The Yes/No Book Mike Clayton,2013-02-14 How often do you say `YES' to something, when you know you really wanted to say `NO'? You have the right and the power to choose. This book will show you how. The Yes/No Book is about choice. It empowers you with the ability to know exactly when to say `YES' and when to say `NO', showing you how to handle both with no fear, no guilt and with confidence and self-assurance. Empowered with the decision-making skills to know how and when to say `YES' and `NO' you will develop increasing control over your life. You will become more focussed, more

productive, less stressed, more involved in doing the things you want to do and less in doing time-sapping chores that offer no benefit or joy. The book is structured into two parts. The first examines our addiction to `YES', the second tells us how to embrace and start using `NO' and how to choose when each is best for us.

Elementary Information Security Richard E. Smith,2013 Comprehensive and accessible, Elementary Information Security covers the entire range of topics required for US government courseware certification NSTISSI 4013 and urges students analyze a variety of security problems while gaining experience with basic tools of the trade. Written for the one-term undergraduate course, the text emphasises both the technical and non-technical aspects of information security and uses practical examples and real-world assessment tools. Early chapters in the text discuss individual computers and small LANS, while later chapters deal with distributed site security and the Internet. Cryptographic topics follow the same progression, starting on a single computer and evolving to Internet-level connectivity. provide a practical explanation of security technology to be used in the specific chapters- Implementation Examples show the technology being used to enforce the security policy at hand- Residual Risks describe the limitations to the technology and illustrate various tasks against it.- Each chapter includes worked examples of techniques students will need to be successful in the course.
