Creating Online Tutorials Hannah Gascho Rempel, Maribeth Slebodnik, 2024-02-14 Today's students rely heavily on electronic resources; they expect to be able to access library resources from any location and at any time of the day. Online education is ubiquitous from K-12 through graduate level coursework and is increasingly used in on-the-job training. Libraries must be prepared to guide learners to use library resources when and where they are needed. Thoughtfully designed online tutorials can be the library's answer to providing this point-of-need instruction that learners have come to expect. When librarians don't have the technical expertise needed to create online tutorials, *Creating Online Tutorials: A Practical Guide for Librarians, Second Edition* will help guide them through the basics of designing and producing an online tutorial. Using practical examples, the book leads librarians through the process of creating an online tutorial from start to finish and provides tips and strategies that will be useful to librarians with more experience in designing online tutorials. This detailed roadmap for designing and producing online tutorials covers: Is a tutorial the right solution? Assessing diverse user needs Choosing the right technology Selecting and organizing instructional content Planning tutorial design elements Integrating assessment into tutorial design Maintaining and updating tutorials Finding online tutorial resources After reading this book, new tutorial developers will have a practical, adaptable blueprint that enables them to confidently address the creation of their first online tutorials, and experienced developers will learn efficient techniques to create and enhance future tutorials that are attractive, effective teaching tools.

Transforming Health and Social Education to Include a Greater Focus on Public Health Education in the Curriculum Sharon Brownie,Constance Shumba,Louise Ackers,Georgina A.V. Murphy,2023-12-14 Now more than ever, an increased emphasis is needed on educational changes and innovations to effectively prepare health and social service professionals for 21st-century practice. Earlier work of the Lancet Independent Global Commission has been instrumental in validating the need for curricula change to include a focus on social determinants, public health priorities, and strategies to sustain healthy communities. The need to further strengthen the public health focus within health and social service education has been fuelled by the COVID-19 pandemic and the growing recognition of specific issues challenging society

such as that highlighted within the technical report recently released by the World Health Organization recognizing Parkinson's Disease as a public health issue. Each is an example of the need to prepare a future health and social service workforce well equipped in responding to major public health issues while contributing to global health and human wellbeing. The goal of this Research Topic is to provide additional evidence-based contributions to strengthen the public health focus in health and social service education. We aim to commission and publish a broad range of works including original research, case studies, pedagogical innovations, curriculum developments, program evaluations, and debate.

Vocational Engagement Model Nicholas A. Villani, 2022-11-03 Imagine the moment where you are working in the field providing employment services for people with disabilities and realize that the structure, or lack thereof, has contributed to the ongoing lack of progress, Imagine that moment where you see other disciplines such as education and medical fields engaging in their services in a more effective manner that makes every day in your job seem chaotic and redundant. Finally, imagine that there was this illuminating moment where it seemed as if you may have found the answer to the question Why can't we make the progress we so desperately want? That is the origin and implementation of the Vocational Engagement Model. The Vocational Engagement Model (VEM) presents the intersection of different disciplines to rethink job placement services as they are offered to people with disabilities today. The model connects aspects of the medical, educational, and rehabilitation disciplines in a process to improve the skills of the people who seek assistance to find and keep employment. VEM transcends the traditional format for job placement services, as defined by state VR systems. It is designed to manage the job placement service and exemplify cost optimization and job-seeker engagement. VEM intends to more fully engage the job seeker, their family and circle of support in the entire job search process; establish a career quest agreement on how services will be provided and establish the level of commitment and required activities for both the job seeker and career consultant; learn how to use a series of assessment instruments that will assist the career consultant to best counsel the job seeker with use of metacognitive skills; manage the job placement service both structurally and fiscally for cost optimization to minimize time from referral to placement, thereby facilitating personal engagement while managing the hours toward profitability; and establish Vocational Engagement Teams (VET) to create peer support systems and maximize staff skill and supports, not unlike rounds in the medical model; The Vocational Engagement Model is the evolutionary change in the provision of job placement services. It encourages guardrails for staff to work within while retaining their own creativity. The end result is total personal engagement, management of the job placement process with true cost optimization.

Design Thinking Research Larry Leifer, Hasso Plattner, Christoph Meinel, 2013-08-19 This book summarizes the results of Design Thinking Research carried out at Stanford University in Palo Alto, California, USA, and Hasso Plattner Institute in Potsdam, Germany. The authors offer readers a closer look at Design Thinking with its processes of innovations and methods. The contents of the articles range from how to design ideas, methods, and technologies via creativity experiments and wicked problem solutions, to creative collaboration in the real world and the connectivity of designers and engineers. But the topics go beyond this in their detailed exploration of design thinking and its use in IT systems engineering fields and even from a management perspective. The authors show how these methods and strategies work in companies, introduce new technologies and their functions and demonstrate how Design Thinking can influence as diverse a topic area as marriage. Furthermore, we see how special design thinking use functions in solving wicked problems in complex fields. Thinking and creating innovations are basically and inherently human – so is Design Thinking. Due to this, Design Thinking is not only a factual matter or a result of special courses nor of being gifted or trained: it's a way of dealing with our environment and improving techniques, technologies and life.

Data Information Literacy Jake Carlson, Lisa R. Johnston, 2015-01-15 Given the increasing attention to managing, publishing, and preserving research datasets as scholarly assets, what competencies in working with research data will graduate students in STEM disciplines need to be successful in their fields? And what role can librarians play in helping students attain these competencies? In addressing these questions, this book articulates a new area of opportunity for librarians and other information professionals, developing educational programs that introduce graduate students to the knowledge and skills needed to work with research data. The term data information literacy has been adopted with the deliberate intent of tying two emerging roles for librarians together. By viewing information literacy and data services as complementary rather than separate activities, the contributors seek to leverage the progress made and the lessons learned in each service area. The intent of the publication is to help librarians cultivate strategies and approaches for developing data information literacy programs of their own using the work done in the multiyear, IMLS-supported Data Information Literacy (DIL) project as real-world case studies. The initial chapters introduce the concepts and ideas behind data information literacy, such as the twelve data competencies. The middle chapters describe five case studies in data

information literacy conducted at different institutions (Cornell, Purdue, Minnesota, Oregon), each focused on a different disciplinary area in science and engineering. They detail the approaches taken, how the programs were implemented, and the assessment metrics used to evaluate their impact. The later chapters include the DIL Toolkit, a distillation of the lessons learned, which is presented as a handbook for librarians interested in developing their own DIL programs. The book concludes with recommendations for future directions and growth of data information literacy. More information about the DIL project can be found on the project's website: datainfolit.org.

Invaluable Dave Crenshaw, 2010-05-17 A business fable for anyone feeling overwhelmed, underpaid, and frustrated in

their job From the author of The Myth of Multitasking comes Invaluable, a business fable that empowers the frustrated and overworked to understand the value of their time. At the fictitious company GreenGarb, twenty-something Jason is discontent in his entry-level position, feeling his skills and knowledge are being underutilized; mid-level manager Tracy is overwhelmed by her own workload and needy direct reports; and CEO Helen needs them to sort it out productively. Jason's grandfather Charlie plants the seed of a new perspective in Jason mind: before he can get a raise, he must prove he deserves the raise. He must establish the value of his time, rather than expecting to be paid what he thinks he is worth. Time management consultant Phil helps them determine how they spend their time, and what it costs, with easy-to-follow worksheets that map what their actions and time are worth. Offers solid advice for determining just how invaluable you are to your boss and customers Shows how to create a productive framework of cooperation in the workplace Includes an appendix of worksheets and examples that offer concrete tools that can be applied immediately The Myth of Multitasking taught readers how to take control of their time. Invaluable shows readers how to increase the value of the time they do spend working.
