Pythagoras believed that mathematical truths shift the psyche closer to divine perfection. The Fibonacci sequence has been found to exist in patterns throughout nature. C. G. Jung thought that contemplating the mandala could unveil the unconscious. The designs here draw on the vast history and knowledge once thought esoteric, now available as tools for cultivating spiritual and psychological well-being. Create your own mandala based on geometry, numbers, and signs, or color a mandala as a meditative process to tap into your creativity and intuition. However you use this guide, geometry can be a pathway to grasping who you are, where you belong, and what you are to do. Discover how this timeless practice can help you on your journey of self-realization!

Mandalas are well known for their meditative inducing abilities in the colouring world. Drawing them induces the same relaxing state focussing your attention on the design process and calming your mind. Great for beginner doodlers or those wanting to get back into drawing.
