   The Business of Filmmaking Maria Johnsen ,2023-03-13 The business of filmmaking is a multifaceted and intricate industry that encompasses various aspects such as production, distribution, and marketing. Success in this field requires a combination of talent, creativity, and business acumen. Filmmakers must possess a thorough understanding of the market, identifying trends and opportunities to capitalize on. Additionally, they must adeptly manage budgets, negotiate deals, and foster relationships with investors, distributors, and other industry stakeholders. Recent years have witnessed significant transformations in the film industry due to advancements in artificial intelligence (AI) technology and the surge of streaming services. While traditional movie theaters retain their importance, an increasing number of viewers now prefer online or mobile platforms for film consumption. Consequently, filmmakers must adapt to these evolving trends and find innovative ways to engage with audiences. My goal in writing this book is to raise awareness about film marketing processes and the art of building a business and network within the film industry. Unfortunately, colleges and universities often neglect these critical aspects, with the majority of lectures and programs focusing solely on the technicalities of filmmaking. Merely obtaining a master's degree in film production is insufficient for success in this field. To thrive in filmmaking, like any other business, one must cultivate relationships with various stakeholders, ranging from cast and crew to sales agents, distributors, exhibitors, lawyers, and publicists. This book is not another typical guide to filmmaking. Instead, I delve into the essential elements of building a successful business in the movie industry, emphasizing the impact of artificial intelligence on different aspects of the filmmaking process. Furthermore, I discuss strategies for increasing the value of one's film, such as hiring A-list actors for low-budget projects and more.

Tool support for collaborative creation of interactive storytelling media Paula Klinke,Silvan Verhoeven,Felix Roth,Linus Hagemann,Tarik Alnawa,Jens Lincke,Patrick Rein,Robert Hirschfeld,2022-09-21 Scrollytellings are an innovative form of web content. Combining the benefits of books, images, movies, and video games, they are a tool to tell compelling stories and provide excellent learning opportunities. Due to their multi-modality, creating high-quality scrollytellings is not an easy task. Different professions, such as content designers, graphics designers, and developers, need to collaborate to get the best out of the possibilities the scrollytelling format provides. Collaboration unlocks great potential. However, content designers cannot create scrollytellings directly and always need to consult with developers to implement their vision. This can result in misunderstandings. Often, the resulting scrollytelling will not match the designer's vision sufficiently, causing unnecessary iterations. Our project partner Typeshift specializes in the creation of individualized scrollytellings for their clients. Examined existing solutions for authoring interactive content are not optimally suited for creating highly customized scrollytellings while still being able to manipulate all their elements programmatically. Based on their experience and expertise, we developed an editor to author scrollytellings in the lively.next live-programming environment. In this environment, a graphical user interface for content design is combined with powerful possibilities for programming behavior with the morphic system. The editor allows content designers to take on large parts of the creation process of scrollytellings on their own, such as creating the visible elements, animating content, and fine-tuning the scrollytelling. Hence, developers can focus on interactive elements such as simulations and games. Together with Typeshift, we evaluated the tool by recreating an existing scrollytelling and identified possible future enhancements. Our editor streamlines the creation process of scrollytellings. Content designers and developers can now both work on the same scrollytelling. Due to the editor inside of the lively.next environment, they can both work with a set of tools familiar to them and their traits. Thus, we mitigate unnecessary iterations and misunderstandings by enabling content designers to realize large parts of their vision of a scrollytelling on their own. Developers can add advanced and individual behavior. Thus, developers and content designers benefit from a clearer distribution of tasks while keeping the benefits of collaboration.
