Built from Scratch Bernie Marcus,Arthur Blank,Bob Andelman,2019-08-20 One of the greatest entrepreneurial success stories of the past twenty years When a friend told Bernie Marcus and Arthur Blank that “you’ve just been hit in the ass by a golden horseshoe,” they thought he was crazy. After all, both had just been fired. What the friend, Ken Langone, meant was that they now had the opportunity to create the kind of wide-open warehouse store that would help spark a consumer revolution through low prices, excellent customer service, and wide availability of products. Built from Scratch is the story of how two incredibly determined and creative people—and their associates—built a business from nothing to 761 stores and \$30 billion in sales in a mere twenty years. Built from Scratch tells many colorful stories associated with The Home Depot’s founding and meteoric rise; shows that a company can be a tough, growth-oriented competitor and still maintain a high sense of responsibility to the community; and provides great lessons useful to people in any business, from start-ups to the Fortune

Deep operations require boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two chapters address these considerations for future Deep Maneuver.

Pandaemonium 1660-1886 Humphrey Jennings, 2012-10-04 Collecting texts taken from letters, diaries, literature, scientific journals and reports, *Pandæmonium* gathers a beguiling narrative as it traces the development of the machine age in Britain. Covering the years between 1660 and 1886, it offers a rich tapestry of human experience, from eyewitness reports of the Luddite Riots and the Peterloo Massacre to more intimate accounts of child labour, Utopian communities, the desecration of the natural world, ground-breaking scientific experiments, and the coming of the railways. Humphrey Jennings, co-founder of the Mass Observation movement of the 1930s and acclaimed documentary film-maker, assembled an enthralling narrative of this key period in Britain's national consciousness. The result is a highly original artistic achievement in its own right. Thanks to the efforts of his daughter, Marie-Louise Jennings, *Pandæmonium* was originally published in 1985, and in 2012 it was the inspiration behind Danny Boyle's electrifying Opening Ceremony for the London Olympic Games. Frank Cottrell Boyce, who wrote the scenario for the ceremony, contributes a revealing new foreword for this edition.

The Founder's Mentality Chris Zook, James Allen, 2016-05-17 A Washington Post Bestseller Three Principles for Managing—and Avoiding—the Problems of Growth Why is profitable growth so hard to achieve and sustain? Most executives manage their companies as if the solution to that problem lies in the external environment: find an attractive market, formulate the right strategy, win new customers. But when Bain & Company's Chris Zook and James Allen, authors of the bestselling *Profit from the Core*, researched this question, they found that when companies fail to achieve their growth targets, 90 percent of the time the root causes are internal, not external—increasing distance from the front lines, loss of accountability, proliferating processes and bureaucracy, to name only a few. What's more, companies experience a set of predictable internal crises, at predictable stages, as they grow. Even for healthy companies, these crises, if not managed properly, stifle the ability to grow further—and can actively lead to decline. The key insight from Zook and Allen's research is that managing these choke points requires a “founder's mentality”—behaviors typically embodied by a bold, ambitious founder—to restore speed, focus, and connection to customers: • An insurgent's clear mission and purpose • An unambiguous owner mindset • A relentless obsession with the front line Based on the authors' decade-long study of companies in more than forty countries, *The Founder's Mentality* demonstrates the strong relationship between these three traits in companies of all kinds—not just start-ups—and their ability to sustain performance. Through rich analysis and inspiring examples, this book shows how any leader—not only a founder—can instill and leverage a founder's mentality throughout their organization and find lasting, profitable growth.

This Brave New World Anja Manuel, 2017-03-21 In the next decade and a half, China and India will become two of the world's indispensable powers--whether they rise peacefully or not. During that time, Asia will surpass the combined strength of North America and Europe in economic might, population size, and military spending. Both India and China will have vetoes over many international decisions, from climate change to global trade, human rights, and business standards. From her front row view of this colossal shift, first at the State Department and now as an advisor to American business leaders, Anja Manuel escorts the reader on an intimate tour of the corridors of power in Delhi and Beijing. Her encounters with political and business leaders reveal how each country's history and politics influences their conduct today. Through vibrant stories, she reveals how each country is working to surmount enormous challenges--from the crushing poverty of Indian slum dwellers and Chinese factory workers, to outrageous corruption scandals, rotting rivers, unbreathable air, and managing their citizens' discontent. We wring our hands about China, Manuel writes, while we underestimate India, which will be the most important country outside the West to shape China's rise. Manuel shows us that a different path is possible--we can bring China and India along as partners rather than alienating one or both, and thus extend our own leadership in the world--

A History of Tasmania from Its Discovery in 1642 to the Present Time James Fenton, James Backhouse Walker, 1884 James Fenton (1820-1901) was born in Ireland and emigrated to Tasmania (then known as Van Diemen's Land) with his family in

1833. He became a pioneer settler in an area on the Forth River and published this history of the island in 1884. The book begins with the discovery of the island in 1642 and concludes with the deaths of some significant public figures in the colony in 1884. The establishment of the colony on the island, and the involvement of convicts in its building, is documented. A chapter on the native aborigines gives a fascinating insight into the attitudes of the colonising people, and a detailed account of the removal of the native Tasmanians to Flinders Island, in an effort to separate them from the colonists. The book also contains portraits of some aboriginal people, as well as a glossary of their language.
