**Extra Bold** Ellen Lupton, Jennifer Tobias, 2021-06-25 *Extra Bold* is the inclusive, practical, and informative (design) career guide for everyone! Part textbook and part comic book, zine, manifesto, survival guide, and self-help manual, *Extra Bold* is filled with stories and ideas that don't show up in other career books or design overviews. • Both pragmatic and inquisitive, the book explores power structures in the workplace and how to navigate them. • Interviews showcase people at different stages of their careers. • Biographical sketches explore individuals marginalized by sexism, racism, and ableism. • Practical guides cover everything from starting out, to wage gaps, coming out at work, cover letters, mentoring, and more. A new take on the design canon. • Opens with critical essays that rethink design principles and practices through theories of feminism, anti-racism, inclusion, and nonbinary thinking. • Features interviews, essays, typefaces, and projects from dozens of contributors with a variety of racial and ethnic backgrounds, abilities, gender identities, and positions of economic and social privilege. • Adds new voices to the dominant design canon. Written collaboratively by a diverse team of authors, with original, handcrafted illustrations by Jennifer Tobias that bring warmth, happiness, humor, and narrative depth to the book. *Extra Bold* is written by Ellen Lupton (*Thinking with Type*), Farah Kafei, Jennifer Tobias, Josh A. Halstead, Kaleena Sales, Leslie Xia, and Valentina Vergara.

*Daily Dishonesty* Lauren Hom, 2014-09-02 A colorful compendium of little white lies, based on the award-winning,

“bitingly honest” blog (Imprint). From the diet you’re going to start tomorrow to that call you were about to make when something (anything) else came up—life is full of little lies that get us through the day. With Daily Dishonesty, designer and blogger Lauren Hom pays homage to the (mostly) innocent foibles that make us human. With 150+ hilariously common lies, beautifully illustrated by Hom, Daily Dishonesty touches on topics from breakups, friendship, and growing up to slacking off and guilty pleasures, in hand-lettered mantras that are all too honest about our untruths. Praise for the Daily Dishonesty blog “Simply wonderful!” —SwissMiss “Cleverly and adorably displays lies.” —Complex Magazine “Really inspiring for those of you who want to dabble in hand lettering.” —Miss Moss

Entering the URL supplied into a computer with web access will allow you to get to the files. Depending on your device, it is possible that your display settings will cut off part of the URL. To make sure this is not the case, try reducing your font size and turning your device to a landscape view. This should cause the full URL to appear.

**The Art of the Fold** Hedi Kyle, Ulla Warchol, 2018-10-02 The influential artist Hedi Kyle and renowned architecture

graduate Ulla Warchol shows you how to create their unique designs using folding techniques. From creating flag books and fishbones, to blizzards and nesting boxes, you'll gain an invaluable insight into the work of two skilled artists with this fun read! With the help of their thorough instructions and simple illustrations, you'll be on your way to becoming a pro paper crafter in no time at all - Sew magazine A wonderful insight into the work of a truly skilled artist - PaperCrafter The renowned and influential book artist Hedi Kyle shows you step-by-step how to create her unique designs using folding techniques in The Art of the Fold. Bookbinding and paper craft projects include flag books, blizzard books, the fishbone fold, and nesting boxes. Written by the doyenne of artists' books, Hedi Kyle, The Art of the Fold is a wonderful insight into the work of a truly skilled artist. Hedi will show you how to bind a book and fold paper to create over 35 of her cut-fold book designs. The book is beautifully illustrated with Hedi's finished works of art. An excerpt from the book: 'I can still remember the thrill I experienced when my first folded book structure emerged from my fingers - how eager I was to explore its possibilities and to share it with whoever was interested. The Flag Book, as I now call it, is a simple accordion and has interlocking pages oriented in opposite directions. Little did I know that this simple structure would have legs and be the catalyst for the next forty-plus years of thinking about and making books. The common perception of the book today is fairly straightforward: a series of pages organized around a spine and protected on either side by two covers. This format allows for easy access, storage and retrieval of information. Yet what happens when the book is stripped away of centuries of preconceptions and is allowed to reveal something else: playfulness, utility, invention? Expanding the notion of the book is what the structures in the following chapters of The Art of the Fold attempt to do. Exploring its tactile, sculptural form, primarily through folding methods, the book as a structural object is celebrated while content is considered in a new and unconventional way. My range in this medium has always been broad. In part this is due to my introduction to the world of bookbinding and some chance encounters. In the 1970s in New York City, the art and craft of hand bookbinding and papermaking were experiencing an unprecedented revival. I was fortunate to arrive in the city at just this moment. With an art-school background and an impulse to make things, I was naturally drawn to pursue this new opportunity. The Center for Book Arts, the famous forerunner of so many centers yet to come, was located in a small storefront just down the street from where I lived on the Lower East Side of Manhattan. Under the direction of founder Richard Minsky, it had a radical mission: to push concept, materials, printing and making of artist books in a new direction. When Richard dared me to teach at the Center one evening a week, I was hooked. My career as a book conservator and a book artist has now spanned over 45 years. As head conservator at the American Philosophical Society in Philadelphia, I've had the opportunity to handle some of the rarest volumes and manuscripts in the world. I have also dealt with decrepit books, torn maps and countless curiosities discovered in stacks and archives. All were endless sources for ideas and provided a springboard for a departure from tradition. Leading book-arts workshops around the world and a 25 year tenure teaching in the graduate program for Book

Arts and Printmaking at the University of the Arts in Philadelphia have shown me, in retrospect, that the more I taught, t

*Unfuck Your Boundaries* Faith G. Harper, PhD, LPC-S, ACS, ACN,2020-01-14 Boundaries are the ways we communicate our needs. They are what allow us to feel safe among strangers, in everyday interactions, and in our closest relationships. When we have healthy boundaries, we have a strong foundation in an uncertain world. And when someone crosses your boundaries, or you cross someone else's, the results range from unsettling to catastrophic. In this book, bestselling author Dr. Faith Harper offers a full understanding of issues of boundaries and consent, how we can communicate and listen more effectively, and how to survive and move on from situations where our boundaries are violated. Along the way, you'll learn when and how to effectively say no (and yes), troubleshoot conflict, recognize abuse, and respect your own and others' boundaries like a pro. You'll be amazed at how much these skills improve your relationships with friends, strangers, coworkers, and loved ones.

**Velo - 2nd Gear** Sven Ehmann,Robert Klanten,2013 Choosing a particular bicycle conveys an attitude and a way of life. For a young generation, bicycles have now replaced cars as the vehicles that best express its identity and this book shows

why. Riding a bike is easy. Once someone can do it, they will never forget how. Riding a bike can be addictive--in the best cases for life. Understanding the subtleties of contemporary bicycle culture can be challenging. Like it or not, choosing to ride a particular bike--whether an old-fashioned city bicycle, a high-tech machine, a mountain bike, a touring bike, a fixie, or a beach cruiser--means being associated with a certain lifestyle. *Velo--2nd Gear* explores these diverse bicycle scenes and reveals their histories, relationships, and insightful details. Alongside its presentation of especially attractive and unusual bicycles, the book documents how riders' accessories and styles vary just as widely as the bikes' tires and other equipment. It explains how each scene cultivates its own distinct codes through the choice of certain jerseys, caps, or bags or by visiting specific events or key establishments. The examples in *Velo--2nd Gear* span the globe. Tours in traditional costumes and on historical paths in Belgium or Italy are not only appealing as athletic challenges, but also as adventures for cosmopolitan travelers. In urban centers at night, bicycle messengers hold races on city streets. Specialized bike boutiques focus on details such as customized paint jobs. Frame builders in Oregon, Paris, or southern Germany create highly coveted bikes tailored to individuals or in very limited editions with long waiting lists. *Velo--2nd Gear* makes abundantly clear that contemporary bicycle culture is more alive and well than ever before. The book celebrates its healthy, environmentally-friendly, discerning, and slightly obsessive scenes and their protagonists. It shows why, for a young generation, bicycles have now replaced cars as the vehicles that best express its identity.

***Caps Lock*** Ruben Pater, 2021 Capitalism could not exist without the coins, banknotes, documents, information graphics, interfaces, branding, and advertisements made by graphic designers. Even anti-consumerist strategies such as social design and speculative design are appropriated to serve economic growth. It seems design is locked in a cycle of exploitation and extraction, furthering inequality and environmental collapse. *CAPS LOCK* uses clear language and visual examples to show how graphic design and capitalism are inextricably linked. The book features designed objects and also examines how the study, work, and professional practice of designers support the market economy. Six radical design cooperatives are featured that resist capitalist thinking in their own way, hoping to inspire a more socially aware graphic design.

***Production for Graphic Designers*** Alan Pipes, 2002 Covering recent technological advances in graphics and print production, this book explains the standard pre-press and printing processes, with attention to digital direct-to-plate offset and on-demand color printing. It also discusses Web production, highlighting the opportunities for online design work. Three hundred illustrations are featured, more than half in color. Pipes is a freelance illustrator and Web-master. Annotation copyrighted by Book News, Inc., Portland, OR.

*Folksonomies. Indexing and Retrieval in Web 2.0* Isabella Peters,2009-12-23 In Web 2.0 users not only make heavy use of Col-laborative Information Services in order to create, publish and share digital information resources - what is more, they index and represent these re-sources via own keywords, so-called tags. The sum of this user-generated metadata of a Collaborative Information Service is also called Folksonomy. In contrast to professionally created and highly struc-tured metadata, e.g. subject headings, thesauri, clas-sification systems or ontologies, which are applied in libraries, corporate information architectures or commercial databases and which were developed according to defined standards, tags can be freely chosen by users and attached to any information resource. As one type of metadata Folksonomies provide access to information resources and serve users as retrieval tool in order to retrieve own re-sources as well as to find data of other users. The book delivers insights into typical applications of Folksonomies, especially within Collaborative Information Services, and discusses the strengths and weaknesses of Folksonomies as tools of knowl-edge representation and information retrieval. More-over, it aims at providing conceptual considerations for solving problems of Folksonomies and presents how established methods of knowledge representa-tion and models of information retrieval can successfully be transferred to them.
