Inventorying Cultural Heritage Collections Sandra Vanderwarf, Bethany Romanowski, 2022-03-14 This two-part text opens with an argument few collections practitioners would contest: Regular inventories are central to meaningful, sustainable, and ethical collections preservation and access. But Vanderwarf and Romanowski argue that in practice—some 25 years working with diverse collections between them—inventories are uncommon: instead of functioning as a commonplace feature of collections care, they tend to be evoked as a last resort when a museum has lost control of its collection. Part I offers a flexible project management framework that illustrates strategies for reining in control of collections now. From identifying objectives that best serve the collection in question to securing stakeholder support and

planning time and resources, Part I eliminates some guesswork around what may be an unprecedented and intensive project. To maintain the benefits of a project-style inventory, the authors then encourage practitioners to embrace inventory as an ongoing, evolving collections care function that reflects changing professional values and expectations from the communities museums serve. By centering computerized databases, barcoding, and digital collections, the authors further acknowledge these technologies as permanent, evolving features of collections and inventory practice that merit increased resourcing. Part II gives voice to practitioners around the world through case studies that affirm the vital role of inventories in regaining control of collections. Some of these inventories occurred during the course of everyday work, while others were responses to natural disasters and armed conflict. Still others may be seen as expressions of social justice. As much as the authors offer a guide to performing inventories, thereby filling a longstanding gap in the literature, they invite cultural heritage institutions to rethink how the stories held in collections can be better told and preserved through enhanced inventory practice. The book will benefit seasoned museum collections practitioners as well as those who lack access to formal museology education and training. The book targets stewards of cultural heritage and material culture collections with varying resources

Standards and Labeling Policy Book United States. Food Safety and Inspection Service. Standards and Labeling Division, 1991

Weights and Measures Labeling Handbook David E. Edgerly, 1971

Elements of C Morton H. Lewin, 2012-12-06
Statements in C, like statements in any other programming language, consist almost entirely of expressions and special reserved words. Declarations in C, unlike declarations in other languages, also contain arbitrary expressions. Thus, studying the means by which C expressions are constructed and evaluated is especially important—particularly since the number of permissible C operators is so large. Since all of the operands in a C expression (excluding constants) must be properly declared before they are used, and since declarations themselves contain expressions, the teaching of C involves the following chicken-and-egg problem: Should one begin by considering only elementary declarations, in which case the topic of expression construction and evaluation cannot be fully treated in one place, because the operators that pertain to the more complex objects—like pointers and structures (whose declarations have not yet been introduced)—have not yet been covered, or should one postpone entirely the issue of how declarations are written (merely assuming that all of the objects under discussion have been properly declared) in order to fully treat all types of operands and operators in one comprehensive discussion? If the student is encouraged to begin writing programs immediately, the former choice is mandatory, because even the most elementary programs must contain proper declarations. Thus, most C textbooks postpone the discussion of objects like arrays, structures, and pointers (and of the operators that pertain to them) until the second half of the book is reached.
