**Robert's Rules of Order Newly Revised, 12th edition** Henry M. Robert III, Daniel H. Honemann, Thomas J. Balch, 2020-08-25 The only current authorized edition of the classic work on parliamentary procedure--now in a new updated edition Robert's Rules of Order is the recognized guide to smooth, orderly, and fairly conducted meetings. This 12th edition is the only current manual to have been maintained and updated since 1876 under the continuing program established by General Henry M. Robert himself. As indispensable now as the original edition was more than a century ago, Robert's Rules of Order Newly Revised is the acknowledged gold standard for meeting rules. New and enhanced features of this edition include: Section-based paragraph numbering to facilitate cross-references and e-book compatibility Expanded appendix of charts, tables, and lists Helpful summary explanations about postponing a motion, reconsidering a vote, making and enforcing points of order and appeals, and newly expanded procedures for filling blanks New provisions regarding debate on nominations, reopening nominations, and completing an election after its scheduled time Dozens more clarifications, additions, and refinements to improve the presentation of existing rules, incorporate new interpretations, and address common inquiries Coinciding with publication of the 12th edition, the authors of this manual have once again published an updated (3rd) edition of Robert's Rules of Order Newly Revised In Brief, a simple and concise introductory guide cross-referenced to it.

**Joan Garry's Guide to Nonprofit Leadership** Joan Garry, 2017-03-06 Nonprofit leadership is messy Nonprofits leaders are optimistic by nature. They believe with time, energy, smarts, strategy and sheer will, they can change the world. But as staff or board leader, you know nonprofits present unique challenges. Too many cooks, not enough money, an abundance of passion. It's enough to make you feel overwhelmed and alone. The people you help need you to be successful. But there are so many obstacles: a micromanaging board that doesn't understand its true role; insufficient fundraising and donors who make unreasonable demands; unclear and inconsistent messaging and marketing; a leader who's a star in her sector but a difficult boss... And yet, many nonprofits do thrive. Joan Garry's Guide to Nonprofit Leadership will show you how to do just that. Funny, honest, intensely actionable, and based on her decades of experience, this is the book Joan Garry wishes she had when she led GLAAD out of a financial crisis in 1997. Joan will teach you how to: Build a powerhouse board Create an impressive and sustainable fundraising program Become seen as a 'workplace of choice' Be a compelling public face of your

nonprofit This book will renew your passion for your mission and organization, and help you make a bigger difference in the world.

Gradual failure : the air war over North Vietnam 1965-1966 Jacob Van Staaveren, 2002 Of the many facets of the American war in Southeast Asia debated by U.S. authorities in Washington, by the military services and the public, none has proved more controversial than the air war against North Vietnam. The air war's inauguration with the nickname Rolling Thunder followed an eleven-year American effort to induce communist North Vietnam to sign a peace treaty without openly attacking its territory. Thus, Rolling Thunder was a new military program in what had been a relatively low-key attempt by the United States to win the war within South Vietnam against insurgent communist Viet Cong forces, aided and abetted by the north. The present volume covers the first phase of the Rolling Thunder campaign from March 1965 to late 1966. It begins with a description of the planning and execution of two initial limited air strikes, nicknamed Flaming Dart I and II. The Flaming Dart strikes were carried out against North Vietnam in February 1965 as the precursors to a regular, albeit limited, Rolling Thunder air program launched the following month. Before proceeding with an account of Rolling Thunder, its roots are traced in the events that compelled the United States to adopt an anti-communist containment policy in Southeast Asia after the defeat of French forces by the communist Vietnamese in May 1954.

*Design and Implementation of Health Information Systems* World Health Organization Staff, World Health Organization, 2000 This book provides a practical guide to the design and implementation of health information systems in developing countries. Noting that most existing systems fail to deliver timely, reliable, and relevant information, the book responds to the urgent need to restructure systems and make them work as both a resource for routine decisions and a powerful tool for improving health services. With this need in mind, the authors draw on their extensive personal experiences to map out strategies, pinpoint common pitfalls, and guide readers through a host of conceptual and technical options. Information needs at all levels - from patient care to management of the national health system - are considered in this comprehensive guide. Recommended lines of action are specific to conditions seen in government-managed health systems in the developing world. In view of common constraints on time and resources, the book concentrates on strategies that do not require large resources, highly trained staff, or complex equipment. Throughout the book, case studies and numerous practical examples are used to explore problems and illustrate solutions. Details range from a list of weaknesses that plague

most existing systems, through advice on when to introduce computers and how to choose appropriate software and hardware, to the hotly debated question of whether patient records should be kept by the patient or filed at the health unit. The book has fourteen chapters presented in four parts. Chapters in the first part, on information for decision-making, explain the potential role of health information as a managerial tool, consider the reasons why this potential is rarely realized, and propose general approaches for reform which have proved successful in several developing countries. Presentation of a six-step procedure for restructuring information systems, closely linked to an organizational model of health services, is followed by a practical discussion of the decision-making process. Reasons for the failure of most health information to influence decisions are also critically assessed. Against this background, the second and most extensive part provides a step-by-step guide to the restructuring of information systems aimed at improving the quality and relevance of data and ensuring their better use in planning and management. Steps covered include the identification of information needs and indicators, assessment of the existing system, and the collection of both routine and non-routine data using recommended procedures and instruments. Chapters also offer advice on procedures for data transmission and processing, and discuss the requirements of systems designed to collect population-based community information. Resource needs and technical tools are addressed in part three. A comprehensive overview of the resource base - from staff and training to the purchase and maintenance of equipment - is followed by chapters offering advice on the introduction of computerized systems in developing countries, and explaining the many applications of geographic information systems. Practical advice on how to restructure a health information system is provided in the final part, which considers how different interest groups can influence the design and implementation of a new system, and proposes various design options for overcoming specific problems. Experiences from several developing countries are used to illustrate strategies and designs in terms of those almost certain to fail and those that have the greatest chances of success

Spotlight on Bylaws National Association of Parliamentarians,1993

The People's Liberation Army and Contingency Planning in China Andrew Scobell,Arthur S. Ding,Phillip C. Saunders,2016-04-26 How will China use its increasing military capabilities in the future? China faces a complicated security

environment with a wide range of internal and external threats. Rapidly expanding international interests are creating demands for the People's Liberation Army (PLA) to conduct new missions ranging from protecting Chinese shipping from Somali pirates to evacuating citizens from Libya. The most recent Chinese defense white paper states that the armed forces must make serious preparations to cope with the most complex and difficult scenarios . . . so as to ensure proper responses . . . at any time and under any circumstances. Based on a conference co-sponsored by Taiwan's Council of Advanced Policy Studies, RAND, Carnegie Endowment for International Peace, and National Defense University, The People's Liberation Army and Contingency Planning in China brings together leading experts from the United States and Taiwan to examine how the PLA prepares for a range of domestic, border, and maritime...

Focus on Prevention - Strategies and Programs to Prevent Substance Use Department Of Health And Human Services,2017-10-29 Misuse of alcohol, tobacco, and other drugs is a problem throughout the United States. Communities vary greatly in the specific problems they face, the groups affected by those problems, and the events that rouse people to take action. In addition to having different problems and priorities, some communities have more resources and experience with locally based prevention activities than others. Yet, with a can do approach and a bit of guidance, any community can have success in implementing strategies and programs to prevent substance use. This is where Focus on Prevention can help. The U.S. Department of Health and Human Services (HHS), Substance Abuse and Mental Health Services Administration (SAMHSA), has developed this guide as a starting point to help a wide range of groups and communities move from concerns about substance use to proven and practical solutions.
