promise of control and efficiency benefits, the widespread adoption of data analytics tools has created a new fast-moving environment of digital transformation in the finance, accounting, and operations world,

where entire functions spend their days processing in spreadsheets. With the decentralization of application development as users perform their own analysis on data sets and automate spreadsheet processing without the involvement of IT, governance must be revisited to maintain process control in the new environment. In this book, emergent technologies that have given rise to data analytics and which form the evolving backdrop for digital transformation are introduced and explained, and prominent data analytics tools and capabilities will be demonstrated based on real world scenarios. The authors will provide a much-needed process discovery methodology describing how to survey the processing landscape to identify opportunities to deploy these capabilities. Perhaps most importantly, the authors will digest the mature existing data governance, IT governance, and model governance frameworks, but demonstrate that they do not comprehensively cover the full suite of data analytics builds, leaving a considerable governance gap. This book is meant to fill the gap and provide the reader with a fit-for-purpose and actionable governance framework to protect the value created by analytics deployment at scale. Project governance, investment governance, and risk governance precepts will be woven together to equip managers to structure the inevitable chaos that can result as end-users take matters into their own hands.

*Next Generation Excel* Isaac Gottlieb, 2009-12-02 Dr. Isaac Gottlieb personally trained 35 of our top analysts and finance professionals in a customized advanced Excel seminar. Many of the tools covered in this book were part of this well-received training. For the past five years, Isaac's monthly Excel-Tip-Of-The-Month newsletter has been a personal favorite of mine. In an age where email overload is common, I always look forward to his email and many of my associates and team members around the world are part of his over 50,000 monthly recipients. This compilation is a must-have for any finance professional who wants to be a better business partner and truly add value in a more efficient manner! Anthony N. Caspio, CMA Vice President - Finance Sealed Air Corporation Excel has been one of the most powerful applications of recent times, but most users, unfortunately, only scratch its surface. Prof. Gottlieb's book leverages his years of Excel workshops in the US, Europe and Asia, and he unleashes the tremendous potential and power of Excel. His to-the-point explanations and his innovative screenshots bring Excel alive to readers who may just have a working knowledge of the software. This amazing volume is an application-oriented book for Excel users who want answers fast, and who need to maximize the application's awesome potential. Prof. Farrokh Langdana, Ph.D. Director, Rutgers Executive MBA Professor, Rutgers Business School If I should thank Microsoft for inventing Excel, then I would like to thank Dr. Isaac Gottlieb more for teaching me how to use it to solve the real problems in my real work. Keep going Isaac! Wu Haowen Director of International Programs School of Management, Dalian University of Technology Isaac Gottlieb's *Next Generation Excel* is an invaluable resource. The fruit of many years of teaching Excel to university business students, Gottlieb's book covers the topics that the Excel user needs to become more efficient and sophisticated. It is easy to read and follow. A wonderful book! Simon Benninga Professor of Finance, Faculty of Management, Tel Aviv University Author of *Principles of Finance with Excel* As an avid user of Excel, several years ago I

came across Isaac's Excel-Tip-Of-The-Month newsletter. I quickly realized that Isaac exploits Excel to the "next usability level." Like his monthly newsletters, Isaac has composed a book that is clear and concise similarly reflecting his teaching methods. This book helps intermediate users to rapidly acquire Excel-pro skills, while allowing advanced users to grasp concepts in one single pass-through. Furthermore, Isaac takes day-to-day challenges and provides elegant ease of use solutions. Moshe Castiel Manager, IT - Technology & Operations TIAA-CREF Next Generation Excel presents an interesting perspective on the resourcefulness of Microsoft Excel like never before. This book is an excellent and a much-needed resource to MBA students, educators and Excel enthusiasts. In reviewing this book, the principal criteria included content, organization and Excel add-on files. The book is neatly organized into sections; starting with basic Excel tools and functions, commonly used statistical tools, what-if-analysis and then moving on to advanced data features, solver-add ins and various other ToolPaks, nicely complemented with the Excel snapshots to provide a user friendly experience. As a result, one can jump directly to the relevant sections and use the Excel files provided to get a more hands-on experience. The right mix of theory and practice, is the unique selling point (USP) of this book! Anirudha "Andy" Vaidya, MBA CEO AVS System

**Easy data transfer to your new HR-Outsourcing-Provider** Heinrich Serwas,2023-11-13 With extensive experience in payroll outsourcing projects, like ADP Global View and other HR solutions, we've gained valuable insights for management and tools for those involved in such projects. Transferring data to new outsourcing providers often requires structured Excel tables, which they can quickly integrate into their systems. However, legacy systems produce differently structured data, especially with platforms like ADP Global View which aligns with SAP-HR-Infotypes. Even within two SAP-HR systems, disparities arise, necessitating the process of data cleansing, mapping, and transferring. Our tools, including MATCHMAKER and MAPPING-TOOL, streamline this process, providing a structured method to address challenges faced during data transfers from legacy to new systems. It's crucial for the company (the data owner) to supply accurate data to the outsourcing provider. This book is a comprehensive guide for our MATCHMAKER and MAPPING-TOOL software, designed to bridge gaps with template files, like the ADP Spread-Sheet-Loader and its 40+ sheets (SSL-infotypes). Our software aids HR professionals, project managers, and analysts in delivering quality data effortlessly and on schedule. Management recognizes the importance of adhering to project timelines to ensure a successful launch. MATCHMAKER and MAPPING-TOOL, with an Excel-like interface, empower even those with basic Excel knowledge to execute tasks typically reserved for programmers or analysts. Implementing these tools can boost team performance in such projects. This book, while supporting our software users and aiding on-the-job training, also offers guidance to management in such ventures.

*Quality Procedures for Hardware and Software* D.J. Smith,J.S. Edge,2012-12-06 How to Use This Book The primary purpose of this book is to assist small companies, involved in both hardware and software, to devise and evolve their own quality systems. There are a number of national and now international standards which outline the activities for which procedures and records need to be specified. They are described and compared in Chapter 2, and the subsequent guidance in the book is intended to assist in meeting them. Although, at first sight, the operations of a hardware equipment developer may seem very different from those of a software house, the basic requirements of a quality system, such as the BS 5750 and ISO 1987 series of documents, are the same. For this reason the same standard can be called for in both areas and it will be seen, in Part 2, that suitable procedures can be derived to meet both types of operation. Quality standards (BS 5750, AQAP, ISO 9000 series) distinguish between companies carrying out, on the one hand, both design and manufacturing fixed functions and, on the other hand, those who only manufacture to specifications. In practice, the lesser requirements (those applying to manufacture to fixed specifications) are common to both levels of standard and the additional controls pertaining to design are added to obtain the higher standard. Chapter 2 explains the differences in detail.
