Rise to the Task KimBoo York,2023-08-18 Rise to the Task explains the unique Personal Projects Management method, a fluid, flexible productivity method for solopreneurs, creatorpreneurs, and small business owners of all kinds. It can be used with any task management tools (analog or digital!), and is designed to be easy for you to maintain for yourself without spending several (or many) hours every week sorting out task lists, calendars, and priorities. The goal of the PPM method is holistic productivity, which is about more than just getting things done - it's about creating a lifestyle that supports your overall happiness, health, and success. It is based on the simple principles of project management and organizes your time management and tasks in a simple way for you to succeed at their personal and business goals. In Rise to the Task, you will discover the primary projects of your life that everything you do fits into, then break down the tasks in a way that matches your goals, your calendar, and your priorities. The reason you get burnt out on so many different project management tools and apps is because they are not designed for what YOU need to do. They are, in a word, over-engineered. Project management is SIMPLE, though. So if the tool isn't working for you, find the one that does. Risk to the Task is different because whatever works for you will WORK for YOU once you have mastered the PPM Method!

A software engineer organizer - new special solution A. Юрков, А. Хитёв, 2022-05-15 Issues which make engineers choose and use work time organizing systems are reviewed in this article. In addition, an overview of modern applications from this segment is provided and a notes system is proposed as a simple and effective tool to increase workflow effectiveness. And finally, requirements, model and development principles for an application to solve all these issues are described. The application was developed on the basis of the Spring Boot framework with partial use of the Domain Driven Development ideas. It has a good level of code coverage by autotests due to using the Test Driven Development. For posting of source codes in the Internet, the GitHub repository and the free open source software GPL v3 license have been chosen. The developed organizer helps to avoid waste of time for searching old data in case of work resumption under tickets suspended some time ago due to systematization of all required information, files and sub tasks. Regular using of the organizer makes it possible to increase efficiency of a software engineer's and the whole development team's work through minimization of time taken by routine operations connected with search for and use of project related information.
