Slides for Students Gary D. Fisk, 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that. Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

The Airbnb Story Leigh Gallagher, 2017-02-16 In 2008, two broke art school graduates and their coder-whiz friend set up a platform that - in less than a decade - became the largest provider of accommodations in the world. Now valued at \$30 billion, Airbnb is in the very top tier of Silicon Valley's 'unicorn' startups. Yet the company has not been without controversy - disrupting a \$500 billion hotel industry makes you a few enemies. This is also a story of regulators who want to shut it down, hotel industry leaders who want it to disappear and neighbourhoods that struggle with private homes open for public rental. But beyond the headlines and the horror stories, Airbnb has changed the terms of travel for a whole generation - where a sense of belonging has built trust between hosts and guests seeking a more original travel experience that hotels have struggled to replicate. This is the first, definitive book to tell the remarkable story behind Airbnb in all its forms - cultural zeitgeist, hotel disruptor, enemy to regulators - and the first in-depth character study of its leader Brian Chesky, the company's curious co-founder and CEO. It reveals what got Airbnb where it is today, why they are nothing like Uber, and where they are going next.

Ditch That Textbook Matt Miller, 2015-04-13 Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting by the textbook implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

The Start-Up J Curve Howard Love, 2016-08-30 A predictable pattern of success Entrepreneurs who have read early

drafts of *The Start-Up J Curve* responded, "I wish I had this book years ago." A start-up unfolds in a predictable pattern; the more aware entrepreneurs are of this pattern, the better able they will be to capitalize on it. Author Howard Love calls this pattern the start-up J Curve: The toughest part of the endeavor is the time between the actual start of a new business and when the product and model are firmly established. *The Start-Up J Curve* gives entrepreneurs the tools they need to get through the early challenges so they can reach the primary value creation that lies beyond. Love brings thirty-five years of start-up experience to this comprehensive guide to starting a business. He outlines the six predictable stages of start-up growth and details the activities that should be undertaken at each stage to ensure success and to avoid common pitfalls. Instead of feeling lost and confused after a setback, start-up founders and investors can anticipate the challenges, overcome the obstacles, and ride the curve to the top.

Sweating Bullets Robert Gaskins, 2012-04-20 PowerPoint was the first presentation software designed for Macintosh and Windows, received the first venture capital investment ever made by Apple, then became the first significant acquisition ever made by Microsoft, who set up a new Graphics Business Unit in Silicon Valley to develop it further. Now, twenty-five years later, PowerPoint is installed on more than one billion computers, worldwide. In this book, Robert Gaskins (who invented the idea, managed its design and development, and then headed the new Microsoft group) tells the story of its first years, recounting the perils and disasters narrowly evaded as a startup, dissecting the complexities of being the first distant development group in Microsoft, and explaining decisions and insights that enabled PowerPoint to become a lasting success well beyond its original business uses.

Where to Play Marc Gruber, Sharon Tal,2017-09-27 Choosing the right market for your innovation is the first, and trickiest, question for innovators. Research has shown that all too often entrepreneurs don't spend enough time researching the first stage - instead they jump at the first opportunity that looks good, and fail to properly evaluate other opportunities. These common mistakes means that you often choose the wrong market and pursue too many opportunities at once.

Your Strategy Needs a Strategy Martin Reeves, Knut Haanaes, 2015-05-19 You think you have a winning strategy. But do you? Executives are bombarded with bestselling ideas and best practices for achieving competitive advantage, but many of these ideas and practices contradict each other. Should you aim to be big or fast? Should you create a blue ocean, be adaptive, play to win—or forget about a sustainable competitive advantage altogether? In a business environment that is changing faster and becoming more uncertain and complex almost by the day, it's never been more important—or more difficult—to choose the right approach to strategy. In this book, The Boston Consulting Group's Martin Reeves, Knut Haanaes, and Janmejaya Sinha offer a proven method to determine the strategy approach that is best for your company. They start by helping you assess your business environment—how unpredictable it is, how much power you have to change it, and how harsh it is—a critical component of getting strategy right. They show how existing strategy approaches sort into five categories—Be Big, Be Fast, Be First, Be the Orchestrator, or simply Be Viable—depending on the extent of predictability, malleability, and harshness. In-depth explanations of each of these approaches will provide critical insight to help you match your approach to strategy to your environment, determine when and how to execute each one, and avoid a potentially fatal mismatch. Addressing your most pressing strategic challenges, you'll be able to answer questions such as: • What replaces planning when the annual cycle is obsolete? • When can we—and when should we—shape the game to our advantage? • How do we simultaneously implement different strategic approaches for different business units? • How do we manage the inherent contradictions in formulating and executing different strategies across multiple businesses and geographies? Until

now, no book brings it all together and offers a practical tool for understanding which strategic approach to apply. Get started today.

Blue Ocean Leadership (Harvard Business Review Classics) W. Chan Kim, Renée A. Mauborgne, 2017-05-30 Ten years ago, world-renowned professors W. Chan Kim and Renee Mauborgne broke ground by introducing blue ocean strategy, a new model for discovering uncontested markets that are ripe for growth. In this bound version of their bestselling Harvard Business Review classic article, they apply their concepts and tools to what is perhaps the greatest challenge of leadership: closing the gulf between the potential and the realized talent and energy of employees. Research indicates that this gulf is vast: According to Gallup, 70% of workers are disengaged from their jobs. If companies could find a way to convert them into engaged employees, the results could be transformative. The trouble is, managers lack a clear understanding of what changes they could make to bring out the best in everyone. In this article, Kim and Mauborgne offer a solution to that problem: a systematic approach to uncovering, at each level of the organization, which leadership acts and activities will inspire employees to give their all, and a process for getting managers throughout the company to start doing them. Blue ocean leadership works because the managers' customers--that is, the people managers oversee and report to--are involved in identifying what's effective and what isn't. Moreover, the approach doesn't require leaders to alter who they are, just to undertake a different set of tasks. And that kind of change is much easier to implement and track than changes to values and mind-sets. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world--and will have a direct impact on you today and for years to come.
